Truant Officer,—CHARLES H. JOHNSON.

Inaugural Address

1901.

John O. Hall, Mayor.

Mayor's Address.

Gentlemen of the City Council :

We are assembled at this time to assume the responsibilities of the management of the affairs of our city for the coming year placed upon us by our fellow citizens.

Recognizing this responsibility our thanks are due for the confidence reposed in us.

For myself, I wish to publicly express my deep appreciation of the honor conferred upon me, and to return my hearty thanks for the generous labor and support given me by so many members of this Council and of the citizens throughout the city.

As you enter upon the consideration of the business which will be presented in your councils you will be impressed with the many demands for expenditures which seem to be imperative and at the same time will be made conscious of the heavy burden resting on our citizens and the somewhat limited revenue outside of the direct tax on real estate.

In view of this condition you cannot fail to be impressed with the imperative necessity of giving the most careful consideration to the minutest detail of every matter submitted for your legislative acting that only those enterprises be undertaken which have the very strongest claims.

I urge upon you the necessity of the most conscientious discharge of the duties of your position, ever bearing in mind your friends and neighbors who must furnish the money which you may vote to spend and who consequently will demand of you that you advocate only those matters which will prove of real benefit to the community.

Make yourself familiar with our City Charter that you may know of its requirements and be informed of the duties and privileges, and also the limitations of the Council.

The welfare and prosperity of our city depend in a large degree upon the wise, conservative and business like legislation of the Council.

While we cannot remain passive in the rush and hurry of the present strenuous life, we must use the utmost restraint upon our legislation so that in our enthusiasm for a progressive city we do not entail a burden upon our citizens which will be greater than they can bear and which will prove to be a curse rather than a benefit.

EXPENSES.

To show how we have grown in our expenses, I have only to state that the total of our appropriation the last year of the town government was \$177,000.

Our total for 1900 was \$676,235.93. Of this amount, \$158,650 was borrowed; \$112,750.98 was for debt; \$66,169.20 was for interest; \$270,808 was the amount of our annual appropriation in April, and the remainder was sundry appropriations during the year from receipts.

| | |
|--|-------------|
| Our appropriation for streets last year was for maintenance in the annual appropriation, | \$25,000 00 |
| Appropriation made during year | 66,900 00 |
| Appropriation under Railroad Excise, | |
| Tax, | 12,467 46 |

\$104,367 46

| | |
|-------------------------------|------------|
| For bridges und Drains, | 7,150 00 |
| For Sidewalks and Edgestones, | 13,800 00 |
| For Schools, | 111,000 00 |

At the beginning of the City form of government we had no debt, but on Dec. 31, 1900, our debt was \$1,518,605.61.

THE VALUATION

of the three preceding years is as follows :

| | | | | | | | |
|----------|---|---|---|---|---|---|-----------------|
| 1898, | . | . | . | . | . | . | \$19,247,155 00 |
| 1899, | . | . | . | . | . | . | 19,616,707 00 |
| 1900, | . | . | . | . | . | . | 20,193,689 00 |
| <hr/> | | | | | | | |
| Total, | . | . | . | . | . | . | \$59,057,551 00 |
| Average, | . | . | . | . | . | . | 19,685,850 00 |

At \$12 per \$1000 we can appropriate for current expenses in 1901, \$236,230.00.

With this statement you will see the necessity of the utmost care in making appropriations; and because of this condition I shall abstain from recommendation in the line of expensive projects, confining myself solely to those things which are imperative, or from which a revenue will be returned to the city treasury.

DEBT STATEMENT.

| | | | |
|---|---|---|--------------|
| Our Municipal Debt on Jan. 1, 1900, was | . | . | \$323,206 59 |
| During the year we have paid, | . | . | 70,950 98 |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|-----------|----|
| Leaving, | . | . | . | . | . | . | . | \$252,255 | 61 |
| To this has been added during the year, | . | . | . | . | . | . | . | 128,650 | 00 |
| Showing our Debt, Dec. 31, 1900, to be, | . | . | . | . | . | . | . | 380,905 | 61 |

| | | | |
|-----------------------------------|---|---|--------------|
| Our Water Debt, Jan. 1, 1900, was | . | . | \$721,000 00 |
| We have paid, | . | . | 30,500 00 |

| | | | | | | |
|------------|---|---|---|---|---|--------------|
| Leaving, | . | . | . | . | . | \$690,500 00 |
| And added, | . | . | . | . | . | 30,000 00 |

| | |
|---|--------------|
| Showing the Water Debt to be on Dec. 31, 1900 | \$720,500 00 |
|---|--------------|

| | | | | | |
|---|---|---|---|---|----------------|
| Sewer Debt on Jan. 1, 1900, | . | . | . | . | \$384,500 00 |
| We have paid, | . | . | . | . | 10,300 00 |
| <hr/> | | | | | |
| Showing Debt Dec. 31, 1900, to be, | . | . | . | . | \$374,200 00 |
| <hr/> | | | | | |
| Park Debt Jan. 1, 1900, | . | . | . | . | \$44,000 00 |
| We have paid, | . | . | . | . | 1,000 00 |
| <hr/> | | | | | |
| Showing Park Debt Dec. 31, 1900, | . | . | . | . | \$43,000 00 |
| <hr/> | | | | | |
| Total debt of the City, Jan. 1, 1900, was | . | . | . | . | \$1,472,706 59 |
| We have paid during the year | . | . | . | . | 112,750 98 |
| Leaving, | . | . | . | . | 1,359,955 61 |
| And we have added, | . | . | . | . | 158,650 00 |
| <hr/> | | | | | |
| Making the entire Debt, Dec. 31, 1900, | . | . | . | . | \$1,518,605 61 |

DIVIDED AS FOLLOWS :

| | | | | | |
|---------------------------|---|---|---|---|----------------|
| Municipal Debt, | . | . | . | . | \$380,905 61 |
| Water Debt, | . | . | . | . | 720,500 00 |
| Sewer Debt, | . | . | . | . | 374,200 00 |
| Playground Debt, | . | . | . | . | 43,000 00 |
| <hr/> | | | | | |
| Total debt, | . | . | . | . | \$1,518,605 61 |
| <hr/> | | | | | |
| Net increase in the debt, | . | . | . | . | \$45,899 02 |

OUR MUNICIPAL DEBT

Is constituted as follows :

| | | | | | |
|-----------------------------|---|---|---|---|--------------|
| Streets, brooks and drains, | . | . | . | . | \$174,155 61 |
| Land, Wollaston hose house, | . | . | . | . | 5,500 00 |
| Wollaston hose house, | . | . | . | . | 15,600 00 |
| Hose, | . | . | . | . | 2,000 00 |
| Poor Department, bills | . | . | . | . | 1,500 00 |
| Grade crossings | . | . | . | . | 500 00 |

| | |
|--|--------------|
| Hook & Ladder truck | 2,000 00 |
| Chemical, Ward 1, | 1,800 00 |
| Hose House, Ward 2, | 1,000 00 |
| Heating hose house, Ward 4, | 500 00 |
| City Stables, | 5,500 00 |
| Permanent Sidewalks, | 28,800 00 |
| Sewers, House Connection, | 10,000 00 |
| Bath house, Ward 2, | 2,000 00 |
| Bills 1899, in excess of appropriation, | 6,500 00 |
| Claims, | 2,500 00 |
| Drain, Willard street, | 2,500 00 |
| Abating Teal pond nuisance, | 2,000 00 |
| Improving yard John Hancock Schoolhouse, | 2,000 00 |
| Gridley Bryant and Massachusetts Field School- houses | 45,000 00 |
| Cranch Hill Schoolhouse | 40,000 00 |
| Plumbing Wollaston and Coddington Schoolhouses | 2,500 00 |
| Furnishing Room in John Hancock Schoolhouse, | 550 00 |
| Heating Adams and Quincy Schoolhouses, | 5,000 00 |
| Land for Cranch Schoolhouse | 4,500 00 |
| High Schoolhouse, | \$8,000 00 |
| Heating Wollaston Schoolhouse, | 4,000 00 |
| Plumbing Willard Schoolhouse, | 3,500 00 |
| Repair of Public Buildings, | 1,500 00 |
| | <hr/> |
| | \$380,905 61 |

Our Municipal Debt falls due as follows :

| | |
|--------------------|-------------|
| In 1901, | \$68,605 61 |
| In 1902, | 40,250 00 |
| In 1903, | 37,850 00 |
| In 1904, | 35,450 00 |
| In 1905, | 34,950 00 |
| In 1906, | 32,950 00 |
| In 1907, | 24,450 00 |
| In 1908, | 23,750 00 |
| In 1909, | 20,075 00 |

| | |
|--------------------------------------|--------------|
| In 1910, | 15,575 00 |
| In 1911 to 1924, each year, 3,300 00 | |
| In 1925, | 800 00 |
| | <hr/> |
| | \$380,905 61 |

THE WATER DEBT

falls due as follows :

| | |
|---------------------------------------|-------------|
| In 1901 to 1914 inclusive each year, | \$31,500 00 |
| In 1915, | 30,500 00 |
| In 1916, | 29,500 00 |
| In 1917, | 28,500 00 |
| In 1918 to 1923 inclusive, each year, | 27,500 00 |
| In 1924, | 6,500 00 |
| In 1925, | 5,500 00 |
| In 1926, | 4,000 00 |
| In 1927, | 4,000 00 |
| In 1928, | 3,000 00 |
| In 1929, | 2,000 00 |
| In 1930, | 1,000 00 |

SEWER DEBT.

| | |
|---------------------------------------|-------------|
| In 1901 to 1905 inclusive, each year, | \$11,300 00 |
| In 1906 to 1909 " " " | 10,300 00 |
| In 1910 to 1929 " " " | 10,000 00 |
| In 1930 to 1937 " " " | 9,000 00 |
| In 1938, | 3,500 00 |
| In 1939, | 1,000 00 |

PLAY GROUND DEBT.

| | |
|--------------------------------------|------------|
| In 1901 to 1903 inclusive each year, | \$1,000 00 |
| In 1904 to 1923 " " " | 2,000 00 |

THE TAX RATE.

In our tax rate of \$18.20 the following requirements are provided for :

| | |
|--|---------|
| Levy for municipal purposes, | \$11 15 |
| State tax, | 19 |
| County tax, | 50 |
| Maturing city debt, | 3 55 |
| Water Debt, less balance of income remaining after providing for maintenance and interest | 63 |
| Metropolitan water assessment, | 56 |
| Interest on municipal debt, | 1 02 |
| Metropolitan sewer assessment, | 60 |
| | <hr/> |
| | \$18 20 |

Our municipal tax of \$11.15 is apportioned as follows :

| | |
|--|---------|
| Fire Department, | \$1 05 |
| Pay City Officers, | 65 |
| Street Lighting, | 70 |
| Street Watering, | 25 |
| Highways, Bridges, Crossings, | |
| Repair Public Buildings, Snow, etc., | 1 50 |
| Public Library, | 25 |
| Police, | 45 |
| Soldiers' Aid, | 25 |
| Poor, | 50 |
| Schools, | 5 00 |
| Sundries, | 55 |
| | <hr/> |
| | \$11 15 |

BORROWING MONEY.

While we have added to our debt this year more than we have paid, yet the increase is not as much as last year. Still it is more than it should be, for I am firmly of the opinion that we

should at once take stringent measures to do away with the practice of borrowing money to the extent which we have done to the present time.

If we should be asked to appropriate the sum of \$80,000 or \$90,000 and put it into the tax levy of the current year, there would be an earnest protest from the citizens and yet we are doing just that very thing and in addition are paying the interest charge on that sum which is a dead loss to the city.

Every dollar of interest which we pay is a tax upon our citizens from which no benefit whatever is derived.

If we have an unusual large expense, it might be necessary, perhaps advisable, to borrow it on a term of years but if this is repeated each year we have the same burden each year on the body of the expenditure and in addition the burden of the interest.

By referring to the debt statement which I have given, you will see the need of the most careful scrutiny of every measure which is presented.

I am firm in my conviction that it is the duty of this and succeeding Councils to legislate in such a manner that we shall in a very few years be beyond the necessity of borrowing. Under the present laws limiting the power of cities to exceed \$12.00 per thousand on the average valuation of the three preceding years, all city governments resort to borrowing money for their schemes, claiming permanent improvement as an excuse for wrong interpretation of the laws which allow and provide for borrowing money for municipal purposes.

A movement is now being made to see if the \$12.00 limit cannot be removed and every community allowed to spend what it is willing to be taxed for.

As it is at the present time the people are deceived by deferred payments and the interest item becomes almost appalling.

CITY HALL.

At the last city election the people voted upon the question of authorizing the Council to vote money to build a new City Hall and that question was answered in the negative.

The situation is so serious that additional accommodations must be provided for the safe keeping of the records of the city business, and I shall again submit for your consideration some changes in the present building which will accomplish this purpose.

ASSESSING DEPARTMENT.

The assessing of taxes in any community is one of the most difficult tasks in the whole lists of municipal affairs.

To equitably apportion the payment into the city treasury of the amount needed to carry on the government requires skill and courtesy in large measure.

During this year our charter has been amended so that we shall have a continuous board of three Assessors, one appointed each year for three years, instead of all being appointed yearly as at present.

During this past year a change has been made in the matter of recording the work of the Assessors, the card system, so-called, having been introduced, and this will add greatly to the effectiveness of the work ; will give greater accuracy and will lessen the liability of overlooking taxable property.

This change was made in the short time of six weeks and because of the shortness of the time there were some errors and defects which will be corrected during the present year and the system made complete.

Under this system taxable property was found which before has escaped assessment, the tax from which exceeded the cost of establishing the system.

The change in the appointment of Assessors will require legislation on the part of the Council to provide assistants to provide for the field work in May and June.

COLLECTOR'S DEPARTMENT.

During the past year, at my recommendation, the Council changed the salary of the Collector making it a fixed sum, and directing all fees and emoluments to be paid into the City Treasury.

The business of this office is increasing in a very rapid manner both in amount of money to be collected and in detail, and the Council will have to give additional clerical assistance for the work for the present year.

Some changes will have to be made in the arrangement of the office, to enable him to efficiently transact the business of the department. The detail of sewer and sidewalk assessments adds greatly to the business of this department.

While the collection of the taxes is purely an executive function, it is a matter which to a large extent is in the hands of the people, and I wish for this reason to speak at this time of the desirability of a prompter payment of the taxes, thus securing the advantage of a saving of interest in the money which we must borrow in anticipation of the collection of the taxes.

All cities are moving in this matter and some collectors are proceeding to enforce the payment at the earliest day under the law, and I trust our citizens will see the wisdom of early payment and co-operate with the executive.

A delay in payment is of no advantage to the taxpayer but is rather an injury.

OFFICE ACCOMMODATIONS.

There must be some changes made in the arrangement of the offices of Assessors' department, Treasurer and City Clerk for the efficient transaction of the business and for the preservation of the city documents.

POOR DEPARTMENT.

Money must be expended this year for the improvement and preservation of the Almshouse; in painting, and making additions to the toilet facilities.

This department is very efficiently and economically administered, and the city is fortunate in having so conscientious a man in this office as is Mr. Bass.

I am certain that our city will compare very favorably with

other cities in this vicinity in the cost and manner of caring for the poor.

STREETS.

You will learn from the figures which I have read to you, and from your personal examination, that the expense of the city in providing for our walks and roadways makes a large item in our annual budget of appropriations.

Under Mr. Knowlton's efficient and intelligent administration the citizens can feel certain of getting an equivalent for all money expended by him.

While we are believers in good roads, we must remember our financial limitations and be very careful in expenditures in this direction.

I am reminded by the Commissioner that the streets and roads in Ward 2 will have to receive considerable attention during the coming year, owing to the developments which are likely to come in that section at an early date.

The appropriations for street watering and street lighting were quite substantial the past year and I am desirous that our receipts will want the same liberal appropriations for the present year.

The expenditure of money for edgestones and sidewalks I believe is wise and economical. No improvement is more permanent than this and nothing that we can do will reduce the cost of maintenance of ways in so substantial a degree.

ACCEPTANCE OF STREETS.

The Commissioner of Public Works reminds me that in his judgment it is not wise to accept streets without making a sufficient appropriation to put them in first-class shape for the demands likely to be made upon them in the section which they are.

I believe it will be wise to decline to accept any streets unless the abutters are willing to pay one-half the cost of edge-

stones and to release the city from any damages by reason of a change of grade.

Much comment has been made regarding our expenditures on streets and while it is a fact that we do spend considerable sums in this work yet the fact remains that this is a considerable item of cost in every city, and the demands upon our streets are peculiarly heavy and we must expect that our cost in this regard will be large.

I wish to have you carefully consider whether the time has not arrived requiring all wires, so far as possible, to be put underground, thus preventing to a great degree the disfigurement and destruction of our shade trees.

I have always been of the opinion that street watering should be included in the general tax and not be a special levy.

The injustice of this is to me very apparent, all enjoy the benefits but the expense falls upon a portion of the citizens and is not apportioned on all as it would be under the practice of including it in the levy.

Action is being taken in some cities to have this method adopted, and I would suggest the consideration by your body of legislation looking to its advancement.

The desirability of naming the squares and junctions of our principal thoroughfares, it seems to me, is apparent and should be attended to at an early day.

By giving to these places, in nearly all of which is some prominent or public building, the names of patriots and statesmen, the deeds and events of the past would be constantly brought to the attention of both old and young.

ASSESSORS' PLANS.

Many cities have found it wise to appropriate large sums of money to prepare Assessors' Plans and they have found the expenditure very profitable in returning to the city treasury taxes on property which had escaped notice before such plans were prepared.

I remommend this matter to your attention and in this connection urge the enactment of such legislation as will conduce to a symmetrical growth and extension of our city.

WATER DEPARTMENT.

Our water service is becoming to be an extensive plant and will require quite a liberal appropriation this year because of the industries which are being developed in Ward 2.

I shall ask an early appropriation for this purpose that we may secure our pipe in season for an early beginning in the spring.

Expenditures in the extension of our water service are wise in many ways, and the return we get from them is very generous.

We are very fortunate in being in the Metropolitan district for if we had been dependent on our own supply during the past year and a half I fear we should have been in a dangerous situation.

The consumption of water in the Metropolitan district is increasing to almost an alarming degree, and I wish to urge for your consideration the matter of requiring a general use of water meters in our city as a matter of economy and of safety.

There are many questions connected with the Metropolitan districts of Water and Sewer, and at a later date I may find it necessary to place the matter before you at length.

SEWER DEPARTMENT.

The system of sewerage of our city will in a year or two be extended for discharge into the outlet of the South Metropolitan District Sewer, and only the care and maintenance of our lateral sewers will devolve upon us. Very little has been done the past year by our Commission; the putting in of a few small connections being the extent.

The Metropolitan Sewerage Commissioners are in conference with the officials of the city for determining the price to

be paid for our pumping station and force mains and we shall try to bring these negotiations to a close at a very early day.

In accordance with the provisions of the Sewerage Act, I have requested the Sewerage Commissioners of Quincy, to transfer the Sewerage system to the Commissioner of Public Works, and the power and duties of that Board will be vested in the Commissioner of Public Works at a very early day.

PARKS.

During the past year we have made some improvements in our play grounds in Wards 3, 4, and 6, and some further work can be done the present year to advantage if our revenue will permit.

The Park Commissioners were not able to complete the Bath House in Ward 2 in season for use during last year, but it is completed now and will be available to the citizens in the summer of 1901.

It was the intention of the Park Commissioners to equip it with suits, laundries, etc., and charge for service, but that plan has been given up, and the bath house will be free, all making use of it to provide their own suits.

It is not my desire to ask for any considerable sum for Merry Mount Park, but I do desire that an appropriation should be made for the improvement of Faxon Park that the citizens may be able to enjoy this truly delightful section.

At the proper time I shall ask an appropriation with statement of the improvement which it is desirable to make.

The Boulevard under the direction of the Metropolitan Park Commission is being advanced and in connection with our parks and reservations will greatly improve our city.

This Boulevard passes directly in front of the Willard schoolhouse and I believe that we should proceed this year to put an iron fence about that school yard, not only for the improvement in the looks of the grounds, but also for the protection of the building and the safety of the children who attend the school.

PLUMBING ORDINANCE AND BUILDING INSPECTION.

There is certain to be a great deal of building in the city in the near future and there is an imperative need of building inspection and an ordinance regulating the building operations, requiring the obtaining of a permit and a penalty for violation.

The ordinance regulating Plumbing in the city should be amended at once as there are many things in it which need correcting.

PRECINCTS IN WARD ONE.

Ward 1 should be divided into two voting precincts before another election.

FIRE DEPARTMENT.

This department continues to increase and requires quite a generous sum to maintain it.

While it is a department which demands a large sum to support it, still the citizens receive a substantial return in the reduced premiums on their insurance, not to speak of the derangement and loss to business and to their homes which would result if a large fire should sweep through our city for lack of a good Fire Department.

Under the able management of the present Chief, the fires which occur are intelligently handled and quickly extinguished with a small loss in the majority of cases.

The new Hose house in Ward 5 is nearly completed, and you will doubtless be asked to furnish it and place another piece of apparatus in it in the near future.

I should like to provide helmets for the entire force, and wished to do so last year, but accidents to the apparatus caused quite an outlay in repairs and the money could not be spared.

Improvements in the ventilation and in the toilet accommodation of engine houses have been made the past year and

the comfort and health of the permanent men have been promoted.

An Inspector of Wires is demanded in our city, and it seems to me that he should be under the direction of the Chief of this department.

POLICE.

This department requires many things and demands our immediate attention.

During the year I have had many calls for officers which I could not answer satisfactorily for want of men.

The expense of this department like the Fire Department causes much unfavorable comment, and objections to it are constantly made, but for all that it is a necessary department and should receive every encouragement to make it effective.

The officers are men of flesh and blood and your fellow-citizens, and they should receive every good word of commendation that you can give them.

Our accommodations for the Chief and his men are objectionable in the highest degree, and it is our duty at the earliest day to make some arrangement for the improvement of the officers quarters and for the humane care of prisoners, especially females.

The few officers which we have are scattered over long routes which they can only imperfectly protect, and in case of trouble have no means of getting help or signalling alarm; the need of a signal service and police patrol wagon is manifest and is continually asked for by the citizens.

This demands a station and I am of the opinion that the building on School street can be made very serviceable for these requirements.

SCHOOLS.

No department of municipal administration is causing so much discussion or requires such careful attention as the schools.

Aiming for the highest education possible for the youth of the land, presided over by men and women of high ideals and broad sympathies who desire the best that these progressive times afford, it is a hard and difficult task to so balance the ambitions by the financial possibilities that there is almost constant friction.

The doubt which is in the mind of many people whether the best lines are being followed in the work of the schools and whether the results are commensurate with the cost, only adds to the difficulties of the situation, and adds to the burden when considering the questions connected with them and providing the needed revenue for their support.

With all the difficulties pertaining to the general subject of school provision, we have the added fact of a very large school population and the matter of providing the money and determining the amount which we need and which we will spend, will require the most harmonious action of all interested when this matter shall come before you for action.

I ask that you will carefully consider the matter without prejudice or bias, and will in a spirit of fairness and friendliness come to an amicable decision on which the School Committee can conduct the schools to the satisfaction of the citizens.

As the business of the city shall be presented for our action in the months before us, I ask your confidence and co-operation. I assure you we cannot faithfully serve the citizens who have trusted us unless we are in perfect harmony and with an eye single for the public good.

I earnestly hope that the cordial relations and good feeling of the Council of last year will not only be maintained, but will be increased and that besides being fellow servants working the peoples' will, we shall be friends and brothers bound together by strongest bonds of respect, esteem and love.

Annual Reports
For the Year 1900,
City of Quincy.

Treasurer's Report.

CITY TREASURER'S OFFICE, }
January 1, 1901. }

To His Honor, the Mayor:—

Herewith I submit the annual statement of the City Treasurer for the year ending December 31, 1900.

CRANCH SCHOOLHOUSE.

Report of the Commissioner of Public Works.

To His Honor The Mayor of the City of Quincy :

SIR:—I have the honor to submit herewith the twelfth annual report of the Department of Public Works for the year ending December 31, 1900.

It is with a certain feeling of pride that I look back upon the work performed by this department the past year, the results obtained are very gratifying and seem to meet the approbation of the taxpayers.

Much permanent work has been done on the streets, in the public buildings, and Water Department, while necessary repairs have not been neglected.

The adoption last year of the eight hour law necessitated a rearrangement of the working hours and the employment of additional men. These matters were satisfactorily adjusted and the entire force worked the past year on an eight hour basis in accordance with the law.

In addition to the regular duties prescribed by law, of this department, much special work was done.

There were 103 orders sent down by the Council involving an expenditure of \$233,384.52, to which may be added \$40,000 expended for the Cranch School and \$150 for wiring the Alms-house, by Council orders of 1899 and the receipts for labor performed for outside parties and other departments amounting to \$30,573.48, thus making a grand total of \$304,108; which I have endeavored to expend in an honest and economical manner for the best interest of the people.

The amounts of these orders were divided among the divisions as follows :

In the Street Division: twenty-two orders of \$68,075.58 of which \$24,600 was for completing work begun in 1899, one order of \$12,467.46 for Street Railway Excise Tax and one order of \$6,930.62 for State Highway. Sidewalk Division: six orders of \$10,600. Public Building Division: eight orders of \$27,517.48. Bridges and Drains Division: four orders of \$6,150. Water Division: two orders of \$38,600 and the annual appropriation order of \$69,924.

The balance of the orders were for location of poles, street lights, car tracks and acceptance of streets.

The following table shows appropriations, expenditures and balances, which may be of interest.

| BUDGET. | APPROPRIATION. | EXPENDED. | BALANCE |
|-------------------------------|----------------|------------|----------|
| Bridges, Culvert and Drains | \$4,000 00 | \$3,977 38 | \$22 62 |

| | \$304,108 00 | \$264,841 53 | \$39,266 47 |

In the following report I will take up each item in its order and only speak of the most important points. For a detailed statement of expenditures I would refer you to the report of the City Auditor.

BRIDGES, CULVERTS AND DRAINS.

The usual amount of repairing old bridges and culverts was performed this year.

Neponset bridge was in a very dangerous condition and it was found necessary to not only renew the top planking but to put in new deck plank, making the total cost \$1376.21. Next year it will be necessary to replank the sidewalk.

Beale street bridge over the tracks of the N. Y., N. H. and H. R. R. was replanked as was also the Bates Avenue bridge.

The stone culvert on Squantum street was rebuilt and minor repairs made on several others.

A large amount of work was done in putting in catch basins and drains in different parts of the city which has greatly aided the keeping of the streets in a dry condition, thereby saving repairs.

Among these cases may be mentioned the drain at the corner of West and Willard streets, draining of Newcomb street, Howard street, Brook street, Farrington street, Hancock street near Sachem brook, Granite street, Quincy avenue, Whitwell street, Cottage street, corner Beale street and Newport avenue, Mechanic street and Revere road, and at the corner of Bennington street and Independence avenue.

A 12-inch pipe was laid from Town brook to the Breisler

corner which will be extended the coming year to the corner of Depot street and to the Adams building and thus care for surface water in City square, greatly to the benefit of our citizens.

The large drain from the easterly side of the square running down Coddington street to the brook and which was put in under the Coddington street improvement, has already proved its great value.

There were 42 catch basins and pipe connections with water ways put in under this appropriation. We have now nearly 200 catch basins which have the constant attention of one man who cleans them out after every rain.

In the development of the Ward Two section, it will be found necessary to expend large sums to care for the surface water on streets which heretofore have drained on to private grounds. The city will be obliged to provide drains along and in the streets with outlets into the brooks and water-ways.

More than usual attention was given to cleaning brooks and they all are now in a very clean and healthy condition. The amount expended for this purpose being \$508.

On account of the intention of building a new bridge across the Weymouth Fore River in 1901, no more than was absolutely necessary was expended on repairing the old structure, only \$175, being required as Quincy's proportion.

REMOVAL OF SNOW.

We were particularly fortunate during the past year to have so little snow to remove. Such storms as we had were so very light that very little ploughing was required.

The snow districts have been slightly reorganized and we have now fourteen districts, handling twenty-six snow plows, which will enable the department to handle a large storm in a short time.

STREET LIGHTING.

There has been a marked increase in the number of street lights ordered by the Council the past year and a much larger appropriation will be necessary.

There was considerable delay in erecting the new lights, some that were ordered in April were not in operation until October and November. This was excusable, as the Electric Light Co. in order to handle the additional lights were obliged to put in more power and the delivery and setting up of new machinery was necessarily slow.

The arc lights in the Atlantic, Wollaston and other northerly districts were changed over to the new enclosed system which makes a decided change for the better in the service and is greatly appreciated by the citizens.

We have now in operation 108 arc, 421 incandescent, 73 oil and 67 gas lamps, an increase of 8 arc and 43 incandescent lamps, and a loss of 3 oil lamps over the year 1899.

Twenty-three more incandescent lamps have been located but not yet erected.

ADVERTISING, PRINTING AND STATIONERY.

This account as usual is very hard to handle, covering as it does the general advertising and printing of other departments and also election expenses, but by careful management it was kept within the appropriation.

I would recommend that the printing for election purposes be paid out of Miscellaneous City appropriation with the other election expenses or else a separate appropriation be made for election expenses and be spent under the direction of the City Clerk.

REPAIRS OF PUBLIC BUILDINGS AND CARE OF CITY HALL.

There is a vast amount of detail work connected with this

account. A larger appropriation was made than usual to cover some very necessary repairs and alterations in the Fire Department buildings and for painting the Wollaston School building.

All of the Public buildings are in good repair at present with the exception of the Almshouse, which must be thoroughly painted inside and out, and toilet rooms provided.

The Quincy School will need re-shingling and the Coddington School painted inside.

Some of the buildings had special appropriations for plumbing, etc.—which I will speak of later.

The Central Fire Station and the Hose Houses were provided with better ventilation and sanitary arrangements, and are now in first class condition.

Very few repairs were made on the City Hall as it was believed to be poor economy in view of the belief that a new building would be erected, but as that proposition did not meet with the approval of the voters it makes it necessary to take immediate steps to put the old building in a habitable condition.

The following list will show amounts expended on each building and the cost of care of City Hall.

EXPENDED ON SCHOOL BUILDINGS FOR REPAIRS.

| | |

HIGHWAYS.

The work in this division has gone along in a very satisfactory manner and agreeable results obtained. Many streets which had been neglected for years were put in good condition.

Work was laid out to cover the entire city and to give each ward its just proportion, and I can safely say that the conditions are improving rapidly.

Space will not permit enumerating every street upon which work was done, but I will mention Elm street, Washington street, Independence avenue, School street, Granite street, Newcomb street, Howard street and Squantum street, where decided improvements were made.

More than the usual amount was done toward cleaning gutters and streets, many sidewalks were resurfaced with stone

dust, trees trimmed and cut down and poles relocated. There were 74 street signs erected and 67 permits issued during the year for street openings, parades and moving buildings, etc.

During the year nine new streets were laid out and accepted making our street mileage 72.2 miles.

| | Length in feet | Width in feet |

| <hr/> | | |
| Total number of feet | 6,146 | |

It has been of great benefit to my work on the streets to have an engineering corps to call upon to give lines and grades to set stone bounds and to make record plans of public work. The work of the City Engineer has been very closely connected with the work in my department and I greatly appreciate the aid I have received in the systematic carrying out of public improvements.

I believe the establishment of the office of City Engineer was a wise piece of legislation and will prove its value more and more each year.

Early in the year a contract was taken with the Mass. Highway Commission and work commenced constructing a State Road on Washington street from Chubbuck street to the

Fore River Bridge. The State had their own engineer to determine the form and kind of construction and the kind of material to be used, the City simply doing the work under the direction of the State Engineer on the contract price made in 1898. Although the prices were low and the working day only eight hours a small profit was made and the city got the benefit of the expenditure of \$6,930.62, every cent of which went in to the hands of our workingmen.

The City also is benefited by having one of its main thoroughfares well built and forever cared for and repaired without any expense falling on the taxpayers.

This year we had quite a sum from Street Railway Excise Tax to help out on street work, the law providing that this tax shall be expended on the highways. A large part of this money was used to repair paving in the road-bed on several streets, for the removal of snow, and for planking the road-bed on Neponset Bridge, and the remainder for repairing the highways caused by location of tracks therein. A separate set of books were kept, as required by law, for these accounts for examination by the Board of Railroad Commissioners. The consolidation of the Quincy & Boston with the Brockton Street Railway will cause our receipts from this source to be very much less in the future, which loss is greatly to be deplored.

The purchase of a gravel pit in Wollaston was a very wise move and has relieved me of considerable anxiety and trouble in obtaining good gravel in the north section of the city.

Although the lease on our crusher quarry has two years more to run, the quarry is so badly run out and expensive to handle that a move to another site is desirable and I may ask for an appropriation for this purpose.

During the year there was quarried and put on the streets from our crusher 6,400 tons of broken stone beside 530 tons purchased from the crushing plant of Lamb & Doble. This does not include stone from Lamb & Doble used on the State Highway.

The outfit of the department is in first class condition and the permanent force is working faithfully and harmoniously.

The receipts shown below are for board of horses and for work performed for the Park, Sewer, Water, Health, and other departments and for work building the State Road.

| | |
|------------------------------------|-------------|
| Appropriation | \$25,000 00 |
| Receipts from Sewer Dept. | \$659 39 |
| Park Commissioners | 643 43 |
| Mass. Highway Commission | 6,930 62 |
| Street Railway Tax | 3,580 62 |

| Board of Health | 235 00 |
| North street | 23 07 |
| Snow | 63 00 |
| City Engineer | 139 02 |
| | <hr/> |
| | \$13,926 90 |
| | <hr/> |
| | 38,926 90 |
| Expended | \$38,683 36 |
| | <hr/> |
| Balance | \$243 54 |

STREET WATERING.

I have never known a year when so little complaint was made on account of street watering service. This does not prove that every one was satisfied, for that would be impossible, but it does show that improvements are made in this service.

The American Car Sprinkler Co. was again awarded the contract for the portion covered by car tracks and gave good satisfaction.

The other districts were covered by four carts. Fourteen miles of street were watered at a cost of .044 per linear foot making the assessment on each abutter .022 per linear foot.

EDGESTONES AND SETTING.

This work as usual has been performed when citizens ask for edgestones and agree to pay one-half the cost. All petitions received have been promptly attended to with results highly satisfactory to the petitioner. 2293 ft. of edgestones were set.

It is to be regretted that citizens on streets needing edgestones cannot unite and petition this department for edgestones so that the expense can be met each year in the budget instead of waiting for the Council to order in edgestones under the sidewalk act to be paid on a ten year loan.

STREET CROSSINGS.

Crossings were put in at seventeen different points as petitioned for or ordered by the Council.

In connection with building tar concrete sidewalks, crossings were put in at every street, but are not included in the above appropriation.

The locations are as follows :

| | | | |
|--|---|-----------------------------|-----------------|
| Washington street, junction of Canal street. | | | |

SPECIAL.

I will now briefly report on the special appropriations made by the Council for special permanent work.

\$24,600 was required to complete work commenced in 1899, the balances showing on January 1, 1900 were all required to pay outstanding bills contracted in 1899.

Chief among these appropriations was that for Coddington and Sea street. By the terms of agreement with land owners on Sea street, the street had to be built to the established grade and no trees disturbed. The Street Railway Co. were given a relocation of tracks, necessarily on the south side on account of the position of the line of trees, thus giving the public a clear roadway of about 30 feet in width on the north side and separated from the car tracks by a grass plot and row of trees.

The quantities of earth moved was about 34,000 cubic yards. It was found necessary to drive piles for a foundation for a 24-inch pipe culvert on Coddington street, these being driven 25 feet before a solid foundation was secured.

The roadway over this soft marsh has been filled to grade six times and will require filling again in the spring for which I have a balance left, and it will be many years before the earth filling ceases to settle.

A pipe drain with catch basins was laid from the head of Coddington street to the brook and that portion of the street macadamized.

A strong sea wall was built on the causeway at the Willows to prevent inroads from the sea and the causeway widened out to 60 feet.

This job was commenced April 1, 1900 and completed July 1, 1900 and the travelling public inconvenienced but very little.

Arthur street was not wholly completed on account of the construction of the sewer which was not finished until the middle of November.

Madison street, Billings road, Howard street, School street and Federal avenue and Goddard street were completed and are now in good condition.

Beale street appropriation was not spent on account of the construction of a reservoir and stand pipe on Third Hill and the heavy teaming would injure the work of construction.

Copeland street widening and paving was a large proposition to handle and on account of the delay of the Brockton Street Railway Co. in moving its tracks to the centre, but very little could be done until the middle of November.

I then put on a large gang and in twenty-three days had excavated and laid 4550 sq. yds. of granite paving and 3578 ft. of edgestone, besides moving four buildings, walls and fences back to the new line.

This work was very economically done and is a great public improvement.

There is still a small amount of work left for spring for which I have a balance of \$2,904.94.

The paving of Hancock street closed up the gap near Beach street and we have now a continuous paved roadway from City square to the Neponset river.

The extension of Chubbuck street and the building of Des Moines road were on account of the starting of the new ship building industry at Quincy Neck and these two well constructed roads will aid materially in the development of that section.

The appropriations for Quincy avenue widening, North street widening, Kendrick avenue, Webster street, Glover avenue, Squantum causeway, Furnace avenue regrading, Furnace avenue culvert and Prospect avenue drain, have all been expended in the manner desired by the Council and the results are satisfactory.

The appropriations for Intervale street, Clark street, Willard street drain, approaches on Quarry street and filling of Teal pond were not passed until December and it was deemed best not to commence any of this work until spring.

The appropriations for permanent sidewalks on Washington street, Water street, Beale street, Beach street, Billings road, Botolph and Clive street, to my mind give more comfort and pleasure to people generally than any other form of public expenditure.

These sidewalks are in most instances a continuation of walks built in previous years and is the carrying out of the wise policy of building good walks radiating from the several railroad stations in different directions, and I trust the policy will be continued until Quincy has a system of well constructed sidewalks of which it may be proud.

There were 5,235 sq. yds. tar concrete walk and 620 sq. yds. tar concrete drive laid during the past year.

In the expenditure of the appropriations for improvements in our public buildings, much time and thought was given and results meet all expectations.

The heating and ventilating system of the Fuller and Warren installed in the Wollaston school building was a much needed improvement and was done at the request of the Mass. State Board of Police. The comfort and health of the children is greatly enhanced.

The installation of steam heat in the Ward Four Hose house by Ames & Bradford, is in the interests of economy for the city and comfort for the occupants of the building. It is a very creditable job and works to perfection.

The plumbing of the Willard school building was a very necessary undertaking as the old Smead system was considered a source of danger to the health of the school children and was really in a bad condition.

This work was let to J. E. Keniley & Co. and commenced during the Christmas vacation. The Sanitas Automatic Flushing Closets and Urinals were put in and connected with the sewer at the junction of Centre and Copeland street, six hundred feet away.

The Ward Four Hose House was also connected with this line at the same time.

A large amount of painting and whitewashing was done and the work completed January 12, 1901, so that the school was only kept closed about a week.

Early in the spring plans for a two way engine house in Wollaston were submitted by Messrs. Jones & Hart and an appropriation of \$15,600 made for constructing the same.

The contract was awarded to Lord Bros. of Waltham and work commenced July 19, 1900. The contractors have built a good solid substantial building but owing to delay in receiving material did not finish it at the time specified. It will be ready for occupancy by February 1st.

When the grounds are graded the building will prove an ornament to that section of the city by reason of its artistic design.

I hope in the near future that a ward room will be added to the east side as originally designed by the architects and for which provision is made in this building.

In making appropriations for public buildings a sufficient amount should be allowed to provide for an inspector to be constantly on the work thus saving annoyance and delay and insuring the city absolute fulfillment of all specifications.

The grounds around the John Hancock school building were greatly improved by the expenditure of the \$2000 appropriated for grading purposes. The brook was walled up and fenced. A bridge built across the brook and by a transfer of land a good wide entrance from Water street is secured. The front of the lot was fenced, graded and sowed down. The swamp in the rear was filled with stone chips and gravel, making an excellent play ground.

The appropriation of \$40,000 for erecting the Cranch school made in 1899, was not available until March of this year.

The plans adopted by the Council were those made for the Massachusetts Fields and Gridley Bryant schools, but owing to the different location and conditions of the lot it was necessary to make some changes in the arrangement of the basement which I made with the full consent of the School Board. What errors and omissions there were in the old buildings were avoided in this and many improvements were made in the character of construction, so that I can freely say that the Cranch school is the best school building we have in point of construction, heating, ventilation and furnishings. George Howard of Brockton was awarded the building contract for \$30,960., Lynch and Woodward of Boston the heating contract

for \$4,100, and the Chandler Adjustable Desk Co. the contract for school desks. Mr. Albert H. Wright of Quincy was the architect in rearranging the plans and superintended the building. Mr. John Harkins was employed as inspector and saw that every detail was properly attended to and specifications lived up to. The work went along very smoothly except there was some delay on the foundation and receiving materials, however the building was completed and turned over to the School Board for occupancy at the beginning of the school term January 7, 1901.

The school lot is in a deplorable condition and should be graded and curbed and I will soon ask for an appropriation for this work.

WATER DIVISION.

This is the first year I have had to make a report on water maintenance and construction as it was only made a part of the duties of the Commissioner of Public Works in 1899, and I am proud to make such a good showing for the money entrusted to my care, when it is considered that materials were very high the past year and we were working on an eight hour day.

The subject of water consumption should be given special consideration by our citizens and every effort made to economize in the use of water.

This matter is being brought to the attention of every city and town in the Metropolitan Water District by the Metropolitan Water Board. When a metropolitan supply was under consideration the consumption per inhabitant of the district was 73.3 gallons per day and the works and supply was figured somewhat on that basis, but the use of water has increased to an alarming extent so that in the year 1900 the consumption of water was 112.9 gallons per day for each inhabitant. This increase is doubtless caused to some extent by the belief that the supply is unlimited and the assessment for water is the same regardless of amount used and consumers have been careless in use of water. This unwarranted increase must be checked and meas-

ures are being taken by the State authorities to restrict the use of fixtures and hose or to measure by meter the water delivered to each city or town. If this latter method is adopted it will then be necessary for us to have meters placed on each service so that each one will pay for what he uses. I wish it were possible to educate the citizens to be careful in use of water so that the use of meters would not be required.

If the recommendations of the Governor are carried out this year the assessment for water in the Metropolitan District will be greatly increased to include the whole cost instead of a part of the cost for the year. Under this rule the assessment for Quincy would be in 1901, \$23,845. Under the existing law our assessment for 1901 will be \$13,983. The Metropolitan Water Board made good progress the past year on the storage reservoir on Forbes Hill and it will be completed about August 1st. The stand pipe was erected and filled with water in December and will be cased with granite the coming year. This stand pipe has a capacity of 334,000 gallons and our stand pipe on Penns Hill has a capacity of 411,000 gallons, so that in case of accident to the supply main from Fisher Hill reservoir we have a supply of 745,000 gallons sufficient to last seven hours. When completed the storage reservoir will hold 5,000,000 gallons, giving us nearly three days supply in case of accident. As an additional precaution I would advise the laying of a 10 inch main from Squantum street to Atlantic street, so in case of necessity connection could be made with the City of Boston supply thus giving us ample protection at all times.

At this time we can with perfect safety dismantle our pumping station. I have already sold and delivered to the Fore River Engine Co. the high duty pump and am now making arrangements to dispose of the boilers and fit up the buildings for a work shop.

It will be in the interests of economy to give up our present quarters on leased land and move to the pumping station where we have suitable buildings and ample yard and trackage facilities, a saving of nearly \$400 a year could thus be made.

Special efforts were made to collect old water bills many

of which were a year over due, the indebtedness to the city was thus reduced several thousand dollars.

The receipts from water rates was \$61,975.01 and from service connetions \$16,646.58, making the total gross receipts \$78,621.59.

The total length of pipe laid was 5.32 miles of which 0.36 miles was taken up and relaid on other streets, 1.06 miles was laid on private property for Fore River Engine Co., Granite Railway Co. and the Tubular Rivet & Stud Co. and cannot be classed as city mains. The total length of street mains at the present time is 84.14 miles.

43 new hydrants were set and 7 taken up and reset on different locations making the total number in use 539.

82 new gates were added making total in use 1001.

441 new service connections were made which is the largest number ever put in in a single year.

The total number of service connections is 4330. The number of services to city property is 150 and 150 have been discontinued leaving 4030 services from which a revenue is derived. 122 meters are in use at the present time.

The rule was established this year that no charge be made for water used by the city in its public buildings which reduces the apparent revenue somewhat, but seems just and proper.

The principal work during the year was making the 16-inch connection on Beale street with the metropolitan mains, the laying of a 10-inch main on Central avenue, 10-inch on Washington street, 10 and 12-inch on Coddington street, 6-inch on Federal avenue and making connections of mains in different parts of the city, thus doing away with twenty dead ends where water is liable to get stagnant.

On many streets 2-inch pipe was taken up and larger pipe laid to give better fire protection and house service.

The unused reservcir was thrown open to the public for recreation purposes under proper restrictions, frequent inspection being made to see that city property was not injured.

By a ruling of the City Council the care of the hydrants was placed in charge of the Chief Engineer of the Fire Department.

The coming year a large appropriation will be needed to extend mains in the Ward Two district. The property there bids fair to be developed and built upon and it would be wise policy to lay water pipe in advance of such development and before the streets in that section are permanently improved.

Our maintenance appropriation is much too small and should be increased to provide for additional help and teams made necessary by the enormous increase of 852 water takers in the past two years.

We were fortunate in only having a few small leaks to contend with the past year, repairs on hydrants were, however, quite expensive.

The cost of service connections was \$10,667.65, the amount paid by the city \$4,100.91 and the amount charged to owners was \$6,566.74.

WATER MAINTENANCE.

| | | |
|-------------------------|------------|------------|
| Appropriation | \$8,000 00 | |
| Transfer | 600 00 | |
| | <hr/> | \$8,600 00 |
| Expended | | 8,591 94 |
| | | <hr/> |
| Balance | | \$ 8 06 |

WATER CONSTRUCTION.

| | | |
|--|-------------|-------------|
| Appropriation | \$30,000 00 | |
| Receipts from services and private work | 16,646 58 | |
| | <hr/> | \$46,646 58 |
| Expended | | 45,831 85 |
| | | <hr/> |
| Balance | | \$ 814 73 |

The following tables will show miles of pipe, number and location of hydrants, gates etc., which will prove valuable as a record. A list of stock on hand will be found on file in the office.

In closing this review of my fourth years work as Commissioner of Public Works, I desire to acknowledge my indebtedness to His Honor the Mayor, for the constant, active interest he has taken in this department and for his valuable advice and encouragement; to the members of the City Council for their unfailing courtesy and assistance and to the heads of the different departments for their ready co-operation. I desire also to acknowledge my appreciation of the honest, faithful and conscientious work performed by the several foremen, clerks and employes of the department and for their unswerving loyalty and devotion to the interests of the city.

Respectfully submitted,

CHARLES F. KNOWLTON.

Commissioner of Public Works.

LOCATION OF HYDRANTS SET IN 1900.

- One on Beach street, 350 feet east from Billings road.
- One on Bryant avenue, 500 feet north from Grove street.
- One on Beale street, opposite Hayward street.
- One on Baxter street, 300 feet north from Union street.
- One on Coddington street, opposite Coddington school.
- One on Coddington street, corner of Newcomb street.
- One on Chestnut street, corner Canal street.
- One on Conant street, 415 feet north from West street.
- One on Centre street opposite Totman street.
- One on Central avenue, opposite Grand View avenue.
- One on Central avenue, opposite Winthrop avenue.
- One on Central avenue, opposite Prospect avenue.
- One on Central avenue, opposite Highland avenue
- One on Central avenue opposite Belmont street.
- One on Central avenue, opposite Lincoln avenue.
- One on Central avenue, 475 feet south from Lincoln avenue.
- One on Filbert street, 800 feet south from Private way off Common street.
- One on Filbert street, 400 feet south from Private way off Common street.
- One on Fayette street, at end of pipe.
- One on Federal avenue, 309 feet south from President's avenue.
- One on Federal avenue, 659 feet south from President's avenue.
- One in centre of Granite Railway Co.'s yard.
- One on Hayward place, 203 feet west from Conant street.
- One on Hancock street, at Neponset bridge.
- One on Howard street, near corner of Howard avenue.
- One on Island avenue, 583 feet northwest from Sea avenue.
- One on Intervale street, 253 feet west from Centre street.
- One on Highland avenue, corner Elmwood avenue.
- One on Kemper street, opposite Bass street.
- One on Newbury avenue, 150 feet north from Squantum street.
- One on Miller street, 400 feet east from Cross street.
- One on Summer street, corner Gay street.
- One on Squantum street, opposite Holbrook street.

One on Smith street, near Quarry street line.

One on Walker street, corner Clive street.

One on Woodward avenue, 250 feet northwest from Coddington street.

One on Wesson avenue, 983 feet east from West street.

One on Wesson avenue, 490 feet east from West street.

One on Washington street at Washington school.

One on Washington street, corner Wharf street.

One on Washington street, opposite Chubbuck street.

One on Washington street, opposite South street.

One on Washington street, 200 feet north of South street.

One on Washington street, 700 feet east of South street.

One rear of Forge Mill at Fore River Engine Co. Plant.

One between Forge Mill and Store House at Fore River Engine Co.

One northeast corner of Pattern Shop at Fore River Engine Co.

One southeast corner of Pattern Shop at Fore River Engine Co.

Two at the easterly side of Ship Tool Shop at Fore River Engine Co.

HYDRANTS REMOVED IN 1900.

One on Grand View avenue, corner Central avenue.

One on Howard street, corner Howard avenue.

One on Central avenue, corner Lincoln avenue.

One on Washington street, corner Chubbuck street.

One on Washington street, corner Cleverly Court.

One on Washington street, corner South street.

One on Bicknell street, from Mr. George Saville's driveway.

TOTAL WATER PIPE LAID.

Length in feet and size of pipe laid to December 31, 1900.

ACCEPTED WAYS.

The following is a list of the present accepted ways of the city which has not been published since 1890, and may prove of interest.

Adams, from Hancock Street to Milton line, in Wards 1, 4, 5; 8898 feet long, 45 feet wide.

Adams Place, now Jackson Street, Ward 3.

Alleyne, from Hancock Street to Adams Street, Ward 1; 396 feet long, 33 feet wide.

Appleton, from Squantum Street to Quincy Bay, Ward 6; 1398 feet long, 40 feet wide.

Arlington, from Beale Street to Central Avenue, Ward 5; 1443 feet long, 40 feet wide.

Arnold, from Washington Street to Baxter's Lane, Ward 2; 385 feet long, 34 feet wide.

Atlantic, from Hancock Street to Squantum Street, Ward 6; 3191 feet long, 40 feet wide.

Atlantic Avenue, same as Sagamore Street.

Avon Way, from Whalley Road to Dixwell Avenue, Ward 1; 460 feet long, 40 feet wide.

Arthur Street, from Garfield Street to Buckley Street, Ward 4; 1043 feet long, 40 feet wide.

Bates Avenue, from Grove Street to Willard Street, Ward 4; 2034 feet long, 50-35 feet wide.

Baxter, from Elm Street to Union Street, Ward 2; 755 feet long, 33 feet wide.

Beach, from Hancock Street to Willow Street, Ward 5; 1025 feet long, 50 feet wide.

Beach Street Extension, from Willow Street to Beach line, Ward 5; 2782 feet long, 40-50 feet wide.

Beale, from Adams Street near Milton line to Hancock Street, Ward 5; 6287 feet long, 40-50 feet wide.

Berlin, from Woodbine Street to Capen Street, Ward 5; 940 feet long, 40 feet wide.

Belmont, from Beale Street to Lincoln Avenue, Ward 5; 560 feet long, 40 feet wide.

Bennington, from Independence Avenue to High Street, Ward 3; 1043 feet long, 36 feet wide.

Bicknell, from Palmer Street, Germantown, to Private Way, Ward 1; 823 feet long, 24 feet wide.

Bigelow, from Canal Street to Elm Street, Ward 1; 1005 feet long, 35 feet wide.

Billings, from Private Way off Atlantic Street to Squantum Street, Ward 6; 2445 feet long, 40 feet wide.

Blue Hill, from Randolph line to Milton line, Ward 4; 6930 feet long, 35 feet wide.

- Brackett**, from Canal Street to Brackett's Wharf, Ward 1; 1468 feet long, 33 feet wide.
- Bridge**, from Adams Street to Hancock Street, Ward 1; 570 feet long, 35 feet wide.
- Billings Road**, from O. C. R. R. to West Elm Avenue, Ward 6; 4366 feet long, 66 feet wide.
- Brook Road**, from Liberty Street to Water Street, Ward 3; 1009 feet long, 40 feet wide.
- Butler Road**, from Hancock Street to Putnam Street, Ward 1; 808 feet long, 40 feet wide.
- Brook Street**, from Newport Avenue to Central Avenue, Ward 5; 1780 feet long, 50 feet wide.
- Brooks Avenue**, from Centre Street to Liberty Street, Ward 3; 1656 feet long, 40 feet wide.
- Buckley**, from Copeland Street to Morton Street, Ward 4; 480 feet long, 40 feet wide.
- Botolph**, from Newbury Avenue to Squantum Street, Ward 6; 1038 feet long, 40 feet wide.
- Blake**, from Hancock Street to Marlboro Street, Ward 5; 382 feet long, 40 feet wide.
- Canal**, from Hancock Street to Sea Street, Ward 1; 3580 feet long, 33 feet wide.

- Water Company Lot, right of way over portion of land on Franklin street, Ward 3; 33 feet wide.

Police Department.

To His Honor, the Mayor, of the City of Quincy:

DEAR SIR:—In compliance with the requirements governing the Police Department, I hereby submit this, the twelfth annual report of the department under city government, and under my charge for the year ending December 31, 1900.

The regular force remains the same, no change having been made, and consists of ten men. One is detailed as Inspector and to also enforce Liquor Law. One as night-man at the Lock-Up, one day patrol, and seven night patrol.

The tabulated statement will show the roster of the force. The number of arrests, causes of arrests, disposition of the court, and the miscellaneous work of the department. I am very happy to state that the City has been admirably policed when it is taken into consideration the number on the force and the territory they have to cover, with nothing to do with. No Police Station,—No Signal Service,—No Patrol Wagon,—and what equipments the men have is their own private property.

What regular officers we have are a body of men who are industrious, honest and capable. I do not believe that the Police Force of any other City could show better work under similar circumstances. There are a great many of our best citizens who do not realize what is required of an officer in the performance of his duties. He is expected to patrol his beat day or night in the severest storm and cold, also in the heat of summer, and attend to many duties the public know nothing of. From no other department is there so much expected, and so much encouragement needed from law abiding citizens.

Police Station

Quincy Police Station is simply a Lock-Up and the same old Lock-Up without any change as it was when I was first a constable (and I don't know how long before that) twenty-two years ago. I say without *any* change, perhaps there is an extra rat hole, also somewhat worse for wear. In warm weather it is almost impossible to keep down vermin, and is simply deplorable. Ninety per cent. of horses and cattle kept in our city have better quarters. I have tried to make this plain to some of the City Government by inviting them in to a little smoke talk. The smoke lasted quick, the talk was a look of surprise, the expression on their faces read, "Well, we surely need a Police Station more than we do bath houses."

Situated as the present quarters are, in a cellar, no sunshine, and no ventilation, it cannot be anything but an unhealthy place. Lodgers (or tramps) prisoners, drunk or sober, men, women, children, all are practically in one room where filth and vermin are brought in daily, all breathing the same atmosphere and obliged to listen to the most vile language.

It appears to your Chief of Police that a new Police Station is imperative, and I will recommend that the old High School Building on High School avenue be transferred to the Police Department and made into a Police Headquarters. I believe this to be a good location for several reasons and I would be pleased to explain those reasons to the Committee on Fire and Police or any other Committee at any time. In giving my opinion as to the best location I do not claim it is the best one. It is quite likely that some one else has a better plan, and if so I hope they will bring it out at this time, so that we may all learn the cheapest and most expeditious way, only don't take all summer to bring it out.

Police Signal.

We have no Police Signal, which is as important to Police Department as the Fire Alarm System is to the Fire Depart-

ment. Quite frequently in the past year, we have received telephone messages of teams stolen or strayed, also other happenings where it was necessary to notify Policemen on their routes to be on the watch. We had no way to notify them only to get a team and go and find them. Sometimes through the courtesy of the street car conductors, we have been able to get word to them, but after the cars are done running for the night, then the drivers of stolen teams have it all their own way. As the Police of different cities and towns are dependent on each other for assistance, Quincy should try to render to others as much help as she receives. It would be hard indeed to pay Boston even if we were in the best shape possible for we are under many obligations to them, and I will improve this opportunity in thanking them as well as all other cities and towns who have rendered us assistance.

The cost of a Police Signal Service will be about six thousand dollars, and I will recommend the immediate purchase of same.

Patrol Wagon

We have no Patrol Wagon which is another very important thing to have, to help out the efficiency of a Police Department. Quincy as is well known has many places of resort, picnic grounds etc. that are visited by all classes of people. A great many times during the past summer, word has been sent to the Police Station of a disturbance, and the assistance of the Police wanted immediately, there was no way the Police could get there immediately, and by the time they did get there, everything was quiet and the offenders gone, perhaps to make more trouble elsewhere. When on the other hand if we had a wagon to convey the officer, the offender could have been arrested and punished, or made to understand that picnics could not be run that way in Quincy. As it is now, if any officer makes an arrest, there is no way for him to do but hunt up a team, (and it is a rare thing that one is handy to get, and sometimes impossible to get) or wrestle with his prisoner for two or

three miles to the Station-House. This has happened several times within the past year, and not only valuable time is lost, but the officer with his clothes torn, and injured in many ways, besides being exhausted, has to return to his beat to look after others, and perhaps go through the same performance again.

Increase of Permanent Police

With the large number of citizens that your Chief of Police comes in contact with, he finds the general opinion of these citizens to be, that more Police are necessary, while some think the increase should be three or four times the present number. Your Chief of Police will recommend that six be added to the night force, and one day officer in each Ward. I would be pleased to meet your Honor or the Committee on Police at any time for further explanations.

Houghs Neck District

The Houghs Neck District is wholly unprotected so far as Police Service is concerned. Numerous complaints of larceny and vandalism have come from that place and we have been unable to do but little about it, owing to the distance and time it would take for an officer or officers to get there. It appears to your Chief of Police that something should be done for the property owners of that section of our city in the way of Police protection, and I will recommend that one permanent man at least be appointed for that section the year round. In summer special men will also have to be detailed for duty at that place.

Liquor Law

As in former years, Quincy has voted No-License. The Liquor Officer, together with the rest of the force have worked faithfully to enforce the law, but we all know that it is next to impossible to entirely suppress the illegal sale of intoxicating liquors, yet I feel safe in saying that I believe this City is as

free from Kitchen-Bar-Rooms as any in this Commonwealth. It is surprising to know some of the people that will come to us in behalf of the would-be violators of the liquor law, after we have worked weeks, and I may say months trying to make a conviction and enforce this law, that the people by a large majority have asked us to do. The receipt of anonymous complaints concerning alleged violations of the laws is a source of annoyance. Attention cannot be given to them. If citizens know of evils, they have two proper ways to act they can go to the Courts and make a complaint, or call at this office and state their grievance. Proper action will be taken and prompt attention given them, and the complaint will also be treated confidentially if so desired. It generally happens that anonymous writers seek revenge for private wrongs through the Police Department. It has been my aim to faithfully and impartially enforce this and all other laws as long as I shall have charge of this department.

The following is the Inspectors report for the past ten months :

Liquor report from March 10th to Dec. 31st, 1900.

THOMAS F. FERGUSON,
Inspector

Conclusion

In conclusion I wish to thank everybody for everything they have done to help this department, to the officers for their honest and faithful discharge of their duties, to the several heads of departments for their courteous treatment, to the Honorable Judge, Clerk and Probation Officer of the District Court, I desire to acknowledge my obligations for advice and their many acts of kindness, and to His Honor, Mayor John O. Hall for the gentlemanly and honorable treatment I have always received at his hands.

Very respectfully submitted,

WALTER H. RIPLEY,

Chief of Police

Quincy, Dec. 31st., 1900.

Public Burial Places.

To His Honor, the Mayor of the City of Quincy:

The Managers of Public Burial Places respectfully submit the following report for the year 1900 :

Taking into consideration the amount of work that must necessarily be done each year, to keep our Public Burial Places on a par with other cities of equal size, the results accomplished during the year have been very satisfactory, considering also, the limited amount appropriated for this purpose. Naturally the work of the Department increases, year by year, but unfortunately the appropriation made does not increase at a like ratio. Early in the season it was apparent that something must be done to provide more lots at Mt. Wollaston Cemetery. To do this a larger appropriation was necessary. Realizing the financial condition of the City and the pressing need of economy in every way, the Board decided to ask for \$4,800, which was granted. With this sum the work has been done. Determined at the outset not to overrun its appropriation, by close figuring the Board has been able to accomplish a large amount of work and still leave a balance of its appropriation, although small.

Quite a tract of land at the extreme northerly end of Mt. Wollaston cemetery was filled in and graded, on the lawn plan, providing 83 lots. Some of these are large lots, while others are smaller to meet the demand of those who do not need and cannot afford to pay for a large lot. This work was done at quite an expense. These lots are considered very desirable, and already \$555.00 has been paid into the City Treasury for lots sold in this section. This readily illustrates the fact, that while the City Council annually appropriates a certain amount

for this department, it is nearly self-supporting, as the money paid into the City Treasury on its account during the year for the sale of lots, foundations, care and other work nearly equals the amount appropriated.

Unpaid Bills.

This is a matter that demands attention, and some action is necessary, to prevent the ever increasing number of bills for work, that cannot be collected. While every care is exercised to prevent the contracting of bad bills, the Department finds upon its books, at the end of every year, a number of bills which no amount of dunning will collect. People will come to the Cemetery with tears in their eyes asking that their lot be cared for, promising that the bill will surely be paid in the Fall. When the bill is forwarded, nothing is heard from them and in still other cases, the letter comes back with the postmaster's notice that the parties have removed. There seems to be only one way to remedy this evil, that is to insist that orders for care and other work shall be paid for when the contract is given.

This trouble is not confined wholly to work performed, but to lots sold. In the event of sudden bereavement citizens will purchase a lot, making a small payment, giving their promise that the balance will be paid in a short time. The sadness of grief, in some cases, soon wears off, and month after month, year after year rolls by and the lot still remains unpaid for. Your Board has a number of such cases and to remedy this evil, notice has been given such parties, when their address could be found, that unless payment was made within a specified time the Board should take action and dispose of the lots. It is believed that this will have the desired effect.

Perpetual Care.

The placing of lots under the Perpetual Care System, as it becomes better understood, appeals to lot owners, who see the

wisdom of providing, while they are on earth, for the care, for all time, of their final resting place. As a result the fund held in trust by the City for this purpose is increasing rapidly, and the problem of how best to invest this fund must soon be met. During the past year sixteen lots have been taken under perpetual care, amounting to \$2,550.00. The total number of lots now under perpetual care is 113 and the total fund held for this purpose \$14,925.00. Several other deeds for perpetual care were issued during the latter part of the year. These are now in the office of the City Treasurer, to be delivered when the amount required is deposited.

Opening of Graves.

Owing to the trouble likely to arise, by parties ordering graves opened in lots over which they have no control, and in which they have no legal right for burial, it was found necessary to devise some means to overcome the trouble. This was done by providing an order upon which appears, the name and age of the person to be buried, the lot and the time of burial. This order must be signed by the lot owner and presented to the Superintendent before the grave is opened.

Cemeteries.

The two Cemeteries under the care of this Department are the Hancock and Mt. Wollaston.

Of the former but little can be said. It has received as much care as the Board has been able to give it. Four burials were made here during the year 1900, and of these, two were placed in tombs. It is a difficult problem to decide just what should be done with this cemetery. What money is now expended here is taken from the general fund, and could be used to a much better advantage at Mt. Wollaston. Situated however in the heart of the City it seems as though a special appropriation, aside from the regular appropriation of the Depart-

ment, should be made each year for the care of this cemetery. It is the resting place of many of Quincy's illustrious families and is visited by hundreds of strangers every year who wander about, examining the old tablets whose inscriptions age has almost erased. There is no hope of ever receiving anything from the lot owners for care, and even if there was, it would be a difficult task to define the boundary lines of the lots. Therefore a special appropriation is recommended for the care of this cemetery.

Mount Wollaston.

It is with a sense of gratification that your Board calls attention to this beautiful spot. The old-time cemetery was often a dismal place, and was called the abode of the dead. A place where departed spirits were supposed to be seen, walking about, enveloped in a white shroud, at the lonely hour of midnight. Not only was death brought to mind, upon entering the gates, by tumbled down, moss covered marble headstones, but nature was forced to make the general atmosphere still more gloomy. The forms of vegetation considered suitable for such places were dark pines, cypress and weeping trees. No care was given lots, other than the occasional mowing of grass, and moss and weeds were allowed to grow unrestrained. It certainly was the abode of the dead in every sense of the word.

How different is a modern cemetery like Mt. Wollaston. Old ideas have been revolutionized. Graceful curved lines have taken the place of the straight lines, for the curved line is a line of beauty. The weeping trees have become a thing of the past and statuary, monuments and other features added. Little plots have been laid out, where possible, and the colors, in the shape of flowers, give the whole more of an appearance of a park garden than a cemetery.

That is what Mt. Wollaston is fast becoming. Time is required to accomplish this. Not only time but a superintendent who has a natural taste for the beautiful and has combined with that taste, the skill and will to carry it out. Such a superintendent

your Board believes it has in James Nicol, who has done much to bring Mt. Wollaston Cemetery where it is today.

During the year past the idea of increasing the number of lots upon the lawn plan has been extended and twenty-seven have been regraded. In fact we may say, all have been regraded that was possible with the appropriation made. Many orders have been received that could not be undertaken this year, but will be as fast as possible. The only other important work undertaken during the year was the regrading of a new section on the northerly side, of which mention has been made elsewhere.

Just what will be done with the Sea street side of the cemetery remains for the City Council to decide. When that street was relocated it left this part of the cemetery, as far as looks are concerned, in bad shape. It is hoped that the proper authorities will take some action in the near future. It is a question as to just what should be done, but in any event your Board believes that the main entrance should be left as it is at present.

A detailed statement of the expenditures of this Department will be found in the report of the City Auditor.

Statistics.

| | | | | | | |
|--------------------------------|---|---|---|---|---|-----|
| Whole number of lots cared for | . | . | . | . | . | 573 |
| By yearly contrats | . | . | . | . | . | 460 |
| By Perpetual Care | . | . | . | . | . | 113 |

There have been 226 burials in the two cemeteries during the year 1900, as follows:

At Mt. Wollaston :—Adults, 123 ; under 21 years, 99. Died in other places :—Adults, 50 ; under 21 years, 14.

Hancock cemetery :—Adults, 4.

Removals, Mt. Wollaston cemetery, 4.

Solicitor's Report.

To His Honor the Mayor, of the City of Quincy :—

I herewith submit my report as City Solicitor of Quincy for the year ending December 31, 1900.

This department, I believe, has, during the year 1900, been more busy than usual,—the Metropolitan hearings accounting for a great deal of the excess work. During the last year the commission appointed by the Supreme Judicial Court to assess the cities and towns within the Metropolitan District as is provided by the Metropolitan Sewer Acts, held their hearings at the State House, Boston, at which the claims of the City of Quincy were presented and considered ; there were some four or five different hearings which required considerable preparation. During the year also a similiar commission appointed by the Supreme Judicial Court held hearings relative to the apportionment of the assessments for the Metropolitan Parks District :—while neither of the assessments were especially favorable to Quincy they were not such as would bring any relief to the city had the cases been taken to the Supreme Judicial Court on appeal.

There have been also before the legislature an amendment to the charter relative to the appointments of assessors ; the act granting to the Park Commissioners of Quincy special privileges as to locating the bath house on the Ward 2 playground ; legislation as to the bridge at Quincy Point and legislation granting our sewer commission the right of using the receipts for the purposes of construction after the payment of charges for maintenance, operation, interest and the debt falling due.

The usual number of claims against the city growing out of injuries sustained by travelers on the highway etc. have been made against the city, some of which have been adjusted and others pending adjustment or awaiting trial.

The most important piece of litigation has been the hearing before the Auditor in the matter of the claim of John Sheehan & Company against the City of Quincy growing out of the construction of the sewer from the pumping station through Merrymount park along Hancock street to Woodbine street. The contractors in their suit set up a claim of some \$18,000. alleging that on account of the negligence of the city they were put to this extra expense in the prosecution of their work. The matter by agreement of counsel was referred to an Auditor and some sixteen or more hearings have been held from time to time relative to the case. The hearing is now terminated, the arguments made and the case is under consideration by the Auditor. In as much as the case is not finally decided it is not best that I should publicly express my opinion as to the merits of the case.

A matter which may be considered by the citizens as an important decision was rendered by the County Commissioners in the matter of the appeal of Wood, Harmon & Company from the decision of our Board of Assessors in refusing to abate the petitioners' taxes upon land situated in Wollaston park. After a hearing before the County Commissioners the decision was made that the assessment made by the assessors was just and reasonable and was a fair selling price of the land, although the claim was made by the petitioners that they were assessed a third more than the actual fair selling price of the property.

Under an order of the city council a hearing in the matter of inquiring into the prices charged by the local Gas Company was held before the Board of Gas and Electric Light Commissioners. This hearing, although held some months ago, is for some reason yet undecided by the commissioners; a decision is expected any moment.

During the year I have been in daily attendance at City

hall and I have attended nearly every meeting of the city council and have endeavored to assist, as far as I could, the departments and officials in such matters as might be within my province.

Respectfully submitted,

RUSSELL A. SEARS,

City Solicitor.

Report of Assessors.

Hon. John O. Hall, Mayor, City of Quincy :

The Board of Assessors herewith submit their annual report for the year 1900.

Warrants and appropriations for the assessment of taxes in the City of Quincy for the financial year commencing January 1, 1900, were received by the Board of Assessors as follows :

| | |
|--|-------------|
| A State warrant for the proportion of the City of Quincy, of a state tax of \$1,500,000.00 as fixed by chapter 441 of the Acts of 1900, amounting to | \$10,005 00 |
|--|-------------|

| | |
|---|-----------|
| A County warrant for the proportion of the City of Quincy, of a county tax of \$165,000.00 amounting to | 16,377 23 |
|---|-----------|

| | |
|---|-----------|
| In accordance with the provisions of Chap. 488 of the Acts of the year 1895, we have been assessed as our proportion a Metropolitan Water tax for the year 1900, amounting to | 11,271 59 |
|---|-----------|

Also under the provision of Chapter 406 of the Acts of 1895. "An Act to provide for a system of sewerage disposal for the Neponset River Valley," and of Chap. 424 of the Acts of the year 1899, entitled "An Act to provide for the construction of a High-Level Gravity Sewer for the relief of the Charles and

| | |
|---|--------------|
| Neponset River Valleys." We have been assessed as our proportion . . . | 11,917 40 |
| Appropriations by the City Council for the current expenses | 270,808 00 |
| Debts and interest | 122,998 93 |
| <hr/> | |
| Aggregates of amounts committed to the Board of Assessors | \$443,378 15 |
| Sixty-four hundred and nine polls were re- corded for assessment and included in the estimate that determined the rate of taxation for the current year, amounting to | \$12,818 00 |
| (Under the operation of the law, pro- viding for the supplementary assessment of ommitted male persons, liable to assessment under the provisions of Section 20, Chapter 548 the Acts of the year 1898, there were added to the list 165 polls, making the number of polls assessed 6,574.) | |
| Also the amount of estimated receipts law- fully applicable to the payment of the expenditures of the year as provided in Chapter II, Section 34 were deduc- ted representing | \$67,395 00 |
| To which was added as provided in Chap- ter II, Section 49 for overlay amount- ing to | 4,828 64+ |

Valuation.

The valuation of the City May 1, 1900, as determined by the Assessors and upon which the rate of taxation was levied is as follows:

| | |
|------------------------------|-----------------|
| Value of land | \$8,826,600 00 |
| Value of buildings | 8,963,400 00 |
| <hr/> | |
| | \$17,790,000 00 |

| | |
|---|-----------------|
| Exemption as provided in Chapter II, as amended by the Acts of 1885, Chapter 169 | 72,225 00 |
| Total Valuation of Real Estate subject to taxation, | \$17,717,775 00 |
| Valuation of personal property, other than bank stock separately assessed | \$2,321,475 00 |
| Value of shares of National Banks located in and taxable in the City of Quincy | 179,901 00 |
| <hr/> | |
| Total Valuation of personal sonal estate | \$2,501,376 00 |
| <hr/> | |
| Total Valuation | \$20,219,151 00 |
| Tax Rate | \$18 20 |
| Taxes Levied | 380,811 79+ |
| The Valuation was also increased by assessments, under the provisions of Section 78, of Chapter II, of the Public Statutes, as amended by Chapter 362 of the Acts of 1888 | 63,305 00 |
| The total valuation of the City upon which taxes were assessed for the year 1900, when all assessments were made was | \$20,282,456 00 |
| A net gain over 1899 Valuation of | 597,479 00 |

Property Exempt From Taxation.

| | |
|---|-------------|
| Literary | \$81,600 00 |
| Benevolent | 654,177 00 |
| Religious | 334,025 00 |
| Commonwealth of Massachusetts: | |
| Takings of 1894 about | 75,000 00 |
| Takings of 1900 preceding May 1st | 16,892 00 |

| | |
|---|------------------------|
| City of Quincy Real Estate and Fire apparatus | 938,113 00 |
| The total number of persons assessed in the City of Quincy for the year 1900, | |
| Property | 5,545 |
| Poll tax only | 5,357 |
| Number of horses assessed | 1,308 |
| Number of cows and neat cattle assessed | 674 |
| Number of dwelling houses assessed | 4,404 |
| Number of acres of land assessed | 6,448 $\frac{71}{100}$ |

A sewer system having been installed in the City of Quincy, in the apportionment of its cost, the act provides the Board of Sewerage Commissioners, shall upon the written request of any such owner, made within three months from date of bill apportion such assessment into such number of equal parts or installments, not exceeding ten, as said owners shall state in said request, and they shall certify such apportionment to the Assessors.

Interest from the date of said apportionment at the rate of 5% per annum shall be added to each of said assessments or charges until they are paid, and one of said parts shall be added by the Assessors to the annual tax on such estates for each year, next ensuing, until all said parts have been so added, unless sooner paid as hereinafter provided.

Eight hundred and five apportioned sewer assessments, in conformity with the above requirements as quoted, have been forwarded to this office by said Board of Sewerage Commissioners.

A ledger account has been opened in each individual case, and one of the divisions into which the assessment was apportioned with the interest charge as the act provides, have been assessed and added to the tax bill of the property owners affected thereby, which will be continued and added to the annual tax bill until the expiration of the assessment period. The act further provides, however, nothing shall be construed to prevent the payment at any time in one payment, notwithstanding its prior apportionment.

In the house sewer connection with main sewer, there has been forwarded to this office four hundred and twenty individual accounts from the Sewerage Commissioners; the same method of book-keeping of these accounts has been applied as in main sewer apportionment accounts, and as the act provides the assessment may be divided into not less than three nor more than five equal parts.

Such divisions as petitioned for by the property owner to the Board of Assessors (they having authority to apportion same) having been made, the annual part with the interest on the total assessment from the thirtieth day after the completion of said connection to the first day of November, has been added to the annual tax bill of the property owners affected thereby, such annual part with interest on unpaid principal then due, will be continued during the assessment period unless sooner paid.

The sidewalk apportionments as authorized by order of the City Council have also been entered and kept in ledger form, in similar manner to sewer apportionments. The apportioned part with accrued interest being added to the tax bill of the property owner affected thereby.

During the present year a departure has been made in the clerical manner of entering assessments, discarding the street books and substituting instead the card system, so called. As the system at present is only partially installed, a considerable amount of additional work yet being needed to perfect it, all the benefits expected to be derived from this system, when once complete, are not yet fully apparent. It is intended with a double set of cards, (the life of the card being ten years, with ready comparison during said period.) One set arranged alphabetically by owners names and permanently remaining in the office, the other set being in a geographical order for use in the field, one will be a check upon the other, and obviate the probability of omissions. Furthermore an arrangement of this character in the one case readily locates property, the owner's name being given, contrariwise the ownership of property in the absence of the name, location being given. The State valuation books heretofore kept as ward books, are now under this

system irrespective of location of property entered alphabetically in owners' names, with all the designations such as ward number, street etc., being given, making matters as plain as possible to the public.

The itemizing of tax bills as ordered by the City Council has become a matter of considerable magnitude requiring, we would estimate the undivided attention of about two months time of a clerk with the probability as the matter becomes more general requiring more time.

Therefore, in view of the very much increased clerical work required as under the several matters enumerated, all of which have come into existence the present year, the Board for the ensuing year requires the additional service of a permanent clerk, as the work of the office cannot be performed without it.

An engineer's survey of the entire City for the information of the Board of Assessors is an immediate and pressing necessity. With a complete survey, by section, block and lot in existence the numerous transfers in ownership can be readily noted upon them with very slight expense, and with amended plans by the Engineer, will be accurate, continuous and up to date. We hope this matter may be commenced at once, and as speedily pushed to completion as possible.

This being a record office the value of which is incalculable and could not be replaced without a large expenditure, if at all. The preservation and safety of the records requires no comment. The deficiency existing in this office for such provisions is so apparent, additional safe or vault room is required, and we hope steps may be taken to provide the same.

Assessors.

Tax Collector's Report.

To His Honor the Mayor of the City of Quincy:

I have the honor to submit the following report for the year ending December 31, 1900.

The amount of cash collected on the tax for the various years is as follows :

Tax of 1894.

| | | |
|---------------------------------|--------|--------|
| Amount collected of Taxes . . . | \$9 00 | |
| Total | ————— | \$9 00 |

Tax of 1895.

| | | |
|---------------------------------|----------|----------|
| Amount collected of taxes . . . | \$361 20 | |
| Interest | 89 50 | |
| Street Sprinkling | 13 34 | |
| Total | ————— | \$464 04 |

Tax of 1896.

| | | |
|---------------------------------|----------|----------|

A. LINCOLN BAKER,
Collector.

Report of Inspector of Milk.

To His Honor the Mayor of the City of Quincy:

I respectfully submit the following as the report of the Inspector of Milk for the year ending December thirty-first, 1900.

The receipts of the office have been twenty-six dollars (\$26.) and this sum has been duly turned over to the City Treasurer.

I have issued forty-three licenses to milk peddlers, and nine dealers in milk have been registered in the office. There are one hundred and thirty persons and firms now registered in the books of the Inspector of Milk.

I again add to my report the City Ordinance relating to the sale of milk.

City Ordinance, No. 21, Sec. 3.—“Every person who conveys milk in carriages or otherwise, for the purpose of selling the same in the city, shall annually in the month of May, be licensed by the Inspector in accordance with the provisions and subject to the penalties of the Public Statutes, to sell milk within the limits of the city, and shall pay to the Inspector fifty cents for the use of the city.

“Every person who sells milk or offers it for sale in any store, booth, stand or market place in the city shall register in the books of the Inspector and shall pay him fifty cents to the use of the city.”

Chapter 398, Section 2, of the Acts of 1896, provides a legal standard of milk as follows:

“Section 9 of chapter fifty-seven of the Public Statutes, as amended by section six of chapter three hundred and fifty-two

of the Acts of the year eighteen hundred and eighty-five, and by section two of chapter three hundred and eighteen of the Acts of the year eighteen hundred and eighty-six, is hereby amended by striking out all of said section, and inserting in place thereof the following: Section 9—In all prosecutions under this chapter, if the milk is shown upon analysis to contain less than thirteen per cent. of milk solids or to contain less than nine and three-tenths per cent. of milk solids exclusive of fat, or to contain less than three and seven-tenths per cent. of fat, it shall be deemed for the purposes of this Act to be not of good standard quality, except during the months of April, May, June, July and August, when the milk containing less than twelve per cent. of milk solids or less than nine per cent. of milk solids exclusive of fat, or less than three per cent. of fat shall be deemed to be not of good standard quality.”

Chapter 300 of the Acts of 1900 provides for the following penalties for the sale of adulterated milk:

Section 1. Section five of chapter fifty-seven of the Public Statutes, as amended by section two of chapter three hundred and eighteen of the Acts of the year eighteen hundred and eighty-six, is hereby further amended by striking out the whole of said section and inserting in place thereof the following:—Section 5. Whoever by himself or by his servant or agent, or as the servant or agent of another person, sells, exchanges, or delivers, or has in his custody or possession with intent to sell or exchange, or exposes or offers for sale or exchange, adulterated milk, or milk to which water or any foreign substance has been added, or milk produced from cows fed on the refuse of distilleries, or from sick or diseased cows, or, as pure milk, milk from which the cream or any part thereof has been removed, shall for a first offence be punished by fine of not less than fifty nor more than two hundred dollars; for a second offence by fine of not less than one hundred nor more than three hundred dollars; and for a subsequent offence by a fine of fifty dollars and by imprisonment in the house of correction for not less than sixty nor more than ninety days.

Section 2. Section six of chapter fifty-seven of the Public Statutes is hereby amended by striking out the whole of said section and inserting in place thereof the following: Section 6. Whoever by himself or by his servant or agent, or as the servant or agent of any other person, sells, exchanges, or delivers, or has in his custody or possession with intent to sell or exchange milk not of good standard quality, shall for a first of-

fence be punished by fine not exceeding fifty dollars ; for a second offence by fine of not less than one hundred dollars nor more than two hundred dollars ; and for a subsequent offence by fine of fifty dollars and by imprisonment in the house of correction for not less than sixty nor more than ninety days. (Approved May 8, 1900.)

Chapter 369 of the Acts of 1900 relates to the sealing of cans and bottles used in the sale of milk and is as follows :

Section 1. Cans, bottles and other receptacles used for the distribution of milk or cream to the consumer shall be sealed as measures, under the provisions of section twelve of chapter sixty-five of the Public Statutes ; and no fee shall be charged or received for sealing the same.

Section 2. This Act shall take effect in cities on the thirty-first day of December of the current year, and in towns on the first day of March in the year nineteen hundred and one. (Approved June 6, 1900).

Respectfully,

HENRY C. HALLOWELL, M. D.,

Inspector of Milk.

Board of Health.

To His Honor, the Mayor, of the City of Quincy:

The Board of Health respectfully submits the following report for the year ending December 31, 1900.

The following has been the organization of the Board for the past year: John S. Gay, Chairman; Thomas J. Dion, M. D. Secretary; C. Wendall Garey, M. D.

The past year has brought an increasing amount of labor in the various branches of this department. Thus, the progress of the public sewer system in our city, the ever increasing difficulties attending the collection of garbage, the large number of disinfections after disease, together with the introduction of improved and more thorough methods in accordance with the requirements of modern public hygiene, have contributed in a large measure to this increase. It has been our aim to protect and safeguard the health of the city through the enactment of Regulations and Ordinances, the enforcement of which has given satisfactory results.

Contagious Diseases.

In accordance with Regulation 11 of "Ordinances and Regulations" of the Board of Health, imposing upon physicians or householders the obligation of reporting to this Board all cases of diseases dangerous to the public health, the following cases of contagious diseases have been reported to us in the past year.

Contagious Diseases Reported During Year, by Wards :

| | Diphtheria | Scarlet Fever | Typhoid Fever | Measles | Cerebo Spinal Meningitis |
|---------|------------|---------------|---------------|---------|-----------------------------|
| Ward 1 | 21 | 7 | 6 | 11 | |
| Ward 2 | 24 | 2 | 6 | 2 | |
| Ward 3 | 18 | 7 | 6 | 1 | |
| Ward 4 | 139 | 1 | 10 | 6 | 2 |
| Ward 5 | 20 | 13 | 9 | 3 | 1 |
| Ward 6 | 2 | 9 | 3 | 2 | |
| | — | — | — | — | — |
| Totals, | 224 | 39 | 40 | 25 | 3 |
| Deaths, | 17 | 0 | 4 | 1 | 3 |

Contagious Diseases Reported during year, by months :

| | Diphtheria | Scarlet Fever | Typhoid Fever | Measles | Cerebo Spinal Meningitis |
|------------|------------|---------------|---------------|---------|-----------------------------|
| January, | 10 | 4 | 1 | 1 | |
| February, | 6 | 7 | 2 | 2 | |
| March, | 18 | 8 | 0 | 2 | |
| April, | 31 | 6 | 1 | 4 | |
| May, | 32 | 4 | 1 | 0 | |
| June, | 18 | 3 | 1 | 5 | 3 |
| July, | 9 | 2 | 2 | 2 | |
| August, | 6 | 0 | 7 | 6 | |
| September, | 14 | 1 | 7 | 0 | |
| October, | 18 | 1 | 11 | 0 | |
| November, | 42 | 1 | 7 | 0 | |
| December, | 20 | 2 | 0 | 3 | |
| | — | — | — | — | — |
| Total, | 224 | 39 | 40 | 25 | 3 |

After diphtheria and scarlet fever and upon notice from the attending physician, of death, or recovery of the patient, apartments are disinfected in the following manner :— a 4 per cent. solution of Formaldehyde is evaporated through a regenerator, twenty ounces of the solution being used to each 1000 cubic feet, the rooms having previously been made tight by the use of gum paper laid over all crevices of doors and

windows in order to prevent the escape of the gas. The room is then allowed to remain closed five hours, at the end of which time, disinfection is complete. Disinfection is also made after removal or death from consumption, upon request of the attending physician or the family.

Owing to the prevalence of diphtheria in the Willard School district, on April the 24th, it was voted to close the building, to have every room disinfected as well as books, all pencils to be burned. On May the 21st the epidemic having subsided it was voted to reopen the school. Upon our recommendation the building was subsequently connected with the public sewer.

This Board has dispensed through Mr. C. C. Hearn, to the physicians of Quincy, 276 bottles of State Board of Health, Diphtheria Antitoxine and 85 culture tubes for diagnostic purposes, without charge to either physician or patient. In connection with the marked advancement in the prevention of diseases and in public hygiene, the following from an editorial of "the Boston Medical and Surgical Journal" commenting upon the progresses in medicine, in the ending century, is not without interest.

"One of the great changes which has taken place is in our knowledge of the causation of disease. Not only do we refer many diseases to their origin in germ growth, but this discovery has helped to foster an entirely new variety of medical practice. Preventive medicine was practically unknown one hundred years ago. Our boards of health would probably at that time have been looked upon as meddlers with the individual rights of the profession. Today they are considered not only most important helpers in the prevention, but also in the treatment, of disease.

With the science of the prevention of disease has come in a whole series of new weapons with which to fight it, in the form of disinfectants. Some of these materials were used earlier, but in an uncertain, tentative manner, whereas now we realize more exactly how to use them and how much they may be expected to accomplish. The fires which our ancestors used to burn in the streets to dispel the plague we still use for disinfection, but in a more orderly and usually a less destructive manner."

It is the opinion of this board that the adoption of a system of medical examination of school children would result in the decrease of contagious diseases among our school population, as the school offers most favorable conditions to contagion, and we earnestly recommend an appropriation to that end.

Public Hearings

Two public hearings have been held in the course of the year. In May, on charges preferred against Inspector of Plumbing J. J. Keniley. Complainant asked for an investigation which the Board did not see fit to grant. Upon refusal of complainant to produce evidence, he was given leave to withdraw and charges laid on the table.

In July, upon complaint of residents of Ward 6, of an open ditch on private land, after both, a personal investigation and a public hearing, given in accordance with Chapter 80, Public Statutes, where petitioners and remonstrants appeared, we recommended the abatement of nuisance above referred to, but the Council voted an appropriation of \$2,000 00 for improvement of Teal pond, ignoring the recommendation of this board and allowing the unsanitary condition resulting from this ditch, to remain.

Garbage

The collection of garbage is now done by two teams, twice each week in winter and three times in summer. Four men are employed, two on each cart and 1630 houses are being collected from.

In March, advertisements for bids, for the collection of garbage in the city, were published in the Quincy papers. Eight bids ranging from \$6,000.00 to \$10,500 were submitted. It was thought to the best advantage of the city to have the present system of collection continued. Therefore, all bids were rejected.

Dumps

Three locations are now in use for disposal of rubbish and refuse free from animal and vegetable substances. In ward 1, in ward 5 and in ward 6.

Several charges against plumbers and owners of buildings have been made to us by the Inspector of plumbing, for violation of plumbing Acts and Ordinances, resulting in three arrests.

The following licenses have been issued in the past year:

| | |
|----------------------|----|
| Plumbers Licenses, | 56 |
| Garbage Licenses, | 39 |
| Undertaker Licenses, | 5 |
| Scavenger Licenses, | 1 |

Owing to the increase of duties falling upon the Inspector of this board, whose working hours are limited only by the labor to be performed, we recommended an increase to his salary, which is now \$600.00 yearly.

The present location of the office of the Board of Health, for obvious reasons, has become totally unfit to that purpose. The number of occupants, Inspector of the board, Inspector of plumbing, City Messenger, Secretary of the board, is certainly out of proportion to the size of the room, which lacks both proper ventilation and light; and again the location of same renders it most improper for the transaction of any business of a private character. Better accommodation in the shape of a new location for this office, should certainly result in great advantage to both the public and the members of the board.

Deaths and Causes, by Sexes, Ages and Months.

| | |
|--|-----|
| Total number of deaths from all causes, exclusive of still-births, | 345 |
| Number of still-births, | 25 |

DEATHS BY SEXES. (Still-births Excluded)

| | |
|------------------------------|-----|
| Number of deaths of males, | 168 |
| Number of deaths of females, | 177 |

EDWARD J. LENNON,

Sanitary Inspector.

GENTLEMEN:—I submit the following report in regard to the brooks and water-courses that were cleaned this year under my direction:

Town brook from Washington to Patch's ice pond on Columbia street; also the water course from Town brook to and across Elm street to Glencoe place to and across Quincy avenue east of Water street, across the last street to and across Phipps street to Hammond place; also the water course from Water street through land of H. H. Faxon to Phipps street; also water course from Town brook through land formerly of George L.

Baxter to and across Water street to and along east side of Brook road to junction of Nightingale avenue through land, owner unknown to junction with Town brook. Furnace brook from the Butler mansion to private way leading from Willard street to Robert Teasdale's, West Quincy; also the water course leading from Bates avenue to Willard, thence on east side of the last named street to covered culvert about opposite M. J. Mannex granite works, also from Roger street, through the land of several persons to brook leading from East Milton to Furnace brook, near playground in Ward 4; also the water course from Town brook to the shops of Tirrell & Sons; also the water course from Squantum street, through the land of several persons unknown, to Pond hole near Central avenue and Arlington street.

Yours respectfully,

EDWARD J. LENNON.

SUPPLEMENT.

Water course from Town brook, commencing near T. W. Smith's shop through land of Williams to and across Granite street to south side of Copeland through land of Miss Barllett Nightingale to premises of John Evans.

E. J. L.

ANIMALS AND PROVISIONS

To the Board of Health, of the City of Quincy:

I herewith render you my report as inspector of Meats and Provisions for the year ending Dec. 31, 1900.

| | |
|-----------------------------|-----|
| Number of inspections made, | 567 |
| Licenses granted. | 20 |

Yours respectfully,

R. T. JOHNSON.

EXAMINERS OF PLUMBERS

To the Board of Health, of the City of Quincy:

GENTLEMEN:—The board of Examiners of Plumbers beg leave to make the following report:

Two examinations were held by the board during the year one June 4th and one November 12, 1900. There were seven applicants for examinations, five for a Journeyman's and two for a Master's license. Three passed the Journeyman's examination and two the Master's examination successfully and were granted licenses, the remaining two, both taking the Journeyman's, were rejected they having failed to pass.

It was found upon trial this year, that the system of having a separate set of questions for the Journeyman and Master's examination was a success as both applicants for a Master's license passed a very satisfactory examination thereby entitling them to a Master's license. The board wishes to take this opportunity to again recommend to the Board of Health, that a set of plans be made, showing a system of defective plumbing, thereby enabling the applicant to show his skill, by pointing out the defects and showing how they should be corrected.

Respectfully submitted,

WM. A. BRADFORD,

Secretary of the Board of Examiners.

INSPECTOR OF PLUMBING

To John S. Gay, Esq., Chairman of Board of Health:

DEAR SIR,—I herewith tender my seventh annual report as Inspector of Plumbing for the year ending December 31, 1900. During the year the following matters have been attended to:

| | | | | | | |
|----------------------------------|---|---|---|---|---|-------------|
| Connections to public sewer, | . | . | . | . | . | 199 |
| Dwelling houses inspected | . | . | . | . | . | 346 |
| Churches | " | . | . | . | . | 1 |
| Factories | " | . | . | . | . | 1 |
| Halls | " | . | . | . | . | 1 |
| Hotels | " | . | . | . | . | 4 |
| Laundries | " | . | . | . | . | 2 |
| Stables | " | . | . | . | . | 2 |
| Stores | " | . | . | . | . | 12 |
| Restaurants | " | . | . | . | . | 1 |
| Blocks | " | . | . | . | . | 2 |
| Fire stations | " | . | . | . | . | 3 |
| Offices | " | . | . | . | . | 11 |
| Depots | " | . | . | . | . | 3 |
| Bath houses | " | . | . | . | . | 1 |
| Number of Cesspool connections | . | . | . | . | . | 175 |
| Aggregate estimated value | . | . | . | . | . | \$51,550 00 |
| " " " 1899 | . | . | . | . | . | 61,000 00 |
| Decrease from 1899 | . | . | . | . | . | 9,450 00 |
| Number of permits issued in 1900 | . | . | . | . | . | 414 |
| " " " 1899 | . | . | . | . | . | 432 |
| Decreased from 1899 | . | . | . | . | . | 18 |

During the year a number of complaints have been made to your Honorable Board, by your Inspector of violations of the Plumbing Ordinance. In each case, with two exceptions, the parties transgressing have conformed to the Ordinance on being notified to do so by your Honorable Board. In each case a warrant was issued on one of which a conviction was secured and the case placed on file. The other is still pending.

Respectfully submitted,

J. J. KENILEY,

Inspector of Plumbing.

Report of Overseer of the Poor

To His Honor the Mayor, of the City of Quincy :

The appropriation for this department for the year 1900 was \$13,000, and was sufficient to allow the payment of all bills presented before the close of the financial year, and as endeavors were made to have all bills rendered before December 31st. there will be but a comparatively small amount to be provided for by transfer during the incoming year.

The amount paid to the Quincy City Hospital was \$1,736.87 of which \$628.36 was from the appropriation for the current year, and \$1,108.51 was provided for by the Council on account of 1899.

The collections for the year were \$2,042.92 of which \$1,074.03 was from the State, \$736.01 from other cities and towns, and \$232.88 from other sources.

Of the total appropriation of \$13,000, the amount expended December 31st, 1900 was \$12,904.38 of which \$10,273.64 was for outside poor including \$5,875.48 for patients in the Insane and other hospitals; and \$2,630.74 for the Almshouse.

Continued progress has been made in grading the Almshouse property by Supt. Jacobs during the past year, but in consequence of the relocating of Sea street much additional work should be done and it is hoped that the Council will adopt some comprehensive plan to make this piece of property creditable to the city.

| | | |
|---|------------|---------------|
| Appropriation | | \$13,000 00 |
| Expended outside direct | \$7,732 05 | |
| Expended outside from Almshouse | 2,541 59 | |

Report of City Engineer.

To His Honor, the Mayor, of the City of Quincy:—

SIR:—In compliance with the ordinance establishing the office of City Engineer, I herewith submit the first annual report of this department for the year 1900 :

Financial Statement :

| | | |
|---|------------|---------------|
| Appropriation | | \$2,400 00 |
| Salary of Assistants | \$1,629 58 | |
| Office Fittings | 80 14 | |
| Office Supplies and Instruments | 404 16 | |
| Office Rent | 90 50 | |
| Lighting | 7 00 | |
| Telephone | 4 40 | |
| Postage, expressage and car fares | 99 55 | |
| Typewriting | 4 75 | |
| | <hr/> | 2,320 08 |
| Balance | | <hr/> \$79 92 |

Through the kindness of the Sewerage Commissioners this department was allowed the use of their engineering office and tools from February until June, when we rented our present office in the Adams Building. This department is still indebted to the Sewerage Commissioners for the use of two drafting tables, transit and other tools.

**List of Plans Made During the Year, Exclusive of
Street Numbering Plans.**

Plan of South st from Elm st to Washington st.

- “ Rawson road from Beach st to Billings road.
(For sidewalk order)
- “ Billings road from N Y, N H & H R R to Rawson road
(For sidewalk order)
- “ Chestnut street, (For sidewalk order)
- “ Bigelow street, (For sidewalk order)
- “ Copeland st from Crescent st to Willard st.
(For record at Dedham)
- “ Copeland st from Crescent st to Willard st.
(For file in this office)
- “ Portion of Quincy ave to accompany petition to State
Highway Commission.
- “ Squantum st from Hancock st to Atlantic st for widening
- “ Marlboro st from Waterston av to Blake st for acceptance
- “ Marlboro st from Waterston ave to Blake st.
(For record at Dedham)
- “ Marlboro st from Waterston ave to Blake st.
(For file in this office)
- “ Warren ave from Old Colony ave to R R, for acceptance
- “ Warren ave from Old Colony ave to R R, for record.
- “ Warren ave for overhead bridge.
- “ Botolph st from Squantum st to Newbury ave.
(For sidewalk order.
- “ Clive st from Botolph st to Walker st.
(for sidewalk order)
- “ Chubbuck st extension from South st to DesMoines rd.
(For laying out)
- “ Chubbuck st extension from South st to DesMoines rd.
(For record at Dedham)
- “ Chubbuck st extension from South st to DesMoines rd.
(For file in this office)
- “ Howard st corner of Howard ave for land given by
Fore River Engine Co.

- “ Kendrick ave for Commissioner of Public Works.
- “ Beale st from Hancock st to Adams st for street water-
ing.
- “ DesMoines rd from Howard st to South st for laying out
- “ DesMoines road from Howard st to South st.
(For record at Dedham)
- “ DesMoines road from Howard st to South st.
(For file in this office)
- “ Phillips st from Elm ave to Willet st for acceptance.
- “ Edwin st from Faxon rd about 405 ft westerly, for
acceptance.
- “ Edwin st from Faxon road about 405 ft. westerly.
(For record at Dedham)
- “ Edwin st from Faxon road about 405 ft, westerly.
(For file in this office)
- “ Clark st from Edwin st to Squantum st., for acceptance.
- “ Clark st from Edwin st to Squantum st.
(For Record at Dedham)
- “ Clark st. from Edwin st. to Squantum st.
(For file in this office.
- “ Rodman st from Brooks ave to Centre st.
(For edgestone order)
- “ Blake street (For record at Dedham)
- “ Blake street (For file in this office.)
- “ Taylor st from Brook st to Beale street, for drain.
- “ Belmont street from South Central ave to Lincoln ave.
(For acceptance)
- “ Upland road from Saville st to Dimmock st.
(For record at Dedham)
- “ Upland road from Saville st to Dimmock st.
(For file in this office.)
- “ Intervale st from Centre st to Brooks road.
- “ Intervale st from Centre st to Brooks rd.
(For file in this office.)
- “ Real estate City of Quincy exchange with Louis Gross-
man.
- “ Copy of Parkway plan near President's bridge.

- “ Hose House lot, Ward Five, for architect.
- “ Gravel Pit taken by City in Ward Six. (Two plans.)
- “ Quincy Centre showing available lot for government building for use of committee at Washington.
- “ Block enclosed by Squantum st., Botolph street and Newbury avenue for the Board of Health.
- “ City square showing paving required of Brockton St. Ry. Co.
- “ Hancock st. showing widening near Granite st.
- “ Hancock st. showing location of drain from City Square to Town Brook.

The following streets or portions of streets have been accepted and laid out as public highways during the year.

| NAME | FROM | TO | WARD | WIDTH | LENGTH |
|--------------------------------------|--------------|---------------|------|-------|--------|
| Marlboro st. (formerly Morton st) | Waterston av | Blake st | 5 | 40' | 1608' |
| Blake st. | Hancock st | Marlboro st | 5 | 40 | 382 |
| Intervale st. | Centre st | Brook rd | 3 | 36-40 | 1673 |
| Clark st. | Edwin st | Squantum st | 6 | 36 | 325 |
| Edwin st. | Faxon rd | 405 ft west'y | 6 | 40 | 405 |
| Upland rd. | Saville st | Dimmock st | 1 | 40 | 706 |
| Warren av. Ex. | Old Co'y av | 70 ft west'y | 5 | 50 | 70 |
| Chub'k st ex (new) | South st | DesMoines rd | 2 | 50 | 202 |
| DesMoin's rd (new) | South st | Howard st | 2 | 50 | 775 |
| Total | | | | | 6146 |

All the above streets have been carefully surveyed and stone monuments set at the principal boundary points.

A mounted paper plan of each street has also been made and filed at this office showing in detail all the working points, ties, radii of curves, offsets and angles.

Street Numbering.

Section 2 of Ordinance 1899 concerning the numbering of buildings reads as follows :

SEC. 2. The city shall be divided into District A, em-

bracing that portion of the city situated easterly of Hancock street and Quincy avenue, and District B, embracing that portion of the city situated westerly of Hancock street and Quincy avenue. In district A the numbers shall commence on streets running east and west at the westerly end, and on streets running north and south at the northerly end. In district B the numbers shall commence on streets running east and west at the easterly end, and on streets running north and south at the northerly end. The odd numbers shall be placed on the right hand side and the even numbers on the left hand side of all streets following the direction of the numerical order from the beginning.

The ordinance also requires that a plan showing the street, house and number assigned, be made and kept on file in this office.

After investigating the customs of other cities I decided to make the plans on bond paper 25" x 38"—40' scale, assigning one number for every twenty-five feet in residential districts and twelve and one-half feet in business sections.

We have now completed and on file seventy-one (71) of these plans representing 29.76 miles of street. Numbers have been assigned to seven hundred and sixty-eight (768) houses. To facilitate making these street numbering plans, large section plans were carefully plotted at 40' scale, showing all street and property lines in the section, each plan comprising about 300 acres.

These plans are very useful when a plan for public improvement is required or for the assessment of property either for taxes or other assessments. There are ten of these plans now in possession of the city covering about one-third of its area, seven having been made by the Sewer Department and three by this department.

By order of the City Council for renumbering of South street from Elm street to Washington street, an accurate survey was made and plotted forty feet to the inch. While the survey was rather extensive for numbering purposes it will be valuable in case of future improvements on the street.

Department of Public Works.

The demands of this department have been many and varied the past year.

Among the most important improvements was the completion of the widening and relocation of Coddington and Sea streets. Estimates were made and lines and grades given for construction.

The widening of Copeland street also occupied much time. The lines of widening on the plan made by H. T. Whitman were reproduced as accurately as possible on the ground and stone monuments were set locating permanently the principal boundary points. Lines and grades were given for edgestone, walls, paving, drains, and also lines and grades for the location of tracks for the Brockton Street Railway Company.

During the year lines and grades have been given for about 13,000 feet of edgestones and necessary measurements made for 5,855 square yards of concrete sidewalks and 8,170 square yards of paving.

Lines have been given for all water pipe extensions during the year.

Surveys have been made of all lands taken or bought by the City and record plans made of same.

Miscellaneous.

Work has been done for various other departments of the City including Assessors, Tax Collector, City Solicitor, Board of Health, Board of Public Burial Places, and Park Commissioners; the cost of same being charged to the Engineering appropriation.

Recommendations

I would call your attention to the urgent need of a system of plans for use of the Assessors. As this work would be of too great a magnitude to accomplish in one year, I would recommend that a small increase be made in the appropriation for this department for the next few years, in order that a party of at least two men might be kept steadily employed upon this work until completed.

When completed the plans would show every piece of real estate in the city together with its owner and area assessed.

I should estimate the total cost of engineering for same from five to six thousand dollars, exclusive of investigation of titles.

I would also call your attention to the crude method of filing plans in the City Clerk's office. It has been the custom for years to file these plans in two large books and fold them to fit the book. You will notice that some of the older and most important plans are broken and disfigured, the figures being hardly discernable.

For the present there should be a set of drawers inserted in the lower part of the present vault and the plans pressed and filed in proper shape.

In the past few years many valuable plans have been made by the Sewer Department and Engineer's Department and at present they are unprotected from fire. Some action should be taken at once by the City Council to provide means for their protection.

Office Assistants

Draughtsman.

Ezekiel C. Sargent.

Transitman.

Andrew S. Odom.

Rodman and Clerk.

Walter S. McKenzie.

In closing I wish to thank His Honor, Mayor Hall, and Mr. C. F. Knowlton, Commissioner of Public Works, and also my assistants for their kindness and services rendered.

Respectfully submitted,

HAMILTON FLOOD,

City Engineer.

Fire Department.

To His Honor, the Mayor, of the City of Quincy:

In compliance with the requirements of the City Ordinances, I hereby present my sixth annual report for the year ending Dec. 31, 1900, containing a statement of all fires and alarms for the year, the loss and insurance on same as far as could be ascertained, the list of the permanent men of department and their ages, also a schedule of the property under their charge.

ORGANIZATION.

The force consists of one chief engineer and six assistant engineers, eleven permanent and sixty-nine call men. Combination No. 1 at Central Fire Station has one permanent and eleven call men; Combination Hook and Ladder, No. 1, at Central Fire Station has one permanent and twelve call men; Hose No. 2 at Wollaston has one permanent and five call men; Hose No. 3 at West Quincy has one permanent and six call men; Hose No. 4 at Quincy Point has one permanent and six call men; Hose No. 5 at Houghs Neck has ten call men, Combination No. 2 at Atlantic has one permanent and nine call men, Hook & Ladder No. 2 at West Quincy has one permanent and ten call men, Engine No. 1 at Central Fire Station has three permanent men, also one permanent man at Central Fire Station to look after fire alarm.

OFFICERS.

Peter J. Williams, Chief Engineer.
Frank C. Packard, Ward 1, Engineer.
Rollin H. Newcomb, Ward 2, Engineer.
Welcome J. Blake, Ward 3, Engineer.
James F. Rooney, Ward 4, Engineer.
Marcena R. Sparrow, Ward 5, Engineer.
John H. O'Brien, Ward 6, Engineer.

APPARATUS.

The apparatus of the department consists of one steam fire engine in good repair, two combination chemical engines, one combination hook and ladder truck and one straight hook and ladder truck, six hose wagons, two hose reels, one express wagon for fire alarm purposes, one democrat for hydrant purposes, also one chemical engine and one hand engine not in service. The department has been increased the past year by adding one permanent and ten call men and a hook and ladder truck and horses at West Quincy; there has also been a new fire station built the past year in Ward 5, Wollaston. I would recommend putting in this new station a combination hook and ladder truck, after the same pattern as the last purchased for Central Fire Station, also a company of eleven men, two to be made permanent and nine call men. I would also recommend the purchase of horses and harnesses for the same.

HOSE.

We have in the department 9500 feet of cotton hose, rubber lined; 4000 feet in good condition, 2500 feet in fair condition and 3000 feet in poor condition. I would recommend the purchase of 4000 feet. I think the department should be kept well supplied with hose in case of emergency. I would rec-

commend placing more hydrants on old line of pipes, as we use less hose and get better fire protection, also a big saving to hose.

FIRE ALARM.

The fire alarm has given good service the past year. When boxes have been pulled they responded promptly. We have, as near as can be ascertained, 50 miles of fire alarm wire to keep in good order. This branch of the service needs the greatest attention, so when boxes are pulled they will work promptly and correctly.

ELECTRICAL APPLIANCES.

Six circuit repeater, 6 lightning arresters, 7 galvanometers, 1 switch board for automatic repeater, 1 quartered oak switch board and 7 switchers, 1 circuit breaker, 6 resistance coils, 8 lamps, 5 automatic protectors, 206 cells of battery of gird type element, 1 eighteen-inch gong and indicator, 80 miles of wire out on lines, 64 boxes, 1 Stevens automatic whistle on Eagle Polishing mill, 1 Gamewell automatic whistle on tubular rivet factory, 4 Gamewell strikers on churches, 1 Gamewell striker on Hose No. 3 house, 1 Stevens striker stored in Combination No. 2 house. Hose No. 2 has 12-inch Gamewell gong, Chemical No. 2 has 12-inch gong, Hose No. 3 has 6-inch Gamewell gong, Hose No. 4 has 6-inch Gamewell gong, Chief Williams 18-inch gong, Engineer Sparrow 6-inch Stevens gong, Engineer Newcomb 6-inch gong, Engineer O'Brien 6-inch gong, Quincy Electric Light a 16-inch gong, Brockton Street Railway Power House a 12-inch Gamewell gong, Tubular Rivet a 12-inch gong, George T. Magee and William Marden, reporters, a 6-inch gong each, and 2 tappers stored at Central Fire Station.

HORSES.

The number of horses in fire department owned by city is seventeen. The past year we had three horses die with pneumonia and one horse which met with accident and had to be killed.

During the past year the department has been kept very busy answering alarms. The alarms have been increasing very fast for the past three years, and the coming year will probably be a very busy year for fires, as new ship-building plant in Ward 2 and the number of buildings that will be built in that vicinity, besides other parts of the city which will be built over, will keep the department very busy.

RECOMMENDATIONS.

I would recommend putting two more permanent men at Central Fire Station, as increase of fire the past three years demands more permanent men to do the work. I would also recommend better fire protection for Houghs Neck and suitable building for same. I would also recommend that department be put under civil service rules and board of engineers be reduced to three, one chief engineer and two assistant engineers which, in my opinion, would give better satisfaction to department.

In closing this my sixth report as chief engineer of Quincy Fire Department, I wish to tender my sincere thanks to his Honor the Mayor for his interest in the welfare of the fire department, to the City Council for all favors rendered me during the year, to City Auditor and Treasurer for all favors rendered, to Chief of Police and officers for assistance rendered the department at fires, to Committee on Fire Department for the interest they have manifested in the business of the department, to my assistants, the board of engineers and to the officers and members of the department for the prompt and efficient manner in which they discharged their duties, there-

by maintaining the reputation of the Quincy Fire Department for efficiency.

PERMANENT FORCE.

FIRES AND ALARMS, 1900.

During the year beginning Jan. 1st, and ending Dec. 31, 1900, there were 157 alarms—bell and still alarms.

Value of property at risk, \$382,914.

Insurance on property at risk, \$260,900.

Loss on property, \$63,739.78.

Jan. 4, 8.10 a. m., still, Adams st., dwelling, owner, William N. Eaton; cause chimney; no loss.

Jan. 7, Box 26, 9.35 p. m., Dimmock st., cold storage house, owner Quincy Beef Co.; value of building, \$10,000; damage to building, \$108.70; total loss, \$108.70; insurance on building, \$8000; cause overheated stove.

Jan. 10, Box 26, 4.46 p. m., Granite st., storage house, owner H. H. Faxon, occupant Mrs. Thomas Mitten; value of contents, \$10; damage to contents \$1; insurance on contents, \$500; total loss, \$1; cause supposed incendiary.

Jan. 10, Box 35, 6.35 p. m., Hancock st., dwelling, owner Thomas J. Barr, occupant Joseph Cohen; value of

building, \$8000; value of contents \$35; damage to building, \$28; damage to contents, \$15; insurance on building, \$2500; insurance on contents, 0; cause unknown; total loss, \$43.

Jan. 11, Box 171, 4.30 a. m., Union st., false alarm.

Jan. 11, Box 26, 5.33 p. m., Foster st., stable and carpenter shop, owner C. H. Washburn, occupant W. R. Lofgren; value of contents, \$500; damage to contents, \$50; total loss, \$50; insurance on contents, \$400; cause supposed incendiary.

Jan. 12, Box 72, 7.38 p. m., Washington st., false alarm.

Jan. 17, Box 39, 10.02 a. m., Liberty st., blacksmith shop, owner A. Malnati; value of building, \$150; damage to building, \$4.50; total loss, \$4.50; insurance on buildings, \$2700; cause sparks from chimney.

Jan. 17, Box 171, 9.03 p. m., Baxter st., engine room; value of building, \$7000; value of contents, \$6000; insurance on building, \$2000; damage to contents, 50 cents; insurance on contents, \$5750; cause unknown; total, 50 cents.

10. Jan. 21, 5.37 p. m., Box 76, off Washington st., dwelling, owner Frank C. Patch, occupant Alexander Pitts; value of building, \$1500; value of contents, \$200; damage to building, \$892; damage to contents, \$100; insurance on building, \$1200; insurance on contents, 0; cause child tipped over lamp; total \$992.

11. Jan. 22, 9.40 a. m., still, Presidents ave., dwelling, owner William Wilson; no loss.

12. Jan. 22, 8.45 a. m., still, Water st., rubbish.

13. Jan. 22, 9.40 a. m., Box 46, Copeland st., dwelling, owner Michael McGovern; no loss.

14. Jan. 24, 12.30 p. m., Box 62, Atlantic st., dwelling, unoccupied, owner Mrs. Mary McCarthy; value of building, \$600; damage to building, \$7.60; insurance on building, \$400; cause sparks from locomotive; total loss \$7.60.

15. Jan. 27, 4.46 p. m., still, brush fire.
16. Feb. 1, 1.15 a. m., Box 41, Parker st., manufactory, owner H. T. Whitman, occupant Hans M. Hanson; value of building, \$400; value of contents, \$676; damage to building, \$400; damage to contents, \$676; insurance on building, \$400; insurance on contents, 400; cause unknown; total loss \$1076.
17. Feb. 1, 8.50 a. m., Box 35, Hancock st., rubbish.
18. Feb. 3, 8.00 a. m., Box 45, California ave., dwelling, owner Cordila Clarke and others; total valuation, \$2000; total insurance, \$1000; cause unknown; total loss \$5.
19. Feb. 5, 11.05 a. m., Box 38, Liberty sq., dwelling, owner Napoleon T. Reed, occupant Charles Vergobbie; value of building, \$1600; value of contents, \$700; damage to building, \$10; damage to contents, \$40; insurance on building, \$1000; insurance on contents, 0; cause unknown; total loss \$50.
20. Feb. 5, 10 p. m., still, Houghs Neck, dwelling, owner Dr. Dearing; value of building, \$1000; damage to building, \$3; cause incendiary; total loss \$3.
21. Feb. 8, 7.45 p. m., still, Hancock st., rubbish.
22. Feb. 9, 3.33 a. m., Box 76, Washington st., dwelling, owner J. F. Sheppard & Sons, occupant Edward Beoudrew; value of building, \$500; damage to building, \$5; insurance on building, \$400; cause spontaneous combustion; total loss \$5.
23. Feb. 11, 12.20 p. m., Box 36, Pleasant st., false alarm.
24. Feb. 12, 3.45 a. m., box 151, Vassal st., boat building manufactory, owner John Stuart, occupant Wollaston Yacht Club; value of building, \$3300; value of contents, \$5075; damage to building, \$3300; damage to contents, \$5075; insurance on building, \$3000; insurance on contents, \$3000; cause unknown; total loss \$8375.
25. Feb. 12, 3.50 p. m., still, Vassal st., no loss.

26. Feb. 13, 9.58 a. m., Box 36, dwelling, owner Joseph Trefanier, needless alarm.
27. Feb. 14, 3.10 a. m., Box 59, hot house, Beale st., owner Samuel Brown, occupant William C. Ward; value of building, \$800; value of contents, \$375; damage to building, \$325; damage to contents, \$300; insurance on building, \$600; insurance on contents, 0; cause supposed from heat; total loss \$625.
28. Feb. 16, 1.58 p. m., Box 59, Highland ave., dwelling, owner George E. Daniels, occupant Charles W. Taylor; value of building, \$2500; value of contents, \$900; damage to building, \$200; damage to contents, \$185; insurance on building, \$2300; insurance on contents, \$700; cause unknown; total loss \$385.
29. Feb. 20, 6.30 p. m., Box 59, Belmont st., dwelling, owner, Ranse Wentworth, occupant A. H. Sayward; value of building, \$4000; value of contents \$3500; damage to building, \$225; damage to contents, \$400; insurance on building, \$1000; insurance on contents, \$1500; cause unknown; total loss \$625.
30. Feb. 20, 7.00 p. m., Box 56, needless alarm.
31. Feb. 21, 9.13 p. m., Box 41, Fort st., dwelling, owner, L. M. Pratt, occupant Chas. Hayden; value of building, \$50; damage to building, \$10; cause unknown; total loss \$10.
32. Feb. 23, 8.10 p. m., still, Billings st., dwelling, owner, Frank Jenkins; cause chimney; no loss.
33. Feb. 23, 6.30 p. m., still, Albertina st., stone crusher, owners Lamb & Doble; total valuation, \$400; total damage, \$200; cause incendiary; total loss \$200.
34. Mar. 4, 2.15 a. m., Box 23, Hancock st., stores, owners Quincy Real Estate & Trust, occupants Joseph Page, N. Weston, J. E. Nickerson & Co.; total valuation of buildings and contents, \$3550; damage to buildings and contents, \$1972; cause supposed started from stove in confectionery store; total loss \$1972.

35. Mar. 4, 5.00 p. m., still, Job's Lane, brush fire.
36. Mar. 16, 7.45 a. m., Box 26, Saville ave., shoe manufacturing, owner James Penniman; chimney; no loss.
37. Mar. 18, 4.30 a. m., Box 23, general alarm sounded 5.05 a. m., Hancock st., Music Hall Block, owners Quincy Real Estate Trust, occupants W. H. Brazee, department store; John H. Gillis, bicycle store; Quincy Clothing Co.; value of building, \$23,500; value of contents, \$24,273; damage to building, \$13,750; damage to contents, \$14,450; insurance on building, \$17,550; insurance on contents, \$19,000; cause unknown; total loss \$28,200.
38. Mar. 20, 7.15 p. m., Box 13, Sea st., needless alarm.
39. Mar. 22, 7.08 a. m., Box 445, Quarry st., dwelling, owner Giovanni Gislighi; value of building, \$1000; value of contents, \$800; damage to building, \$1000; damage to contents, \$800; insurance on building, \$800; insurance on contents, \$400; cause supposed child started fire; total loss \$1800.
40. Mar. 22, 7.28 p. m., Box 42, Kidder st., dwelling, owner John Bradley; chimney; no loss.
41. Mar. 25, 2.20 p. m., still, Hancock st., grass fire.

P. J. WILLIAMS,
Chief Eng. Q. F. D.

Report of City Clerk

To His Honor, the Mayor of the City of Quincy:

I herewith submit the twelfth annual report of this office, for the year ending December 31, 1900.

RECEIPTS.

| | | |
|------------------------------------|----------|----------|
| Marriage licenses | \$114 00 | |
| Dog licenses | 156 00 | |
| Other licenses | 344 76 | |
| Recording mortgages, etc | 107 75 | |
| Total, | <hr/> | \$722 51 |

The above sum has been paid to the City Treasurer, as will appear by his account.

| | |
|--|-----|
| Number of Marriages recorded in 1900 | 234 |
| Number of Marriage intentions recorded in 1900 | 228 |
| Number of Births recorded in 1900 | 756 |
| Number of Deaths recorded in 1900 | 365 |

 Walsh, William J., 4 Franklin pl., conductor.
 Whiton, Joseph L., Jr., 248 Washington st., boot and shoe.
 Young, William J., 272 Washington st. stone mason.

Report of Sewer Commissioners.

To His Honor the Mayor of the City of Quincy:

The Board of Sewerage Commissioners respectfully submits its report for the year ending Dec. 31, 1900, being its fifth annual report.

Early in the year a settlement of the claim of the city against the National Surety Company was made by the payment by the company of \$1,100 to the City. This claim was on account of expense incurred by the City in completing contract taken from James L. Bryne last year, the National Surety Company having been surety for Mr. Bryne.

Final payment under contract with the A. W. Bryne Construction Company was made on March 15. Later in the year final payment was made under contract with James Driscoll & Son for building sewers in Wards 1 and 3.

The claim of John Sheehan & Company against the City for extra work done on the Wollaston Main Sewer has not been settled. Several hearings have been had before an Auditor and a report is expected at an early date.

The claim of the heirs of C. Philip Tirrell on account of an easement taken for the Town Brook Sewer is still pending. All other claims for land takings have been settled without recourse to the Courts.

Assessments.

Sewer assessment notices were sent out early in the year on

those of the completed sewers which had not been assessed last year. A total of 1865 assessment notices have been sent out to date, aggregating \$115,766.68.

Assessments have not yet been levied on the sewers built this year. The record plans are nearly completed and the assessment notices will be sent out within a few weeks.

Construction.

We have had but a small appropriation available for new construction during the year, and extensions have been made only upon petition.

All work has been done by the day. Work was begun immediately after the appropriation became available, about the middle of July, and has been continued throughout the season, a sewer in Granite street from Water street easterly being under construction.

List of Sewers Built During 1900.

| LOCATION. | | LENGTH. | FROM | TO. |
|-------------------|---------|-------------|--------------------|--------------------------|
| Beale Street, | Ward 5. | 227.05 ft. | Highland Ave. | Belmont Street. |
| Belmont Street, | Ward 5. | 636.75 ft. | Beale Street. | Lincoln Ave. |
| Arlington Street, | Ward 5. | 338. ft. | Brook Street. | Near Beale Street. |
| Taber Street, | Ward 3. | 240. ft. | Columbia Street. | Liberty Street. |
| Liberty Street, | Ward 3. | 1299.04 ft. | Centre Street. | 433.4 ft. n. e. Faber st |
| Arthur Street, | Ward 4. | 1117. ft. | Buckley Street. | Garfield Street. |
| Buckley Street, | Ward 4. | 207.33 ft. | Copeland Street. | Arthur Street. |
| Federal Ave. | Ward 3. | 1499. ft. | Goddard Ave. | Independence Ave. |
| Independ'ce Av. | Ward 3. | 946.8 ft. | Bennington Street. | 200 ft. s. w. Fed'l av. |
| Granite Street. | Ward 3. | 135. ft. | Water Street. | Easterly. |

A total of 6,696 feet built at a cost of \$10,895.43.

The practise of flushing the sewers from the fire hydrants as was done last year was found to be unsatisfactory. The fire hydrants are located so far apart that in some places five or six hundred feet of hose was required, and the labor of flushing was considerable. In addition to this fact the Chief of the Fire Department rightly objected to the opening of the fire hydrants by men not under his control. As an experiment several of the manholes were connected with the City Water Mains by $1\frac{1}{2}$ inch pipes fitted with valves which could be operated in the

manholes. These worked so successfully that the manholes at nearly all summits and dead ends of the system have been similarly connected so that we now have 105 of these flushing manholes. With this arrangement all the necessary apparatus can be conveyed in the hand cart and two men are able to thoroughly flush from three to four miles of sewers per day.

The payments of the year from the Appropriation for Construction may be summarized as follows:

| | |
|--|-------------------|
| Paid Kelley & O'Hearn, (final payment) | \$2,436 35 |
| Paid A. W. Bryne Construction Co., (final payment) | 1,262 25 |
| Paid on account of contract with James Driscoll & Son, including (final pay- ment) | 1,993 19 |
| Land and other damages, | 1,469 34 |
| Pay rolls. | 10,440 86 |
| Cost of fitting Flushing Manholes, | 1,822 30 |
| Rent—Office and Stock Yard, | 370 00 |
| Stock and tools, | 1,911 33 |
| Office Expenses, including telephone, lighting, stationery, etc., | 189 43 |
| Legal expenses, | 802 66 |
| Expenses attendant upon trial of Shee- han Case | 773 20 |
| Miscellaneous, | 40 50 |
| | <hr/> \$23,511 41 |

Maintenance.

Early in the year it was found to be unsatisfactory to pump intermittently as was done last year, as the sewage backing up in the sewers and standing for several hours caused objectionable deposits to be formed in the sewers. To avoid this the pumping has been continuous during the most of the year. The smaller sewage pump has ordinarily been found sufficient for this purpose, the larger pump being used only enough to keep it from deteriorating from standing idle.

At present three engineers are employed, each running a shift of eight hours. The plant is in good condition. The last boiler inspection about December 1st, showed the boilers to be in first class condition and all appliances in good working order.

The sewers have been flushed several times during the year. Some of the sewers become foul much more quickly than others. A record is kept of the condition of each sewer when flushed, and from this record it is possible to tell which of the sewers need the more frequent flushing. Deposits of sand have been found in some of the sewers. These have been removed by means of scrapers.

Repairs to streets by the Street Department have raised the streets in several instances and it has been necessary to raise the manhole covers to conform to the new grades of the streets. This expense has been charged to the appropriation for maintenance. The appropriation for maintenance was \$7,000. Of this amount \$6464.41 has been expended, leaving a balance of \$535.59.

House Connections.

During the year 217 connections have been made with the public sewers. These have been made by this department and the cost assessed upon the owners in accordance with Chapter 319 of the Acts of 1899.

The aggregate length of the connections made is 10159.5 feet. The total cost assessed upon the owners is \$5670.70. The average length of these connections was 46.75 feet and the average cost 55.8 cents per foot. The cost is larger than last year chiefly on account of higher prices paid for stock, and the fact that eight hours constitute a day's labor instead of nine as last year. The cost of these connections may be tabulated as follows,

Cost of Connections per Foot.

| | | | | |
|---|---|---|---|----|
| Number costing less than 30 cents per foot | . | . | . | 4 |
| Number costing from 30 to 40 cents per foot | . | . | . | 30 |
| Number costing from 40 to 50 cents per foot | . | . | . | 53 |
| Number costing from 50 to 60 cents per foot | . | . | . | 55 |
| Number costing from 60 to 70 cents per foot | . | . | . | 26 |
| Number costing from 70 to 80 cents per foot | . | . | . | 20 |
| Number costing from 80 to 90 cents per foot | . | . | . | 14 |
| Number costing from 90 to \$1.00 per foot | . | . | . | 7 |
| Number costing more than \$1.00 per foot | . | . | . | 8 |

Cost Per Connection.

| | | | | | | |
|----------------------------------|---|---|---|---|---|----|
| Number costing less than \$20 | . | . | . | . | . | 73 |
| Number costing from \$20 to \$30 | . | . | . | . | . | 83 |
| Number costing from \$30 to \$40 | . | . | . | . | . | 40 |
| Number costing from \$40 to \$50 | . | . | . | . | . | 7 |
| Number costing more than \$50 | . | . | . | . | . | 14 |

In addition to these connections a six inch sewer was built from the corner of Copeland street and Centre street for the drainage of the Willard school. This sewer and connection with the Willard school is 739 feet long ; has four manholes and was built at an expense of \$671.47.

In 1899 an appropriation of \$6000 was made for making house connections with the public sewer and in 1900 a like appropriation was made. Bills to the amount of \$5229.32 in 1899, and \$6333.95 in 1900 have been approved by the Board and charged to these appropriations. This should leave a balance of \$436.73 to the credit of this account.

Metropolitan Sewer.

The construction of the Metropolitan Sewer through Quincy has been begun. It is expected that it will be completed and ready for use in about two years. The Metropolitan Sewerage Commissioners have under consideration the taking

of the Quincy Pumping Station and Force Main. It is probable that they will make the taking within a few weeks. If this is done about \$100,000 to be received from this source will be available for sewer construction during the coming year.

Recommendations.

Petitions are before the Board for building sewers in Atlantic, Wollaston Park, Quincy Point and on President's Hill. We think that besides building some lateral sewers tributary to the main sewers now in operation, the main sewer should be extended to Atlantic during the coming season and that several miles of lateral sewers should be built in Atlantic, Norfolk Downs and Wollaston Park. It is becoming more and more difficult to dispose of the matter from cesspools and vaults and people who build new houses should have an opportunity of connecting with the sewers rather than be compelled to build cesspools.

The demand for sewers in some parts of Ward 4 seems urgent. Action should be taken so that sewers for this district may be built and ready for use as soon as the Metropolitan Sewer is ready to receive our sewage.

During the past year the Fore River Engine Company has moved its plant to Ward 2. It is claimed that recent contracts placed with this company will result in the employment of from 4000 to 6000 men within a few months. If this be the case there will probably be a great activity in building at Quincy Point, and the petition for extending the sewerage system into this section should be carefully considered at once.

Respectfully submitted,

FREDERICK L. JONES,

F. C. BADGER,

A. F. SCHENKELBERGER,

Sewerage Commissioners.

Thomas Crane Public Library

To His Honor the Mayor, of the City of Quincy:

The Trustees of the Thomas Crane Public Library, beg leave to submit the following report :

It will be seen that the circulation of the Library is steadily increasing. By comparison with the report of last year there has been a gain of about seven thousand. At that rate, it will reach one hundred thousand by another year, which is very large for a city of Quincy's population.

This is an encouraging sign. Especially reassuring is the percentage of juvenile reading—nearly twenty-three per cent. It is, to be sure, largely fiction, but reading is a habit, like many other things, and once firmly fixed, it will not be lightly given up. And then, the taste for fiction is a perfectly healthy one, and should be supplied, with proper limitations.

Now it may be said that the Quincy Public Library is lacking in this direction. A library fulfils its ideal when anybody can find in it any book he wants. This is, of course, beyond our expectations. With the means at their disposal the Trustees have done what they could, but during the past year the demand has been altogether beyond anything they could possibly supply. One thousand dollars will not go very far towards the purchase of books for a hundred thousand readers.

And then again the waste in the books is very great, especially with the younger readers. The books are there to be

used, and the Trustees desire to have them used, but in the way in which juvenile literature is now bound it does not last very long.

The use of books by the schools has apparently decreased, but that is owing to the double-card system which was adopted at the beginning of the year, by means of which, scholars were enabled to procure books heretofore procured by teachers.

The new industry at the Point has already made itself felt, but, mainly, in a call for special books that the Library could not supply.

There has also been an increasing demand for the establishment of branch libraries in outlying districts. They are much to be desired, but entirely impossible under present conditions.

The Trustees have received a good deal of criticism because of the inadequate lighting of the Library. They admit the fact, but desire to call attention to the curtailment of the appropriation for that purpose.

We have a noble Library building, and its possibilities are very great as an educational institution, but it needs double the number of books, each year, to keep abreast with the exactions made upon it. As it now is, its supply is altogether inadequate.

The statistics in connection with the circulation, will be found below.

All of which is very respectfully submitted.

E. C. BUTLER,
HARRY L. RICE,
G. W. MORTON,
HARRISON A. KEITH,
L. F. R. LANGEIER,
HENRY McGRATH.

STATISTICS.

During the year 1900 the Library was opened 303 days; and the number of books loaned was as follows:

| | Home use | Schools. | Total | Per cent |
|---------------------|---------------|----------|--------|----------|
| Fiction, | 33,457 | 381 | 33,838 | 37.8 |
| Periodicals, | 19,837 | 11 | 19,848 | 22.1 |
| Juvenile Fiction, | 18,858 | 1,561 | 20,419 | 22.8 |
| History, | 3,602 | 463 | 4,065 | 4.5 |
| Arts and Sciences, | 2,393 | 280 | 2,673 | 2.9 |
| Biography, | 2,336 | 151 | 2,487 | 2.7 |
| General literature, | 2,042 | 72 | 2,114 | 2.3 |
| Travels, | 1,905 | 396 | 2,301 | 2.5 |
| Poetry, | 1,032 | 25 | 1,057 | 1.1 |
| Education, | 379 | | 379 | .4 |
| Religion, | 319 | | 319 | .3 |
| | <hr/> | <hr/> | <hr/> | |
| | 86,160 | 3,340 | 89,500 | |
| Miscellaneous, | (Library use) | | 5,196 | |

Total circulation, 94,696

Names registered during the year 1377. Books purchased, 835; books replaced 239; books rebound, 1113; gifts, 196; pamphlets, 271.

Largest number of books issued on any one day, 671, March 24. Smallest number, 79, on July 16.

Report of the City Physician

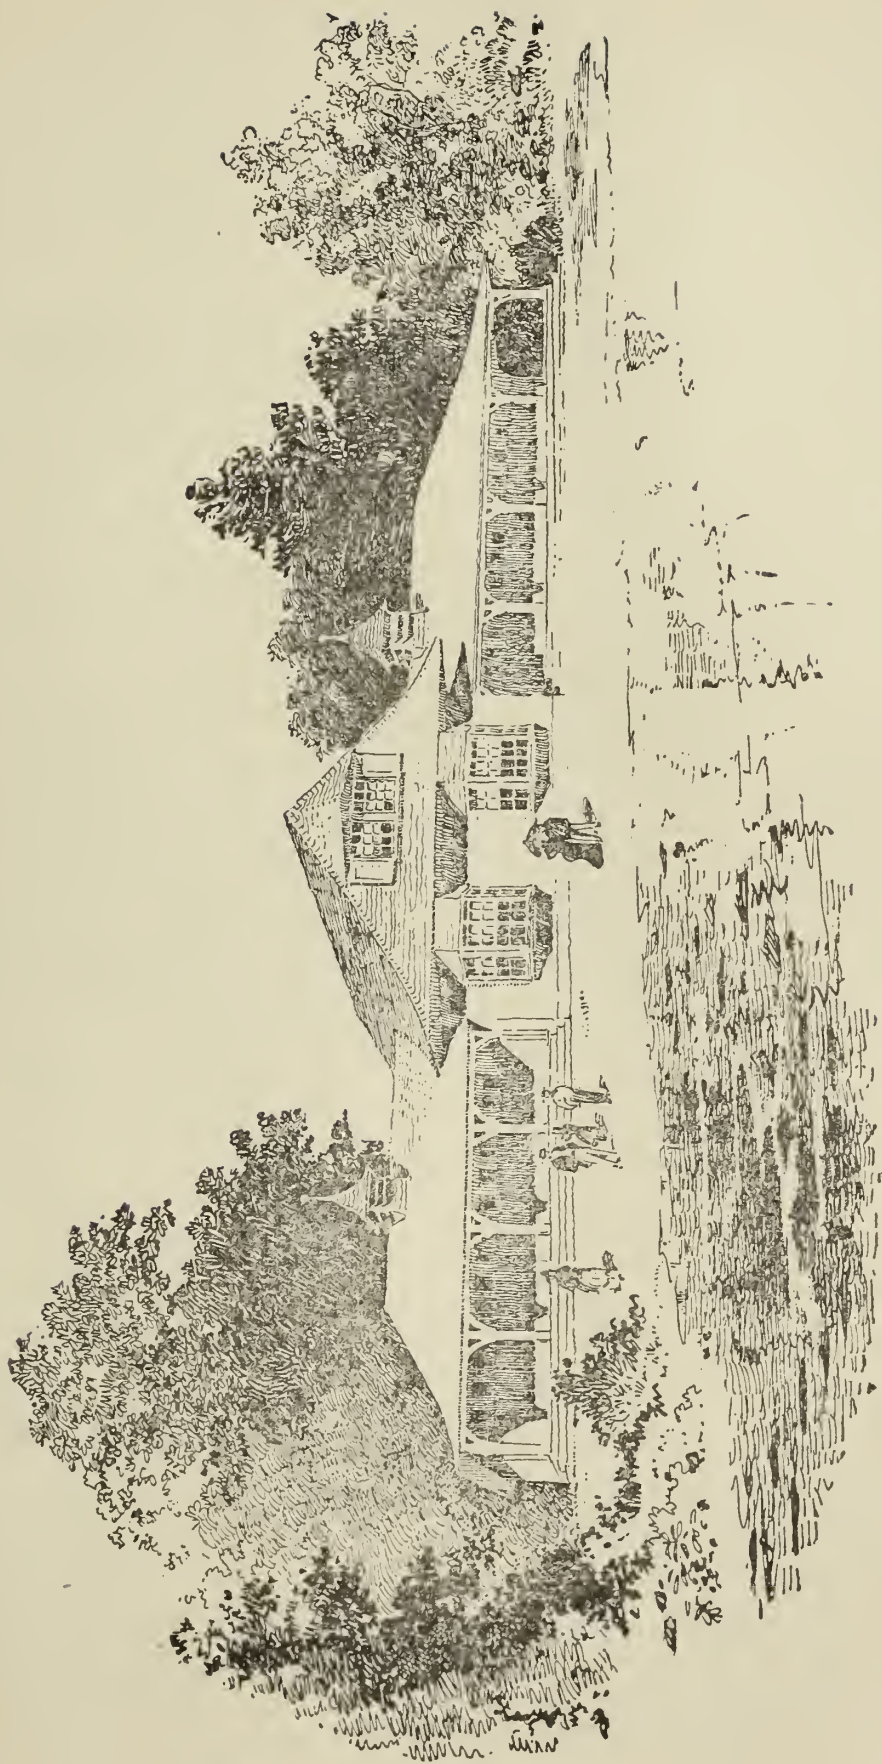

To His Honor the Mayor of the City of Quincy:

The following report of the City Physician for the year ending December 31st 1900 is respectfully submitted:

| | | |
|--|-----------|-----|
| Visits made to the Almshouse | | 36 |
| Visits made to outside poor | | 164 |
| Visits made to Police Dept. | | 7 |
| Examination of applicants for police force | | 23 |
| Office visits and vaccination | | 125 |
| Cases of childbirth | | 2 |

JOHN F. WELCH, M. D.

City Physician.

Report of Park Commissioners

To His Honor, the Mayor of the City of Quincy:

The Board of Park Commissioners respectfully submits its report for the year of 1900.

The work of the Board the past year has been largely confined to the erection of a public bathhouse on the Ward Two playground; the making of a ball field at Ward four; the improvement of the Ward Three playground; the completion of the Ward Two playground work; the setting of edgestones around Ward Six playground; the maintenance of Merry Mount and Faxon Parks and the conferring with the Metropolitan Park Commission regarding the Boulevard.

PUBLIC BATHHOUSE.

On petition from the Board the General Court passed an act allowing buildings containing an area of over 600 sq. ft. to be erected on the Parks and Playgrounds of this city. A public bathhouse having been advocated by the Board and Mayors Hall, Keith and Sears, at the request of the Board the Council appropriated \$2000 for such a purpose. A building costing about \$1950 has been erected on the Ward Two playgrounds. It is of artistic design, over 100 ft. long and contains 40 lockers, 4 shower baths, head house, boys' room, laundry, etc. It will be a free public bath for the use of men, women and boys and will be opened in June to the public.

MERRY MOUNT PARK.

During the past year but little permanent work has been done on this Park. The time now seems to be ripe for the first steps towards the permanent improvement of this bit of rural scenery. Year by year the trees have been destroyed by fires and other causes, and the grass has gradually died out, until finally the park has commenced to take on a scraggly look which can only be overcome by tree planting on an extensive scale and the renewal of the turf. The game of foot-ball has grown so in favor the past few years that it is now deemed advisable to improve the field which is used for that sport and also the field upon which the pavilion stands, by returfing it.

FAXON PARK.

When the town of Quincy voted at a special town meeting held on September 24, 1885, to accept the munificent gift of Mr. Henry H. Faxon of a tract of land in the South Common near Mt. Pleasant, for a public park, since known as Faxon Park, it agreed with the donor to do certain things, among which was the agreement "to construct a roadway fifty feet wide from the corner of Quincy avenue and Water street, following the course, or nearly so, indicated on a plan exhibited to the town at this meeting, striking the old driveway to the Job Faxon homestead, and following the same to the new street first herein described." This condition of the gift has never been fulfilled. Mr. Faxon desires that this clause in the deed of gift should be carried out. This will necessitate a special appropriation of money by the City Council.

THE PLAYGROUNDS.

From a superficial point of view the playgrounds in the various wards have been generally considered by the public as being unadapted for the purposes for which they were taken.

The Board, at the beginning of the season, made a study of each playground and briefly outlined plans for its development. At the request of the Board the Council transferred \$1200 from the unexpended playground balance to be used in the permanent development of the playgrounds.

WARD 2.—The work which was begun in 1899 in laying out a ball field on this playground was set back somewhat by the unfavorable winter, the grass seed which had been sown in the fall failing to come up properly this spring. New seed was sown, which later came up and will eventually cover this field, with proper care, with a good turf. The city water was extended to the bathhouse.

WARD Three.—A substantial bridge was thrown across Town Brook and a granite-chip and cinder sidewalk was built from Water street to Gilbert street. Thanks are due to Councilman Thomas W. Smith for contributing the material and also for allowing the walk to be extended through his stone yard, greatly to the convenience of the public. A blind drain was also put in, thoroughly draining a portion of the ground. A good ball field was also made and a back stop was erected. Work will be continued the coming year.

WARD Four.—Before a ball field could be laid out in this playground it was necessary to regrade the larger part of the field. The contract for doing this work was let to Commissioner Knowlton. A level field was made out of this undulating piece of land and a fairly good turf was made before the close of the season. The location of the back stop was changed and substantial seats were put in. City water was also introduced. During the season the field was in constant demand by base ball and foot ball teams. During the winter a part of the playground was flooded, thus making an excellent skating rink.

WARD 6.—The first steps towards the improvement of this playground were taken this year. The ground was grid-ironed with wagon paths. In order to effectually put a stop to this trespassing the Board had the sides of the two adjacent to the streets curbed. Providing good loam can be bought at a

fair price it is proposed to loan and sow down a part of this playground the coming season.

In order to continue the permanent work on the playgrounds the Council will be asked to transfer another sum of money from the unexpended playground balance to be expended under the direction of the Board.

QUINCY SHORE RESERVATION AND FURNACE PARK PARKWAY.

The Metropolitan Park Commission has during the past year practically completed its takings for the Quincy Shore Reservation and Furnace Brook Parkway, commonly known as the Boulevard, which extends from Hancock street across the Neponset river marshes to near the old Felt mill, across Squantum street to the shores of Quincy bay, thence following the coast line to Rufes Hummock, thence across the National Sailor's Home marshes, skirting the northerly side of Pine island to and up the valleys of Black's Creek and Furnace Brook to the Blue Hill's Reservation.

BY-LAWS.

The depredations in the different parks and playgrounds have increased to such an extent that a set of Rules and Regulations for the government of those places was adopted, in which the maximum penalty was fixed at \$20 and a reward of \$5 was offered for information which will lead to the conviction of the depredators. The Rules and Regulations follow :

Rule 1.—No person shall discharge or have possession of any firearm, air gun, or any device for the taking or killing of birds or game in the Parks or Playgrounds.

Rule 2.—No teams for the carriage of merchandise are allowed in the Parks or Playgrounds.

Rule 3.—No person shall cut, break, remove, deface, defile, or ill-use any building, tree, bush, plant, turf or other thing

herein belonging to the city, or have possession of any part thereof.

Rule 4.—No person shall throw any stone or other missile ; or have possession of any firecracker, torpedo or firework ; or make a fire ; or sell, expose, for sale, or give away any goods, wares or circulars ; or post or display any sign, placard or advertising device, in any Park or Playground.

Rule 5.—No owner or keeper of a horse or cow or other grazing animal shall suffer the same to go at large, or feed upon any Park or Playground.

Rule 6.—No person shall engage in a picnic, game of ball, foot ball, base ball or other sport, upon any Park or Playground, except by permission in writing of the Board of Park Commissioners.

Rule 7.—No person shall place any structure, tent, post, fence, rubbish, gravel, stones, ashes, or other thing in any Park or Playground without a permit from the Board of Park Commissioners.

SKATING RINK.

Through the courtesy of the trustees of the Greenleaf Land Associates a temporary dam was built across the Black's Creek tide gate, thus holding the fresh water back, making a fairly good skating rink. At some future time it is expected that a permanent dam will be put in raising the water to a height, which, while not endangering property, will ensure a large area of fresh water ice.

Adams Academy

To His Honor, the Mayor of the City of Quincy:

The Managers of Adams Academy respectfully present their report for the year 1900.

The school year 1899-1900 terminated as usual with the prize declamation, and the admission of two candidates to Harvard College, one with an exceptionally brilliant record. It is right, however, to say that the requirements for admission to Harvard and other colleges are steadily increasing in difficulty. It is questionable whether the average pupil who fifteen years ago found himself able to enter with ease from a specific school course of four years could accomplish the like task in the same time now without extreme pressure. The colleges are making great efforts to throw back a considerable part of their work on the schools. If this operation is as successful as some colleges seek to make it, the preparatory school work will have to occupy another year. The four years' course of Adams Academy was established at its original opening by vote of the town. It may be questioned if such a radical change as lengthening the course to five years could be done by a simple vote of the managers. It need not however entail another year in the entire school course of any child. Pupils have for several years been received at the Academy from the seventh

grade of the grammar schools, and are as often able as not to maintain their position in their class.

The new year began with an entering class of twenty, hardly half the size of that entering in 1899, but still enough after all withdrawals to raise the members to seventy-nine, larger than the school has known since 1878. A few have since withdrawn, but the present number, 74, is still the largest on record since Dr. Dimmock's death, at which time and for several years after, the majority of the boys came from outside the limits of Quincy. The teaching capacity of the school is very severely taxed by this mark of confidence. One class has to be divided in some studies; and the study of Physics has been postponed with the two lower classes largely from the impossibility with our present space and appliances, of teaching it to such numbers. The invested funds, although believed to be in strong condition, are inadequate to supply the requisite teaching force, even though the existing staff is content to work at the minimum salaries. Complaints have been heard that classes are entrusted to teachers of little experience, however distinguished by their talents and scholarship. This course has been forced upon us. We have not the money to pay for teachers of experience. The attempt to conduct a school even so small as thirty boys broke down the two principal teachers and when the numbers approach eighty, four is too few. Several citizens of means have generously paid for their sons' tuition, enabling us to secure a fairly adequate staff, and it is hoped this example will be followed. No plan has as yet been devised whereby the school may be kept within the bounds which its building and its funds seem to prescribe. Nor is it desirable. The number of eligible pupils increases every year, and eighty or thereabouts is not too many, if they can receive proper tuition and appliances.

The teachers at present are William Everett LL.D., Master, John O. Hall, jr., Israel Damon and Charles Brooks Hersey, assistants, all graduates of Harvard College.

The Managers desire to express their repeated thanks to F. B. Rice, Esq., of the board of supervisors, for his fre-

quently received gifts of \$50. at a time, enabling the Master to enrich the appliances of the school house, both practical and ornamental, to its great advantage.

The annual catalogue, regularly issued in the spring accompanies this report as a part of it.

Woodward Institute

To the Mayor and City Council:

The report of the Principal is herewith submitted giving a summary of another year's work.

The policy of the school aims at the highest point of efficiency by the best of all methods old or new.

The working out of details must vary with the occasions that arise, but should tend always in one direction and in the end go to form rich traditions so helpful to all good schools.

By its central location, its full equipment, its well adapted courses and excellent teachers, Woodward Institute should render valuable assistance in meeting the needs of our city.

HENRY G. MEGATHLIN,

Secretary of the Board of Directors.

Report of Principal

To the Board of Directors of The Woodward Institute for Girls:

GENTLEMEN:—The year just closed has been a twelve-month of earnest endeavor on the part of teachers and pupils, and therefore a record of progress towards those ends for which we are striving.

The class that entered Woodward as the lowest class in 1894, was graduated in June, 1900. Its public exercises were but a faint echo of the faithful daily duties in instruction and discipline given by teachers and received by pupils; and yet how plainly the Woodward spirit manifested itself!

From this time, our classes will have pursued a full course of study. We must now hold ourselves responsible for their advanced school work. This means much. Woodward is responsible not merely for some kind of instruction, but for giving an education to these young women.

Their individual capacity and inclinations, their out-of-school advantages and environments, all must be taken into consideration in our plans for their broadest development, in the wisest way known to us.

Many a girl feels a debt of gratitude to Woodward for its liberal courses of study, affording her an opportunity of finding out her ability in some special field of labor, a privilege too often denied in the most famous schools.

Our preparation for college is but one of the many lines of work a girl may choose in preparation for the years to follow.

Our Girls.

One of our graduates reports from college halls that the newness and loneliness of her first entrance to recitation vanished when the lesson began with a talk by the Dean, who emphasized the importance of physical culture and the education of the heart as well as the mind. "It was just a continuation of Woodward, and so I felt at home."

Another's experience was the opposite. "I am so homesick," she wrote; "the discipline seems childish; for so many years we have become accustomed to decide important questions for ourselves and to being held responsible for the result of unwise decisions, that I cannot become reconciled to having everything planned for me and expressed in fixed rules; I feel as if I were a machine; and I fear lest my conscience may stop working."

A third writes: "Let me tell you that I am still advancing in the business line, having reached a \$15.00 per week salary. I am now learning ——, and have the promise of a substantial advance when I master this new study."

A fourth reports a short course in Commercial college due to her previous study.

Another, who is an enthusiastic teacher in a neighboring town, expresses her pleased surprise that she learned so much of pedagogy and psychology without formal study of those subjects. The "Why?" of every day school-life is now of practical value to her.

Two of our graduates hold the position of instructor in the diet kitchen for nurses in Western hospitals, at a salary of \$700 a year.

Our girls send word of success in gymnastics, art and music; in languages both ancient and modern; in literature, in science and mathematics, in business pursuits and teaching.

These facts might seem trivial for mention, were it not that seven years ago Woodward as a school did not exist. Its growth has been vigorous, its action, forceful, its influence strong, as its graduates most heartily attest.

Much of this success is due to the fact that the school is made for the pupils. Moreover, we are aware that the close contact of minds, and the individual attention now possible, would be lost, to a great degree, were the school a large one, or its course of study limited.

These very things, sometimes deplored because so little understood, are among the causes of that "indefinable something" so puzzling to strangers and so warmly appreciated by the parents.

Alumnæ Association.

In order to become acquainted with Woodward, one should be able to witness a gathering of its graduates. They all came home not only for the Alumnæ meeting, but also on Founder's day and again for Commencement exercises, when their voices mingled with the undergraduates' in the well-known school songs.

But when Woodward sends her messages to her children next year, and they return to greet their Alma Mater, two of her dear ones may not respond. None have been more helpful or more appreciative, more loyal and more loving, than those whose memory will be most dear, and whose faithful devotion will be an inspiration to those who knew them during these initial years of Woodward Institute.

Gifts.

We are grateful every year for the opportunity of acknowledging the many kind remembrances of friends.

Mrs. George W. Morton and the Reverend Charles W. Wilder have presented the school with collections of minerals.

The pupils in the Virgil class, Marian Bates, Bessie Drew, Jennie Harris, Gertrude King, Bertha Josselyn, Florence Newcomb, Maggie I. Shirley and Lola West, together with their teacher Miss Mary H. Cowell, gave the library a Christmas present of a statue of "The Winged Mercury."

This seventh annual report to the governing Board does not attempt any discussion of the great educational problems upon which Woodward is hard at work; it merely states facts. To those who were privileged to know its aims at the beginning, will be given to see how progressive were its plans, and how consistently they have been carried out.

Prof. A. B. Bruce says : "Justly to estimate men's work, three things must be considered :

1. The quality of the work done.
2. The ability of the worker.
3. The motive."

Even as an architect beholds the structure that he has planned stand complete in his mind's eye, so had we to see the end from the beginning. But no; the end is not yet. Did we feel the ideal to be the real, we were sure of decadence. Growth every year is our necessity; and how best to increase in true wisdom is the constant effort at The Woodward Institute for Girls.

Respectfully submitted,

CARRIE E. SMALL,

Principal.

Woodward Departments

DEPARTMENT OF ENGLISH.

Teacher—CATHARINE M. TINKER.

First Year—Four Periods a Week.

Class Work :—

Holmes : Selections.
 Bryant : Selections.
 Whittier : Selections.
 Longfellow : Selections.
 Hawthorne : Selections.
 Study of Greek and Norse Myths.

Prescribed Home Reading :—

The Arabian Nights,
 Dodgson : Alice in Wonderland.
 Grimm : Fairy Tales.
 Hans Andersen : Fairy Tales.
 De Foe : Robinson Crusoe.
 Old Mother Goose's Rhymes and Tales.
 Æsop : Fables.
 Browning : Pied Piper of Hamelin.
 Hawthorne; Wonderbook.
 Thackeray : The Rose and the Ring.

Second Year—Four Periods a Week.

Class Work :—

Study of Greek and Norse Myths (continued.)

Homer : Iliad (Pope), Books I, VI, XXII, XXIV.

Study of Arthurian Legends.

Tennyson : Idylls of the King.

Lowell : Vision of Sir Launfal.

Prescribed Home Reading :—

Bulfinch : Age of Fable.

Bulfinch : Age of Chivalry.

Guerber : Myths of Greece and Rome.

Guerber : Myths of Northern Lands.

Malory : The Boys' King Arthur.

Third Year—Four Periods a Week.

Class Work ;—

Addison-Steele : De Coverly Papers.

Macaulay : Essay on Addison.

Shakespeare : Merchant of Venice.

Shakespeare : Julius Cæsar.

Hawthorne : House of Seven Gables.

Prescribed Home Reading :—

Cooper : The Spy.

Hawthorne ; The Scarlet Letter ; The Marble Faun.

Irving : Selections.

Goldsmith : The Vicar of Wakefield ; She Stoops to Conquer.

Sheridan : The Rivals ; The School for Scandal.

Gray ; The Bard.

Addison-Steele : Selected papers from the Spectator.

Austen : Pride and Prejudice ; Sense and Sensibility.

Fourth Year—Four Periods a Week.

Class Work :—

Burns : The Cotter's Saturday Night ; Songs.

Carlyle : An Essay on Burns.

Coleridge : The Ancient Mariner.

Eliot : Silas Marner.

Wordsworth : Selections.

Mrs. Browning : The Cry of the Children ; Sonnets.

Browning : Selections.

Shelley : Ode to a Skylark.

Keats : Ode to a Nightingale ; Ode to a Grecian Urn.

Tennyson : The Princess ; Selections.

Eliot : Silas Marner.

Prescribed Home Reading :—

Barrie : The Little Minister ; Auld Licht Idylls.

Stevenson : David Balfour ; Kidnapped ; Treasure Island.

Carlyle : Selected Letters.

Lamb : Selected Letters.

De Quincey : The Flight of the Tartar Tribe.

Dickens : Christmas Stories ; A Tale of Two Cities ; David Copperfield.

Thackeray : Pendennis ; The Newcombs ; English Humorists.

Eliot : Romola ; Adam Bede ; Middlemarch ; Mill on the Floss.

Fifth Year—Five Periods a Week.

Class Work :—

History of English Literature. (Stopford Brooke Primer.)

Shakespeare : Macbeth.

Milton : L' Allegro.

H. Penseroso.

Comus.

Lycidas.

Sonnets.

Macaulay : Essay on Milton.

Burke : Speech on Conciliation with America.

Chaucer : Canterbury Tales : Prologue, Knight's Tale, Nun's Tale.

Spenser : Fairy Queen : Britomart Episode.

Prescribed Home Reading :—

Pollard : English Miracle Plays.

Peele : The Arraignment of Paris.

Marlowe : Faustus.

Goethe : Faust, Part I.

Goadby : Shakespeare's England.

Clark : The Girlhood of Shakespeare's Heroines.

Shakespeare : Hamlet ; Sonnets.

Aeschylus : Selections.

Sophocles : Selections.

Milton : Paradise Lost.

Chaucer : Selections.

Spenser : Selections.

Throughout this course the aim has been to take up the works of standard authors in the order of their increasing difficulties ; to stimulate the imagination ; to train the critical faculty ; to secure definite, logical thought ; to cultivate a love for the beautiful ; in short, to gain the broadest mental development.

GRAMMAR.

Grammar is taught incidentally during the first two years. The work is based principally on Meicklejohn's Grammar.

RHETORIC.

Rhetoric is taught incidentally during the last three years. The work is based on Genung's Rhetoric, and on Wendell's English Composition.

COMPOSITION.

Each pupil is required to write one composition a week ; this composition is rewritten after correction. The subjects for the compositions are drawn from life ; the pupil is urged to write about her own experiences. In addition to these weekly compositions, frequent papers are required in connection with the work in literature. The aim of this work in composition is to enable the pupil to express her thoughts clearly and definitely in simple, idiomatic English.

DEPARTMENT OF HISTORY.

Teacher,—Mary L. Westgate.

It is the aim of the earlier courses in history not only to make the student familiar with the leading facts of ancient history, but to teach them skilful handling of books. It is

desired in the more advanced courses to point out historic principles and to show how the practical working of these preconceived theories develop modern constitutional governments.

REQUIRED.

First year.—English history. Three periods a week. Topics from prehistoric Britain to reign of Victoria. Individual work in biography and anecdotes. Books as bases: Montgomery's *Leading Facts in English History*, Lingard's *English History*, Lancaster's *English History*, Guest's *Lectures*, Dickens' *Child's History*, Green's *English People*, Gardiner's.

Second year.—Greek history. Three periods a week. From prehistoric times through empire of Alexander. Text books: Myers *Larger Greek History*, References to Oman's *Greek History*, Smith's *Greek History*, Holm's *Greek History*, Botsford's *History of Greece*.

Third year.—Roman History. Three periods a week. Topics from Allen's *History*. References to Leighton, Liddell, Merivale's *General History*, Merivale's *Fall of Republic*, Schuckburg's *History of Rome*, *Epoch Series*, edited by Cox and Sankey, Mommsen's *History of Rome*.

ELECTIVE.

Fourth year.—Two periods per week. Lecture course in Modern Constitutional History of England and continental countries, or French History, from French Revolution to the fall of Napoleon. References to Gardiner's *Constitutional History of England*, Bright's *English History*, May's *Constitutional History*, Macaulay's *Lives*, Lecky's *XVIII Century*, Fyffe's *Modern Europe*, Duruy's *France*, and Gardiner's *French Revolution*.

Fifth year.—United States History. Two periods a week. Text book: Channing's *Students' History*. Topics by students. Reference constantly to Fiske's *Histories*, Frothingham's *Rise of Republic*, Schouler's *United States*, McMaster's *People of United States*, *American Statesman Series*, Parkman *Histories*.

DEPARTMENT OF NATURAL SCIENCE.

Teacher,—Margaret E. Dodd.

First year.—First half year: Physics, 5 periods per week. Second half year: Physics, 3 periods; later, Chemistry of Air and Water, 2 periods. Botany, 3 periods.

Second year.—Biology, until March; then Physiology, 4 periods per week. The botany will serve as an introduction to biology, this through the study of a few animal forms will lead to the Physiology.

Third year.—Physiography, with mineralogy and elementary astronomy, 4 periods a week. This will give an opportunity to correlate the studies of the first two years.

Fourth year.—Chemistry, 4 periods per week. Elective, College Physics, 4 periods per week. This course is recommended to *all* as excellent scientific training.

Fifth year.—First half year: Domestic science, 4 periods per week. Second half year: Astronomy, 4 periods per week. College Physics. Two years is really required for this course in preparation for the Harvard physics.

The scientific department seeks to develop patient, painstaking students, independent in observations, and in the conclusions drawn from them: to give them experience in manipulating apparatus, and to train them in concise and accurate statement by the preparation of note books. As a final result of the course, the pupil should have a knowledge of the great laws that govern natural forces, and a delight in an intelligent appreciation of all natural phenomena.

DEPARTMENT OF MATHEMATICS.

Teachers.—Mary L. Westgate, Margaret E. Dodd, Adella W. Bates, Carrie E. Small.

First year,—Inventional Geometry. Four periods a week.

Second year,—Algebra. Four periods a week.

Third year,—Algebra. Four periods a week.

Fourth year.—Geometry. Four periods a week. Algebra. Two periods a week.

Fifth year,—Solid Geometry. Three periods a week.
Mathematical Reviews. Four periods a week.

Aim: To train the pupil's powers of observation and reasoning; to procure accurate as well as rapid work.

GERMAN (Elective: Three Periods a Week.)

Teacher, Adella W. Bates.

The aim of the department is twofold: to furnish the student with a thorough knowledge of the elements of German grammar and to enable her to speak and write the language correctly, idiomatically and as fluently as may be; and to introduce her to German literature, classic and modern, so that she may pursue the study of this subject by herself after graduation. The memorizing of German lyrics is a part of each year's work throughout the course.

First year.—Pronunciation drill. Phonetics. Poetry. Grammar: declension and conjugation. Harris' German Lessons, I-XVII, or equivalent. Class-room conversation from beginning of course. Translation work in Reader.

Second year.—Grammar: Through Harris, with general review, and accompanied by prose composition. Short, idiomatic fairy tales or other simple stories read and related. Translation of Baumbach's "Im Zwielficht." Poetry.

Third Year.—Grammar: Joynes-Meissner college preparatory grammar. Translations. 1. Modern German read and studied as literature as well as language work. Stories by Gerstäcker, Storm, etc. 2. Lessing's Minna von Barnhelm. 3. Study of Schiller's dramas began. 4. Sight Passages for translation in class.

Fourth Year.—Grammar: 1. Joynes-Meissner continued. 2. Harris' Prose Composition. 3. Dictation exercises. 4. Original Composition. 5. Study in idiomis for conversation.

Translation.—1. Schiller concluded. 2. Goethe's Hermann and Dorothea. 3. Lyrics read and learned. 4. Study of Poetical Diction.

FRENCH.

(Elective: Three Periods a Week.)

Teacher,—Ellen Constance Walker.

First year; Pronunciation. Rogers' French sight reading. Elementary composition. Plurals and feminines of nouns and adjectives. I, II, III primitive tenses of verbs.

Second year: Rogers French sight reading; letter writing; composition. Grammar, nouns, adjectives, regular verbs, reflexive verbs. 6 Fables, La Fontaine.

Third year: Reading, selected short stories, La Fontaine. Letter writing; composition. Irregular verbs. Participles.

Fourth year: Grammar. General review. Letter writing; Composition. Reading, LaBelle Nivernaise, LeRoman d'un Jeune Homme Pauvre, L'Abbe Constantin, Esther, Athalie, Le Cid.

Fifth year: Letter writing. Moliere, Racine, Corneille, and modern authors.

The aim and scope of the French department is not only to enable the pupil to pass creditable college examinations, but to give her a profitable knowledge of the French language. For this purpose the ear must be trained to recognize the French sounds. This is done by dictation exercises and by translating from hearing the French text without seeing it. The tongue must also be trained; this is done by having the pupil read the French text aloud, as fluently as possible and so clearly and correctly as to be understood by all the class. The pupil is taught to think out her own sentences from the beginning, and thus she chooses her own vocabulary which she increases later by reading and sight translations. As the verb is the most important part of speech, the pupil starts her grammar study with that, not by memorizing long lists of irregular verbs, but by using her own judgment, and forming for herself the various tenses of the verbs and learning the meaning at the same time. Once the verbs have been learned, and a certain vocabulary has been acquired, the pupil is drilled in letter writing and composition with a view to giving her a refined, easy and literary

style, and imparting to her as far as may be "l'esprit de la langue." Finally, when the pupil has attained a fair degree of proficiency in all these branches, she devotes the remainder of her course to the study of French and Literature and the French Classics.

LATIN (Elective).

Teacher,—Mary H. Cowell.

First year.—Four periods a week. Forms: Simple sentences and narrative in Latin and English.

Second year.—Five periods a week. Second Year Latin (Greenough, to D'ooge and Daniell.) Cæsar. Latin composition based upon the text read. Sight reading.

Third year.—Five periods a week. Cæsar, continued; Selections from Sallust's Catiline; Cicero, orations against Catiline, with Archias. Oral and written composition. Sight reading.

Fourth year.—Four periods a week. Six books of Virgil. Word-study. Roman manners and customs. Bennett's Latin Composition.

Fifth year.—Four periods a week. Selections from Ovid amounting to 2,000 or 2,500 lines. Three or more orations of Cicero, largely at sight. Selections from Virgil, *Æn.* VI-XII (the Story of Turnus), Daniell's Composition, exercises for grammatical review.

The work indicated above constitutes a thorough preparation in Latin for any of the colleges. Throughout the course particular attention is given to the subject matter and literary style of the works read, as well as to sentence structure and grammatical form. If desired, this literary and historical investigation will be continued, as graduate work by a general course in Latin literature and Roman antiquities, or by a reading course drawn from Cicero (*De Senectute*), *De Amicitia* and Selections from Horace and Catullus.

GREEK (Elective.)

Teacher,—Mary H. Cowell.

This course will aim to give a thorough preparation for college and will follow substantially the outline given below:

First year,—Four periods a week. Beginner's work. Forms, vocabulary and common constructions.

Second year,—Four periods a week. Xenophon. Greek Composition based upon the text read. Sight reading.

Third year,—Four periods a week. Homer. Sight reading. Composition based upon Attic prose. Grammatical review. Greek manners and customs.

BUSINESS COURSE (Elective).

Teacher,—Charlotte J. Burgess.

The aim of this department is to train the pupils to do neat, methodical and accurate work in shorthand, type-writing and book-keeping.

Second year,—Principles of Phonography. Double entry book-keeping and commercial arithmetic.

Third year,—Practice in writing and reading shorthand. Type-writing; two periods a week.

Fourth year,—Shorthand and type-writing as above. Double and single entry book-keeping.

Fifth year,—Speed practice in writing and reading shorthand. Type-writing three periods a week. Practice in writing from shorthand notes and from dictation, and the use of the mimeograph and carbon paper.

NEWS OF THE DAY.

Teacher,—Carrie E. Small.

This subject is pursued during the five years of the course, with one recitation each week.

Its scope is the world's news.

It is designed to teach the pupils to read; what to read; how to read; how to think for themselves; how to discuss a

subject read; and how to render thought into clear and concise, if not elegant, English.

The topics are treated according to the ability of the several classes.

Facts alone are of little importance. The aim is ever towards the cultivation of a wider intelligence, broader interests and sympathies, and more Christian ideals of human intercourse.

GYMNASTICS (Required : Two Lessons a Week.)

Teacher,—Helen L. Blackwell.

First year,—Swedish Gymnastics. Apparatus work. Drill in Dumb Bells and Wands.

Second and Third Years,—Swedish Gymnastics, Apparatus work. Bells and Wands. Military Drill.

Fourth and Fifth years,—Advanced work in the above. Club Swinging. Military Drill.

Various gymnastics games have been introduced, and Basket Ball teams have been formed from members of the various classes.

The aim with all pupils is to secure a better control of the body, a more correct carriage, and general improvement throughout.

DEPARTMENT OF ART (Required : One Lesson a Week).

Teacher.—Georgiana C. Lane.

This subject is required of each pupil:—The study of art must necessarily be considered as a whole rather than the work of the different classes; therefore the instructor arranges the course of drawing to meet the needs of the individual student and varies it to suit any requirements.

The general plan of the course is as follows :

Free hand drawing of objects and principles of perspective.

Study of form, light and shade.

Study of historic ornament.

Study of design, applied decoration.

Study of color.

DEPARTMENT OF MUSIC (Required),

Director,—J. D. Buckingham.

The aim of the department of music is to cultivate a taste for good music and to prepare the girls for intelligent and appreciative work in the further pursuit of the art in its various branches.

The course in singing embraces the study of solfeggio-rythm, sight reading, dynamics, breath control, intonation, enunciation, unison and part singing.

The theoretical work aims to give the pupil a thorough foundation in the elements of music and includes knowledge of intervals, the derivation and construction of our present day tonalities, major and all minor forms.

Triads—The chords of the Dominant seventh and Diminished seventh. Cadences and harmonic and thematic analysis.

Individual class work, one forty minute period each week;
United class work, one forty minute period weekly.

COURSE OF STUDY JANUARY 1, 1901.

Founder's Day Exercises.

MARCH 12, 1900.

Programme.

Part 1.

Music by School,

Under the Direction of Mr. John D. Buckingham.

Dear Woodward

The Dream,

Gounod

Parting,

Hugo Jungst

The Young Greek's Prayer,

Beethoven

Midsummer Night,

Hugo Jungst

April Showers,

J. L. Hatton

PART II.

Gymnastics,

Under the Direction of Miss Helen L. Blackwell.

Swedish Exercises,

Class V

Military Drill,

Girls from Classes I, II and III

Clubs and Poles,

Girls from Classes I, II, III and IV

Dumb Bells,

Class IV

Club Swinging,

Girls from Classes I and II

Wands, (with singing accom-
paniment.)

Girls from Classes II and III

Hoop Drill,

Girls from Classes II, III and IV

Basket Ball,

Two Woodward Teams

Graduation Exercises of the Class of 1900.

"Character is Higher Than Intellect."

Programme.

Woodward Hymn,

Alumnæ and School

Salutatory,

Janet F. Carr

Chorus, a. Clouds,

Hatton

b. Daybreak,

Deane

School

Essay, Needed Reforms in American Politics,

Elinor P. Randall

Discussion : Quincy and its Needs,

Woodward Institute Debating Society

President, Louise E. Joss.

Secretary, Edith G. Olney.

Essayist, Ethel F. Babcock.

Members :

Elizabeth A. Burns,

-Mary A. Keefe

Estella Cannon,

Louise H. Mahoney

Elizabeth F. Curley,

Margaret W. Milne

Caroline A. Glover

Breta F. Mitchell

Phebe E. Harris,

Alice B. O'Neil

Annie S. Johnson,

-Myra H. Spear

Valedictory,

Helen H. Baxter

Class Song

Address : Books and Reading,

Professor E. Charlton Black

Dear Woodward

School

Presentation of Diplomas,

By Rev. Ellery Channing Butler

Chairman of the Board of Directors.

March,

School

CLASS SONG.

Words by Tina M. King.

We pass through the gates that have stayed our young feet ;

The old scenes are fading which dearly we've loved ;

The new broader fields and fresh woodlands so sweet,

Of fairest land yonder now gladden our sight—

The wonderful land which we e'er longed to greet.

Let us take from these meadows the loveliest flow'rs

That if lost in dark vales, tho' sadly we roam,

With gladness we'll think of these sunnier hours.
 And our hearts will be lighter, our courage renewed,
 We shall press bravely onward with e'en stronger powers.

Today with the sun on our path shining bright,
 Let us hopefully, thoughtfully start on our way;
 Nor darkness our sky cloud, nor storms rise by night,
 But may our lives happy be, and like a fair flow'r
 In sweet beauty blossom, and reach virtue's height.

CLASS OF 1900

| | |
|---------------------------|-----------------------------|
| Ethel Frances Babcock, | Mary Agatha Keefe |
| - Helen Hoyt Baxter, | Tina Marie King |
| Elizabeth Agnes Burns, | Catherine Ann Lennon |
| - Estella Cannon, | Annie Louise Hyland Mahoney |
| Janet Faxon Carr, | Margaret Westland Milne |
| Elizabeth Frances Curley, | - Breta Frances Mitchell |
| Caroline Angelia Glover, | Edith Gibson Olney |

The seminary building and the grading of the lot having been completed, it was voted by the Board of Managers that the cost of the same be charged to Income Account. According to said vote, the cost of the building \$47,134.15 and the cost of the grading of the lot \$6,780.62 was charged to income account and hereafter the treasurer's report will be the net statement of the fund.

Respectfully submitted,

H. WALTER GRAY,

Treasurer of the Fund.

Report of School Committee.

To the Citizens of Quincy :—

The School Committee herewith present to the citizens of Quincy their annual report.

They have expended with conscientious care the sum of \$101,500 entrusted to them for the maintenance of the schools. For the details of this expenditure they refer to the financial statement of the Superintendent, which is made a part of this report, and ask for it a careful and critical consideration.

The Committee believe that owing to various causes arising directly and indirectly from the financial problem, the expenditure of this large sum of money has not accomplished so much for the progress of the schools as it would, had the conditions been different.

The School Committee of 1899 rather than sacrifice the efficiency of the schools overran their appropriation and incurred a deficit of about \$1,500. They had legal advice, which led them to the conclusion that under the City charter as well as under the general statutes of the State they were fully authorized to do this in order to maintain the schools. As that conclusion was opposed by the City Council, the Chairman of the Committee of 1900 was instructed to obtain an opinion from the

City Solicitor in regard to the question at issue. City Solicitor Sears responded as follows :

The question "In the annual care, maintenance and support of the schools, is the School Committee limited in its expenditures to the amount appropriated by the City Council?" is of large importance and I have given much thought and time to it. It is the manifest intention of the legislature that the public schools of the Commonwealth shall be maintained at a high standard and it has consequently given large powers to school committees. There are certain requirements of all towns and cities as to the support of certain schools; there are requirements that certain studies shall and others may be taught, the discretion of the committee governing the latter studies. The Statutes provide (Chapter 44, Sec. 17) that 'towns shall at their annual meetings, or at a regular meeting called for the purpose, raise such sums of money for the support of schools *as they judge necessary*' etc., and inasmuch as this section is equally applicable to cities, unless otherwise provided, in the city of Quincy the city government is to vote such money for the schools as the council voting may judge necessary.

The charter of the city of Quincy provides (Section 48), 'no expenditure shall be made, nor liability incurred, by or in behalf of the city, until an appropriation has been duly voted by the City Council sufficient to meet such expenditures or liability.'

Taking the Statute quoted and the charter together, this, to my judgment, is deducible : That the City Council of Quincy has the sole power of appropriating money for the School Committee and it must for the support of the schools appropriate such sums as the Council judge necessary. No expenditure can ordinarily be legally made unless the appropriation precedes the liability, hence it is my judgment that the School Committee is limited for the annual care, maintenance and support of the schools to such amount as may be duly voted by the City Council."

It was unanimously voted to follow the opinion of the City Solicitor—and to spend no more for the schools than the \$98,000

appropriated by the City Council. There followed, of course, a general feeling of uneasiness among the teachers concerning both the amount of salary and the length of the school year, and some of our teachers found less embarrassing positions in our neighboring cities.

The rigid and unwise economy practiced to make the appropriation last as long as possible necessitated a lack of paper, pencils, books and minor school essentials which retarded the progress of the schools and resulted in a direct pecuniary loss before the supplementary appropriation of \$3,500, voted by the Council became available.

The law on the subject of school expenditure being such as is expounded by the City Solicitor, we call the attention of the citizens to the question whether the arrangement is a wise one and in keeping with the spirit of the City charter.

We offer for consideration the following suggestions: The School Committee is a continuous body interested as much for the schools of last year and next year as for the present year. The City Council is an annual body whose action may possibly represent only a temporary prejudice of the community. The school year for which the important contracts are made is from September to September during the life of two Councils. The fiscal or council year is from January to January. The anomaly is presented now of a council fixing an appropriation of whose expenditures it controls but forty per cent. Whether a body new every year can appreciate the needs of the schools so well as a continuous body equally interested is a fair question for unselfish consideration. If the determination of the annual sum required may not be left to the School Committee might not a certain definite proportion of the City's income for a series of years be so devoted or some other plan devised by which the stability of the school system may be better assured?

At the end of the summer term Mr. Herbert W. Lull, for eight years our efficient and faithful Superintendent, attracted by the offer of a higher salary and of better equipment for work, accepted an election to the Superintendency of the Newport (Rhode Island) schools. Mr. Lull was a worthy successor of

an eminent trio of Quincy Superintendents, "*par nobile fratrum*." His resignation was received by the Committee with regret in which all the friends of the schools shared.

The plan of having one principal supervise two school buildings which was inaugurated at the Wollaston and Massachusetts Fields, having proved satisfactory under Principal Finch, upon the resignation of Principal Candlin (who resigned to accept a more lucrative position at Waltham) the Lincoln and John Hancock schools were united under one principal. Upon the completion of the Cranch building, that school and the Adams will be also united. This plan so long as our needs are so far in excess of our means, appears to furnish a saving less harmful than others and while the Committee do not approve of it as an educational scheme, they realize that a principal who can devote but half his time to a school is still vastly more efficient than no principal, and they hope for the golden age when a principal for each school will not be an extravagance. "My poverty but not my will consents."

The material interest of the schools during the past year has been well cared for by liberal expenditure for school buildings.

The Cranch school, a brick building of nine rooms, has been erected on Whitwell street. This building, which will relieve for a time the crowded condition of the Coddington, John Hancock and Lincoln schools, will be opened early in the new year with six rooms well filled. A simple bath room in its basement marks a new epoch in our school construction, and hints at gymnasiums, medical inspection and other sanitary improvements for the next century.

The Old High School has received such repairs as will render it useful as an emergency building for many years and the Willard school has been connected with the sewer.

The grounds of the John Hancock school have been graded and improved so that they no longer depreciate the value of the neighboring estates. A right of way from the grounds to Water street has been obtained and the school lot will now compare favorably with other public property.

An addition to the High School is urgently needed. About one hundred of its pupils are now housed outside the building. Within the next year with the expected rate of growth, not only will the Old High School be filled, but even this makeshift will not accommodate the pupils. To attempt to prove by argument the necessity for larger quarters seems almost an insult to the intelligence of the citizens of Quincy. The necessity is a self-evident fact. A request for a building equal to the demands of the school for the next five years has been made to the City Council.

The Washington school has outlived its usefulness and a new building has been requested by the Committee. In view of the expected increase in the number of school children in the Quincy Point district, a twelve room building, with modern conveniences, has been suggested.

Of the twenty-three cities in the Commonwealth, required by law to maintain schools for manual training, Quincy, with four others, reported "delinquent" in 1899. Eighteen others, with whom the establishment of such schools was optional, reported that they had availed themselves of the permission to maintain them. The community is invited to share with the Committee in the consideration of the establishment of such a school. More than ever will its necessity be recognized when our community shall contain thousands of highly skilled workers in iron and wood, which its prospective industries will soon require.

The "revival of learning" in Quincy in 1875 was preceded by and accompanied with a revival of interest in the schools by the community and was made possible only by the willingness of the town to make large sacrifices to keep at a high plane our best New England heritage, the Public Schools.

In the annual reports of the State Board of Education the cities and towns of the Commonwealth are graded and ranked in a table according to the sum appropriated for schools for each child, between five and fifteen years of age. The position of Quincy in the table for 1875 to 1879 and from 1895 to 1899 inclusive is here given.

| | | | |
|----------|-----|----------|-----|
| 1875, | 36, | 1895, | 177 |
| 1876, | 49, | 1896, | 156 |
| 1877, | 46, | 1897, | 156 |
| 1878, | 52, | 1898, | 135 |
| 1879, | 32, | 1899, | 130 |
| Average, | 43, | Average, | 151 |

This table shows that in the years from 1875 to 1879, while Quincy was enjoying a national reputation for its schools, but forty-two cities and towns of the Commonwealth were appropriating more money per capita for its school children, while from 1895 to 1899, one hundred and fifty cities and towns are appropriating more. To replace Quincy to its former rank in the list would require an annual appropriation of \$120,000.

The Superintendent is the educational adviser as well as the executive agent of the School Board. To him, in a large measure, the efficiency of the schools is due. Upon the resignation of Superintendent Lull, a special Committee appointed to nominate a suitable candidate as his successor, unanimously recommended Mr. Frank E. Parlin, of Natick. The choice has proved a wise one. Superintendent Parlin has fully justified the high commendation of those who knew his worth and his work, and the Committee entrust the important interests of the schools to his keeping, confident that they will suffer no loss in his hands.

To his interesting report we ask your careful attention.

This report was presented by a special committee consisting of Messrs. Hallowell, Record, Hunting, and adopted as the Annual Report of the Board, Saturday, December twenty-second, 1900.

FRANK EDSON PARLIN, Secretary.

Report of the Superintendent.

To the School Committee of Quincy:

As required by custom and the rules of this Board I herewith submit my first annual report. In the series of annual reports by the Superintendent of public schools, it is the twenty-sixth and of the printed reports of the Quincy School Board, the fifty-first.

Having been in charge of your schools less than four months, it would be somewhat presumptuous for me to discuss their merits in detail; therefore, I present the following as a confession of educational faith and not as a criticism of the Quincy schools or of their past management. That the schools have defects their best friends would hardly deny but that they have many excellent features is obvious to all who visit them.

With the inauguration of a new administration a revolution is often expected. Sometimes a revolution is so much needed it ought to take place, but there should be back of it better reasons than simply a desire to have things different from what they have been. Age alone does not disqualify nor novelty alone commend. What is, however, should not be continued merely "because it has always been so" any more

than should the new be rejected because it is new. Otherwise the progress of the world would cease and all things would continue as they are to the end of time. Alike dangerous to real progress is a too great regard for the past and an inordinate love of change. One produces stagnation, and the other revolution, alike unnatural and indicative of unhealthy conditions. Nature's method is always evolution—ever improving by discarding the inferior old and incorporating the superior new. Improve or die is the universal law. Progress is imperative everywhere and nowhere more imperative than in education.

Although the new education has some grave defects and the old education had some good parts not found in the new, on the whole, the new is decidedly better than the old. The "Little red schoolhouse upon the hill," has been much extolled. As a prophecy and beginning of better things it deserves our appreciation and honor. Nevertheless most of the virtues attributed to it were developed on the old rocky farms surrounding it; where even children of tender years had a part in the struggle to win a not-too-luxurious living from an unwilling soil. Doing chores, cutting wood, planting and hoeing, going to market, making and mending tools, and facing frost and storm, were some of the special courses for boys upon those farms; while the girls had much practice in sweeping, dusting and dish washing, in knitting, sewing and mending, in picking and preserving berries, and in making themselves generally useful in doors and out. These boys and girls were born into a "strenuous life." Duties and responsibilities came early and increased with years. Under such conditions children learned to overcome difficulties, to adapt means to ends and to apply themselves to their work.

There were not many books but there were physical exercise, nature study and manual training in abundance and all learned "by doing." The active, varied, responsible life was the invaluable training. From such training have come men of fiber, of energy, of decision, of courage and common sense; men of integrity of character; and men of executive ability not afraid of work; and all this in spite of their meager and miserable schooling.

The fact is those who extol unwarrantedly the "good old schools" of their youth would soon rebel if such schools were established for their children. It is unfair for those persons to compare themselves with the immature and inexperienced graduates of today, forgetting how much the study and experience of years in practical life has added to their own knowledge and power. Few thoughtful persons would wish to have their children taught as they were taught.

To insist that the new education is superior to the old is not to claim the one faultless or the other meritless. During recent years the changes in educational theory and practice have been so rapid and radical it would be most remarkable if all that has been introduced were entirely sound and good, and all that has been thrown out were wholly unsound and bad. Time and experience winnow all things for the careful observer. In education doubtless there will be a readjustment and a change of emphasis. Some new elements will be abandoned and some old elements will be restored. These changes however must not be made in blindness and prejudice but in the light of a better knowledge of the developing child. Sometime the course of study will be adapted to the child and the effort to adapt the child to the course of study will cease. We shall not try to force his development but to keep step with his nascent powers, having learned that nature's onesidedness is wiser than our studied symmetry.

There is a strong suspicion on the part of many intelligent parents and many excellent teachers that some of the results of school work are inadequate, that fundamentals are too often sacrificed to ornamentals, that there is a lack of thoroughness and power of independent study, and that even the much abused three R's are not wholly unworthy of consideration. They feel that whatever else the grammar school graduate can do he should be able to read intelligently, write legibly, spell common words correctly, perform ordinary computations accurately and know the right construction of a simple English sentence. These results can and should be secured but they are not enough, for one is not to live by bread alone but by many other things.

which add richness and fulness of life. To live is first necessary however.

Administration of the Public Schools.

"The welfare of the child shall be the highest law, is the principle on which every school should be conducted. To it all other considerations must yield. The wisdom of the school laws, the merits of school officials, the efficiency of teachers, may ultimately be judged by the way in which the interests of the children are affected by them." The schools exist for the children. All other persons connected with them from janitor to school board are to serve the children and should be chosen solely because of their fitness for such service. Any person who is unable to appreciate the profound importance of the interests involved or who is willing to sacrifice them in any degree to his personal advantage or to the advantage of his friends is unworthy to be intrusted with matters so sacred to the home, so vital to the child, so important to the community. The people tax themselves freely and cheerfully to support the schools so long as they feel that their children receive all possible benefits from the money expended. They expect and have a right to expect that those having charge of the schools will study carefully their needs, will keep the educational welfare of the pupils constantly in view and will allow no appeal of patronage or personal interest to turn them from the plain path of duty. The people want the best schools that can be secured for their money and will heartily support those officers who insist on having such schools.

The Requisites of a Good Teacher.

The most important factor of a good school is a good teacher. The first requisite of a good teacher is *character* and personality; sympathetic, firm, energetic, refined, honest, orderly, sensible; not negatively but positively good—the active expression of an intelligent and noble soul.

Thoughtful parents and educators are beginning to feel that the silent tuition of the school is quite as important as the formal instruction—that what the child unconsciously imbibes from the spirit and character of the teacher is quite as important as what he gathers from text books. Fortunate are the children who find in their teacher the embodiment of such qualities of mind and heart as will win their love and confidence and suggest to them ideals of manly or womanly excellence—a cheerful and unselfish disposition ; refinement of taste, language and manners ; a high appreciation of truth, justice and moral worth ; together with abundant energy and soundness of judgment—a person who has acquired the wisdom and virtues of maturity without having lost the memories and sympathies of childhood. Such a teacher by winning the confidence and respect of his pupils not only greatly increases the efficiency of his instruction but stimulates the growth of their best qualities, fixes in their minds high standards of conduct and gives them a life-long inspiration.

Someone has said, "Give your son to your slave to be educated and in the end you will have two slaves instead of one." That the disposition and character of the child are often greatly affected by the qualities of his teacher is a very important fact even if it is not fully appreciated.

The character of the discipline of a school is determined largely by the character of the teacher and the government of a school is as important as its instruction ; for manners, morals and good citizenship are all involved. The wise teacher controls his pupils by forces within themselves and so prepares them to become self-respecting, self-supporting and self-governing men and women.

The second requisite of a good teacher is *natural adaptation* to the profession—without this all other qualifications are inadequate and real success impossible. Nature's veto is absolute. Daily observation furnishes ample proof of the folly of attempting to practice a profession for which one has no natural fitness. There seems to be a popular notion that anyone having sufficient education is prepared to teach school. This

often works great loss to the children by retaining as teachers persons of little or no adaptation to the work. Because one has the required education, it does not necessarily follow that he is adapted to teaching any more than it does that he is adapted to the practice of law or medicine. Educational qualifications are essential but natural qualifications are indispensable. Often the whole distance between failure and success is bridged by temperament alone. Without natural adaptation the teacher is apt to be mechanical and a mere imitator who of all poor teachers is about the poorest. Such a teacher goes through the program day after day in a formal, monotonous and spiritless manner, recognizing neither individual needs nor class differences—all that comes to his hand is material to be passed at a fixed rate through the same processes and for so many dollars a week. He lacks ingenuity, intuition and inspiration; deficiencies which no amount of training can supply.

The natural teacher recognizes the difficulties and needs of his pupils, instinctively adapts himself to each individual, with ready invention overcomes all obstacles and by his own enthusiasm secures the attention, interest and best effort of his school. Why is it that such contrasts are found in the mental atmosphere of schoolrooms? one charged with life, industry and good will, another stagnant and oppressive with dulness and indifference? The answer certainly is not found in the pupils.

In this connection should be mentioned that too rare gift, good common sense—that quick practical judgment which always hits upon the appropriate action in emergencies and exceptional cases—a ready adjustment to unusual conditions. Only ordinary sense is required to act according to rule but a sounder judgment to see clearly when the rule should be applied. Some teachers meet their regular duties in an intelligent and satisfactory manner but seem dull and helpless when discrimination and independent action are demanded. But often these are critical times, when either great good is secured or great harm done, when reputations are strengthened or impaired, when public confidence is confirmed or lost. Fortunate indeed is the person who at such times has the happy faculty of doing the sensible thing.

The third requisite of a good teacher is a good, broad *general education*. The opinion that one can teach all he knows and that almost anyone can teach a primary school is a thing of the past in educational circles. A person needs to know many subjects in order to teach one and much of that one in order to teach a part of it well.

It is neither wise nor pleasant to drink from a pool containing just water enough to slake the thirst for it is shallow, stagnant, insipid and full of foreign matter—qualities characteristic of the instruction of those who assume to teach all they know. Every teacher should have an intelligent view of the whole course of study, should be able to discriminate between the essential and less important parts of his work and should be so familiar with each subject that he can make it attractive and inspire his pupils with a deep and lasting love of knowledge.

The fourth requisite of a good teacher is *professional training*. A good general education is not enough. At a time when special knowledge and skill are demanded of trainers of dogs and horses, when years of special training are required before one is allowed to care for the child's teeth, it seems strange that one without professional preparation should be intrusted with the child's education. Are teeth more important than mind and character? Are well trained colts and puppies really more valuable than well educated children? Who would employ a carpenter having as little knowledge of the material and tools involved in his work as some teachers have of children and the best means of promoting the growth and development of their powers? Against the opinion that teachers of inferior ability will do for the primary schools all the facts most emphatically protest. These schools require a rare combination of qualities. There is no place in the whole system where energy, ingenuity, sympathy, insight, skill and thorough knowledge of children are so much needed as here. Let the child have his best teachers first and his next best one when he is between twelve and fourteen years of age—during that chaotic period when the new-born youth needs a wise and steady hand to point the way to useful manhood. A right beginning is a

long step towards a right education. On entering school the child enters a new world. He is most susceptible and impressions are apt to be persistent. The primary teacher should have strong motherly instincts, a thoroughly trained mind and a deep appreciation of the responsibilities of her work. Hers is a field in which the richest endowments and the greatest skill can find ample scope even if they do not find ample reward. No teacher is more rare than a first class primary teacher and none is more deserving of the respect, confidence and generous support of the community.

Appointment of Teachers.

The selection and appointment of teachers is one of the most important functions of the school board in the proper exercise of which the eye should be kept open to the interests of the schools; the ear closed to the demands of selfishness and the vote free to select the best available talent, for in the teacher lies the hope of the school. The ability of the teacher is the measure of its highest attainment. Therefore, whoever would improve the schools must begin by improving the teachers.

The appointment of teachers is not a question of residence, relationship, friendship or charity, but of fitness and business. Is it right to select with less care a teacher for the children of other people than for one's own, or to depart farther from business principles in the choice of them than in the selection of private help?

Local candidates should be measured as others are, by their merits. To appoint a local candidate whose qualifications would not be acceptable in a non-resident is indefensible. Other things being equal the local candidate may properly receive the preference, but the other things must be equal when measured by the same standards. So long as local candidates are chosen or retained solely on their merits there is little danger but, if their appointment is dictated by such motives as charity, friendship, family or political influence, it is a menace to the schools and an abuse of the appointive power.

For a candidate to assume that he has a valid claim upon a position or to demand appointment as his right is mere presumption and for him or his friends to attempt to influence official action by promises or threats is insolence which amply proves his unfitness. If the candidate possesses the requisite qualifications, all will be glad to secure his services but the school funds should not be used to pension favorites nor the children's rights be sacrificed to individual convenience. It is the function of the board not of the candidate, to determine what qualifications are necessary to render one eligible to election. The applicant's own estimate of his fitness cannot always be accepted, although honestly made.

In this as in all other matters the people desire and rightfully expect honest, rational, impartial and businesslike action. Under such a policy any system may be improved; under any other, deterioration is inevitable.

Queries.

The opinions expressed in answer to the following queries are not presented as the fiat of infallible wisdom but as conclusions based upon the best knowledge we have of the nature and development of the child.

The welfare of the child being the chief consideration, is it not a mistake to send him to school at the age of five years?

At this age the child is far from being prepared for the usual school work and his development will be much more natural and satisfactory if, for a year or two longer he is sent to play in the open air and sunshine instead of to school and to books. At the very time nature is saying to the child, "taste, smell, see, hear, feel and move—use your senses and muscles," we shut him up in a schoolroom for four or five hours a day with paper and pencil, books and busy work and tell him to keep still and study. It would be better to send him with his teacher to romp in the fields. At the age of five years the child should be free. It is too early to impose upon him the restraints and instructions of the schoolroom. He is then preeminently a pupil of nature

and of action. To him the world is new and wonderful and each day he essays with all his might to know and conquer it. From dawn to dusk he investigates, questions, imitates and works until his whole being—bone, muscle, brain and mind—has been fully exercised. He plays a hundred parts—dog, horse, locomotive, merchant, doctor, prince and beggar—and acts each completely as he sees it. The senses are busy gathering new ideas which the imagination weaves into a web of life to be acted and lived out. For him noise is more appropriate than silence and movement than thought. By his observations and play he is learning more things than we can teach him at school, and, at the same time he is being prepared in the best possible way for our instruction.

At the age of five the child's brain is growing very rapidly and continues to grow rapidly up to the age of seven, then more slowly, attaining its maximum weight at the age of fourteen or fifteen, while development and organization are not completed before the age of thirty.

We do not say that a child of five cannot do the work of the primary school. The fact is he does do it every year but his development has not prepared him for much of it, and therefore it is premature and accomplished at unnecessary cost of time and energy. The result is that, although his progress may seem very satisfactory in the lower grades, there is a distinct loss in mental grasp and rational power in the upper grades. His development is arrested or rendered defective by our attempting to ignore the lower and fundamental powers and to appeal prematurely to the higher and accessory, and the child pays for our impatience.

As long as children are admitted at the age of five, is it not a mistake to keep them in school as many hours a day as older pupils? Are not two hours a day enough for children of five or six? By reducing the number in attendance at one time and by making some desirable changes in the primary work, this reduction of time can be made not only with great physical benefit to the children but without any loss in scholarship. The average membership of the first grade rooms in the

schools of this city is about fifty-four. Who can properly care for and instruct fifty-four pupils of the first grade, or of any grade? By assigning to a single teacher so many we waste tremendously the energy of the teacher and diminish greatly the efficiency of her work. These children can do very little of importance at school without the teacher, but she can rarely work to advantage with more than a dozen. So she has to rack her brain to devise means of keeping the rest quiet and out of mischief. Most of the so-called "busy work" has come into use to meet this demand and, beyond this service, much of it has little value while some of it is positively harmful. From an educational point of view and for the good of the children, it would be better to divide a class of forty or fifty, first or second grade pupils into two sections and have one section attend in the morning, the other in the afternoon. It is little short of criminal to crowd over seventy small children into a poorly ventilated schoolroom and keep them there during two sessions a day. For his child the wise parent would unhesitatingly say, "Let him have less education if necessary and more air and sunshine." But this is not the alternative since the educational interests of the child would be as well, if not better, served under the proposed arrangement.

Is it not a mistake to admit pupils to the first grade twice a year—in September and April? The September children much overtax our accommodations and by admitting others in April the already overcrowded conditions are made worse. If the expectation is that a sufficient number will be promoted from each grade to the next higher, the relief is not adequate and there is no outlet at the top, moreover, the primary pupils should not be hurried. Under existing conditions almost nothing can be done for the April children during the remainder of the year. They must join those who enter the following September. Their presence complicates difficulties and deprives the other pupils of the needed time and services of the teacher. What compensating advantages are there for this interruption and these new burdens during the last term of the year? Would it not be best for all concerned to admit pupils begin-

ning the work of the first grade but once a year—in September?

The chief objections to the above propositions come from those who regard the primary school as a kind of public nursery—a safe place to send the babies when the home wishes to be relieved of their care. We all sympathize with overworked and distracted mothers, but we believe even they will approve when they know it is best for their little ones.

Is it not a common mistake to require much home study? In adult life it may be necessary to continue business and to carry the day's burdens into the evening hours. But should we deliberately impose these upon children?

Much of education is not acquired at schools nor found in books. These are good and necessary, but good health, strong nerves, a buoyant spirit and a knowledge of one's fellows and the common affairs of every day life are also important.

Five hours a day of faithful work is enough in any grade below the high school. At the end of this time, let the children go home as free as the laborer from his toil. Play, childish enterprises, home duties and outside reading may well fill up the rest of the day and evening. Children must have time for play and a great deal of it. It is the best possible physical exercise. A very brief observation of children at play will convince one that it is more than mere physical exercise, that there is a variety and intensity of mental action rarely secured in the school-room. Moreover, it is through playing with them that the child comes to understand his fellows, learns to adjust himself to them and prepares for the business, social and civil relations of life. We are just beginning to learn the immense value of play as a means of physical and mental development; the time will come when we shall utilize the play instinct much more fully in education, when we shall teach the children a variety of plays and games adapted to their stage of development and supervise them just enough to eliminate the objectionable features.

In many homes the services of the children are needed outside of school hours and the conditions are such that home study is almost impossible without robbing the children of sleep,

which should never be allowed. But the regular performance of these home duties is not an unimportant factor in a right education.

Again, many grammar school pupils have their own childish interests and enterprises to look after. These, too, have their educational value in developing special talents or business ability.

The theory of home study does not usually work as expected. Too often, instead of spurring the slow or lazy on to the effort necessary to keep up with their class, it needlessly stimulates the quick and conscientious, while it overworks and worries the weak and nervous.

It is said that without home lessons the pupil cannot do in the time allowed the work required by the course of study. Then let the course of study be changed. Courses of study are made for the service of children, not children for courses of study. During school hours the pupils should be trained to concentration of attention and to rapid work. At home they may read and the reading may be supplementary to school work, if they choose, but it should be suggested rather than required.

Is not another mistake found in the usual primary number work? Is not detailed number drill in the first two grades premature and does it not result in a defective mathematical development which clearly shows itself in the upper grades? If the Grube and kindred methods were banished from the schools and the regular instruction in number were not begun before the third grade, the final results would be much more satisfactory and more nearly adequate to the time given to the subject. We are now teaching with infinite pains much that need not be taught at all, if we would only wait until the child's brain is prepared for number work. Then numbers would mean something to him.

The child may count, compare magnitudes and make simple measurements in the second grade, so long as he deals with concrete cases within his comprehension, but formal arithmetical instruction should not be given before the child is eight years

old. The time that is worse than wasted on number work in the lowest grades could very profitably be given to reading, oral language, singing and sense training. There is always loss, if not permanent injury, when we attempt to exercise power prematurely—before nature has prepared the way—and this is just what we have been attempting in teaching number, and to make a bad matter worse we have used a most inappropriate method.

Finally, are we not in conflict with nature in teaching penmanship and requiring so much writing in the lower grades? It is not unusual for children in the lowest grades to work with pen or pencil from one to two hours a day. Nature says “develop the muscles in order from the shoulder down to the fingers.” But children never use an arm movement in writing with pen or pencil. The small accessory muscles of the hand and fingers are used constantly, often to the point of exhaustion which the trembling hand reveals, while the fundamental muscles of arm and shoulder are as constantly neglected. Thus the nerve strain is greatly increased, the finger movement, so difficult to overcome, is fostered, the natural order of muscular development is reversed and, by being premature as well as reversed, is rendered defective. The result is the child’s penmanship is not as good and easy as it would have been had a different course been pursued and special training left to later grades. Writing in the lowest grades should be very largely blackboard writing, for it requires the use of the shoulder and arm muscles and gives the learner better ideas of the letter forms. We should not be impatient for immediate results. By much practice we may secure excellent penmanship in the first grade but we do it against nature’s protest and shall find in the upper grades that the child’s hand has been poorly developed. To refine and perfect his hand then will be difficult. Perhaps the best time for special training in penmanship should come during the fifth and sixth grades. Before that the children should use pen and pencil much less than is the custom.

Medical Inspection.

In his report a year ago your Superintendent suggested the desirability of a regular medical inspection of the schools. The experiences of the last year seem to confirm the wisdom of his suggestion. Although no contagion has originated in the school buildings it has, nevertheless, been brought in and in some cases remained undetected until renewed activity revealed its presence.

If medical inspection, by promptly detecting disease, by immediately excluding it and by securing seasonable treatment, will protect the health and lives of thousands of children better than they can otherwise be protected, is it not wise to provide for such inspection, especially if satisfactory arrangements can be made at slight cost to the city?

The question is presented at this time with the hope that it will receive your careful consideration.

Number of Pupils by Grades.

At the opening of the September term the number of pupils enrolled in all the schools was as follows:

| School. | Grade | I. | II. | III. | IV. | V. | VI. | VII. | VIII. | Total |
|---------------------------|-------|----------------|----------|----------------|----------------|----------|----------------|-----------|----------------|-------------------|
| Adams, | { | 37 37 | 52 38 | 42 | 53 | 58 | 45 | 42 | 34 — | 438 |
| Coddington, | { | 47 42 | 57 | 56 | 49 | 45 | 46 26 | 42 | 43 — | 453 |
| Gridley Bryant, | | 58 | 44 | 43 | 44 | 36 | 43 | 35 | 35 — | 338 |
| John Hancock, | { | 57 60 | 61 | 70 | 56 | 57 | 56 | 43 | 49 — | 509 |
| Lincoln, | { | 62 | 60 | 46 45 | 54 | 48 | 45 | 32 | 26 — | 418 |
| Massachusetts Fields, | | 51 | 47 | 42 | 38 | 46 | 33 | 30 | 26 — | 313 |
| Quincy, | | 62 | 44 | 56 | 53 | 48 | 42 | 42 | 32 — | 379 |
| Washington, | | 47 | 47 | 43 | 44 | 44 | 38 | 31 | 29 — | 323 |
| Willard, | { | 38 55 39 | 48 49 | 33 40 39 | 41 34 47 | | 49 48 51 | 37 39 | | |

| High | | | | | IX 208 | X 170 | XI 67 | XII 51 | Grads. 12 — | 508 |
| <hr/> Grand Total, | | | | | | | | | | <hr/> 4,851 <hr/> |

Teachers.

| | | | |
|---|------|--------|-----------|
| At the close of schools in December there were in service : | | | |
| High School. | Men. | Women. | Total. |
| Principal, | 1 | | 1 |
| Other teachers, | 4 | 8 | 12* |
| Grammar and Primary, | | | |
| Principals, | 7 | 1 | 8 |
| Other teachers, Grade VIII, | | 7 | |
| Grade VII, | | 11 | |
| Grade VI, | | 12 | |
| Grade V, | | 11 | |
| Grade IV, | | 12 | |
| Grade III, | | 13 | |
| Grade II, | | 13 | |
| Grade I, | | 15 | 94 |
| Assistants, | | | 20 |
| Specials, | | | 5 |
| Total, | | | <hr/> 140 |

*This does not include the services of the special teachers of drawing, science and cooking. The three special teachers who give the whole or part of their time to the High school are equivalent in days of service to one teacher all of the time and the proper fraction of their salaries is charged to the High.

SPECIALS:

Drawing: Teaches two days per week grades IX-XII and three days per week grades I-VIII.

Science: Teaches two and a half days grades IX-XII and two and a half days grades I-VIII.

Cooking: Twenty afternoon lessons to grade XII.

Sewing: Teaches five days per week grade V-VIII.

Music: Teaches three days per week grades I-VIII.

Twelve teachers have resigned during the year.

Four have been absent on leave.

Four have attended a normal school, but did not graduate.

Thirty-eight have graduated from a normal school.

Ten have graduated from a college.

Six have attended a college but did not graduate.

Fifty-one are graduates of the Quincy High School.

Average salary of all teachers in the first eight grades (not including principals), \$486.75.

Average salary of all teachers in grades IX, X, XI, XII (not including principal), \$732.50

Minimum and maximum salary of principals below High, \$1,000—\$1,400 ; High, \$1,800—\$2,200.

Population and Census.

The United States Census for 1900 gives the population of Quincy as 23,899.

The School Census.

Reported by Charles H. Johnson, Enumerator, September, 1900.

| Age. | Ward I. | II. | III. | IV. | V. | VI. | Total. |
|-----------|-----------|-----------|------------|------------|-----------|-----------|------------|
| Five, | 50 | 54 | 119 | 193 | 61 | 42 | 519 |

| | | | | | | | \$4,414 89 |

Statistics.

Average cost per pupil.

The dividend includes every cent the Board has spent from January 1 to December 31, excepting \$1,434.35, the cost of the Evening Schools.

The divisor may be (1) the whole number of different pupils 5,254; or (2) the average number belonging, 4,705; or (3) the average daily attendance, 4,403. All three of these divisors refer to the school year, September, 1899 to June 1900. (See page 28).

Cost;— 1. \$19.04. 2. \$21.26. 3. \$22.72.

Comparison.

Average cost per pupil for Massachusetts.

From the Sixty-Fourth Report of the State Board of Education.

Cost: 1. \$22.48. 2. \$26.73. 3. \$29.16.

From the Sixty-Third Report of the State Board of Education it is noted that Quincy holds numerically, rank as follows:

1. Amount of money appropriated for each child, between 5 and 15 years: State, 130: County, 21.

2. Percentage of valuation appropriated to public schools: State, 154: County, 13.

3. Ratio of average attendance to the whole number of children between 5 and 15 years: State, 167: County, 20.

4. Comparative amount of money appropriated for each child included in the average number belonging: State 106: County, 12.

Evening Schools.

The statistics refer to the school year beginning in the autumn of 1899 and closing in the spring of 1900.

Adams:—Began October 23; closed February 23. Whole number of men, 81; women, 19. Average attendance, 35. Number of sessions, 45. Average number of teachers, 2.7

Willard:—Began October 23; closed February 23. Whole number of men, 138; women, 6. Average attendance, 39.9. Number of sessions, 45. Average number of teachers, 3.1.

Evening Drawing School (Old High) Mechanical:—Began October 24, closed February 5. Whole number of men, 33; women, 1. Average attendance, 9.3. Number of sessions, 37. One teacher.

Freehand:—Began October 23; closed February 5. Whole number of men, 25; women, 0. Average attendance, 8.6. Number of sessions, 38.

The classes were consolidated December 8. Number of sessions of the consolidated class, 20. Average attendance, 12.3. One teacher.

Quincy Teachers' Association.

The officers for 1900-1901 are :

President, Charles F. Harper, High.

Vice President, Ellen B. Fegan, Willard.

Secretary and Treasurer, Austin W. Greene, Gridley Bryant.

Executive Committee :

Charles F. Harper (Chairman) High.

James M. Nowland, Adams.

Margaret E. Olmsted, Coddington.

Austin W. Greene, Gridley Bryant.

Robert S. Atkins, John Hancock.

Emma M. Favour, Lincoln.

Millie A. Damon, Massachusetts Fields.

Charles Sampson, Quincy.

H. Frances Cannon, Washington.

Ellen B. Fegan, Willard.

Edith F. Bates, Wollaston.

Carrie E. Small, Woodward Institute.

John O. Hall, Jr., Adams Academy.

Membership dues, twenty-five cents per year in advance.

Everyone teaching in Quincy is eligible.

Annual course of lectures and entertainments, 1899—1900.

November 23, 1899,—Dr. William Everett.

January, 4, 1900,—Leon H. Vincent.

February 1, 1900,—Walter E. Loud Concert Company.

March 15, 1900,—Prof. Fay.

May 15, 1900,—Prof. Edward Howard Griggs.

Annual course of lectures and entertainments, 1900—1901.

December 6, 1900,—Harvard Glee, Banjo and Mandolin Club.

December 13, 1900,—Dr. W. J. Long.

January 10, 1901,—Leland Powers.

February 7, 1901,—Prof. George G. Wilson.

March 7, 1901,—Charles T. Copeland.

April 25, 1901,—Walter E. Loud Concert Company.

The Quincy-Parker Anniversary.

April 20—21.

The administration of the schools under the first Superintendent, Colonel Francis W. Parker, marked so distinctly an epoch in the educational history of Massachusetts, that the Quincy Teachers' Association thought a proper observance of this twenty-fifth anniversary would be desirable, and they celebrated it in a befitting manner Friday evening, April twentieth, at the First church by literary exercises of an unusually high order, and Saturday by a banquet at the Vendome, Boston.

THE PROGRAMS.

FRIDAY EVENING.

Robert S. Atkins, President of the Quincy Teachers' Association introduced Hon. Charles H. Porter, Chairman of the School Committee as presiding officer for the evening, who in a few well chosen words introduced the speakers of the evening.

Hon. John O. Hall, Mayor of Quincy extended "The Greetings of the City;" after whom the following well known educators spoke upon the topics indicated:

Prof. Nicholas Murray Butler, Columbia University,

Col. Parker from a Pedagogical Point of View.

Dr. William T. Harris, U. S. Commissioner of Education.

A National Review of Col. Parker's Work.

Dr. G. Stanley Hall, Clark University,

The Soul and Spirit of the Quincy Movement.

Supt. Orville T. Bright, Cook County, Illinois,

A Tribute from Chicago and the West.

Supervisor Robert C. Metcalf, Boston,
A Tribute from Boston to Col. Parker.

Col. Francis W. Parker, Chicago,
The Quincy Schools of 1875.

At the close of the literary entertainment, an informal reception was held.

SATURDAY AFTERNOON.

The banquet at the Vendome, Boston, fittingly closed the meetings in honor of the twenty-fifth anniversary of Col. Parker's election as Superintendent of the Quincy schools. Nearly two hundred guests were present.

Superintendent Herbert W. Lull as President introduced Superintendent George I. Aldrich as Toastmaster.

Dr. William T. Harris spoke "On the Quincy Influence." Dr. Harris was followed by Miss Mary E. Dearborn, Principal of the Coddington School, who responded to the sentiment, "The Country Schoolmaster" in a charming manner.

James H. Slade of the School Committee of 1875 was introduced as one who took a prominent part in "The Finding of the Colonel."

Supt. I. Freeman Hall, formerly Principal at Quincy Point, "One of the Boys of the family" spoke to the subject "Before, During and After."

Dr. N. M. Butler was next introduced and spoke of "The Family's Country Cousins."

George A. Walton, Esq., gave some interesting reminiscences about "The Norfolk County Examinations."

Colonel Parker was introduced as "The Head of the House" and he received an ovation.

Delightful music was furnished during the banquet by the Highland Orchestra, of Woburn, under the direction of Miss Minnie M. Jameson of this city.

Quincy Grammar Masters' Club.

The Club organized in the following manner for the year 1900 :

Chester H. Wilbar, President.

Austin W. Greene, Vice President.

Albert Candlin, Secretary and Treasurer.

Papers on the following questions were read during the year just closed :

February 15, Britain and the Boer by Charles Sampson.

March 15, Shall the Grammar School be Abolished? by Robert S. Atkins.

April 19, Inherited Tendencies by Thomas B. Pollard.

May 17, Possible Changes in Grades I-III, by Albert Candlin.

June 21, Disintegration of China by Chester H. Wilbar.

September 20, Self-Government by James M. Nowland.

October 18, Campaign of 1900 by Austin W. Greene.

November 15, New Education, Inductive or Deductive, by Charles E. Finch.

December 20, Queries in Regard to Some Modern Educational Methods by Superintendent Frank E. Parlin.

At each meeting a paper was read giving a review of current events.

High School Alumni.

The Association of the Alumni of the Quincy High School has the following officers :

President, Miss Mabel E. Adams, '82.

Vice Presidents, Mr. William R. Thomas, '89 ; Mr. R. E. McDonnell, '98 ; Mrs. James M. Nowland, '91.

Secretary, Miss L. Merton Pratt.

Treasurer, Mr. Amos L. Litchfield.

Governing Board with the above,—Mr. Charles F. Harper, Head Master of the High School, Mr. Charles A. Hall, '85 ; Miss

Bessie L. Whittemore, '99; Miss Tina McPherson, '97; Miss Louise Cook, '96; Mr. Frank L. Coe, '96; Mr. Herbert Wilkins, '97; Mr. Howard W. Battison, '85; Miss Alice Higgins, 1900; Miss Ruth Hayden, 1900; Miss Mary Dinnie, '95.

Objects: To promote the usefulness of the Quincy High School, to furnish opportunity for friendly intercourse among its Alumni, and to create and preserve harmonious relations between the school and the community in which it is placed.

Members: All those who hold diplomas of graduation; all those persons who, previous to the first annual distribution of diplomas, had completed a full course of study in the Quincy High School, and who can produce evidence thereof.

Honorary Members: Superintendent of Schools and all persons who are and who have been teachers in the Quincy High School. Other honorary members may be elected by ballot.

Alumni Reunion, January 25, 1900.

Quincy Home Science Association.

The Summer Kindergarten work of the Quincy Home Science Association during the past season has been more than usually successful—some 120 children between four and five years of age in the Gridley Bryant, Adams and John Hancock districts having received seven weeks of training, and, even in this limited time, showing marked development in mind and manners. The work has been most cordially approved by parents, primary teachers, and those who have observed it while in progress during the summer, and perhaps quite as valuable as any results achieved with the children has been its educational influence in the community at large—calling the special attention of the parents of the kindergarten children, of the ladies supervising, (a group of six or eight at each kindergarten) and of those who came as visitors or to assist in various ways regularly or from time to time, to the vital importance of system and intelligence in child-training and to practical methods as illustrated by the trained teachers employed, Miss Clara

Merrill of Quincy, and Miss Bertha V. Jameson and Miss Eva A. Dickey both of Wollaston.

Two "Mothers' Meetings" were held in connection with each kindergarten when the mothers were invited to meet the teachers and ladies of the managing committees. They responded in good numbers to the invitations—at one forty-four being present—and seemed thoroughly to appreciate the talks on the kindergarten and its methods given by the teachers, the music vocal and instrumental contributed by various kind friends, and the simple refreshments and social half hour which followed.

While there may be more of a field for kindergarten work in one part of Quincy than in another, each one of the school districts would be the better for a free Summer Kindergarten as a stimulus to public interest in educational problems, and as giving little children a common sense foundation for work in the regular schools.

A fourth kindergarten and manual training class for boys between the ages of ten and fifteen are spoken of as possibilities for next summer, if the funds of the Home Science Association prove sufficient to meet the expense.

ELIZABETH JOHNSON,

President Home Science Association.

High School.

The High School is greatly overcrowded and its work is being done under very unfavorable conditions. The demand for largely increased accommodations is already a pressing one and in the immediate future will become imperative.

For a detailed statement of the work and urgent needs of the School the reader is referred to the accompanying report of the Head Master.

In conclusion I wish to express my deep appreciation of the kind reception given me by the people of Quincy, of the cordial good will and cheerful co-operation of the teachers and of the courteous consideration and generous support of this Board. Hoping that I may merit the continuation of this respect and confidence and that all may work unitedly for the educational welfare of the children, of our city, I respectfully submit this report.

FRANK EDSON PARLIN,
Superintendent of Schools.

December 22, 1900.

Quincy High School.

Mr. F. E. Parlin, Superintendent of Schools.

DEAR SIR:—In accordance with your request, it gives me pleasure to submit the following report of the Quincy High School for the year ending December 31, 1900.

The year has been one of earnest effort towards the attainment of application, concentration, self-reliance, high moral character and true scholarship. To maintain a school of high grade in an over-crowded building with a corps of teachers the smallest in the state in proportion to the number of pupils, has been an exceedingly difficult problem. The earnest spirit of study and the more regular attendance on the part of the students, the experienced and progressive work of the teachers, together with the vigorous co-operation of teachers and pupils has made it a year of progress. Cultivation of the mind and development of practical power have determined the methods of teaching; formation of character by bringing into action the higher motives has shaped the discipline. The continued, rapid growth of the school shows that the citizens recognize the value of education and appreciate the efforts being made to maintain a school of high grade.

The alternating program, introduced a little more than a year ago, has helped to solve the problems presented by the over-crowded building, the too large divisions, the lack of rooms for recitation, and the small number of teachers. These conditions have prevented the complete introduction of the individual teaching for which the scheme provides. The program, although it is still an experiment, has given satisfaction to teachers, parents and pupils. The fatigue due to sitting for

long periods and the strain from continued concentration during the study and recitation periods, have not appeared to be greater than under the former system. The pupils have not seemed listless towards the end of the periods. The recitation in a subject, occurring on alternate days instead of daily, has produced more complete assimilation and more accurate knowledge; has made it possible to conduct broad, elective courses of study, because the daily program, swinging on eight periods; is so much more flexible than on the former basis of six; has secured better preparation on the part of the pupils, because the long periods furnish time for concentration of attention; has given opportunity for more effective teaching, since, in a long recitation period, there is time for testing, teaching, and application of new matter; and, finally, has permitted the regrading of pupils according to ability and the adaptation of methods of teaching to individual needs. It has also made it possible for each pupil to carry four, full-time subjects, in the place of three, which is a distinct gain in favor of the new program, since the quantity and quality of work in each subject have not been less than under former conditions.

The Program of Subjects, in which all courses are elective, excepting first and second year English, has worked successfully during the two years of trial. Ease and lines of least resistance have rarely determined the choice of subjects; while, in a large majority of cases, the choice has been made by parents and pupils consulting with the teachers. This greater freedom in the election of courses has resulted in greater earnestness of purpose and in closer application to study.

"If it pays to educate, it pays to do it well, and if it pays to do it well, favorable conditions are economical." There are two conditions which seriously hamper and interfere with the work of the school, an over-crowded building and a lack of sufficient teaching force.

The capacity of a school building can not and should not be estimated by the number of pupils that can be crowded into it; but by the number of teachers that can be provided with convenient, healthful class rooms, accommodating a reasonable

number of pupils per teacher. Our building, according to the standard of modern secondary education, should not accommodate more than two hundred and seventy-five pupils, and yet four hundred and forty-six are crowded into it; while seventy-six other pupils, unable to be accommodated, had to be transferred to unsanitary rooms in the old building. Under the present conditions, it is necessary to use for recitation purposes, poorly lighted and poorly ventilated corridors, drawing and lecture rooms, and laboratories. It is also necessary to overcrowd some divisions so that others will be small enough to be accommodated in places too small for classes of the regular size. The school is deprived of a biological laboratory, of a library room, and of an assembly hall. It is necessary to use the present hall for study purposes, thus leaving no place to assemble even a whole class for general or public exercises. Unless the interests of the school are to be sacrificed, unless the disadvantages under which teachers and pupils are obliged to work are to be increased constantly by the growth of the school, and unless successful work is to be rendered less assured, increased accommodations must be provided at once.

To show the rapid growth of the school during the past three years, the following table has been prepared. It gives the number of different pupils enrolled in the classes of the school in December of 1898, 1899 and 1900, and presents a careful estimate of the size of the school and of the different classes for the year of 1901. This estimate is based upon facts secured from the records of the past three years and does not make allowances for the promised, rapid growth at Quincy Point, due to the ship building industry. For this reason it is safe to say that the estimate will be too small rather than too large.

| Year. | Freshman. | Sophomore. | Junior. | Senior. | Graduate. | Total. |
|-------|-----------|------------|---------|---------|-----------|--------|
| 1898. | 207 | 122 | 52 | 41 | 2 | 424 |
| 1899. | 243 | 123 | 64 | 48 | 7 | 485 |
| 1900. | 221 | 171 | 67 | 51 | 12 | 522 |
| 1901. | 263 | 157 | 98 | 58 | 14 | *590 |

* This is two hundred pupils more than both the old and new buildings should accommodate under modern conditions.

That the influence and the efficiency of the school may not be impaired, an addition should be built large enough to accommodate the present school and to provide for future growth. It should provide additional class rooms, recitation rooms, laboratories, lecture room, manual training and domestic science rooms, gymnasium, reading room and lunch room. The whole should furnish adequate accommodations for a thousand students.

The ratio of teachers to pupils in the high schools of Massachusetts is one teacher to each twenty-six pupils on the basis of enrollment. This means that the Quincy High School with an enrollment of five hundred and twenty-two pupils should have at least twenty teachers, where it has but fourteen—a ratio of one teacher to thirty-eight pupils, twelve more to each teacher than is customary throughout the state. It is an acknowledged fact that the smaller the divisions, within reasonable limits, the greater the percentage of successful pupils and promotions. According to the opinion of our best authorities a division should not exceed twenty. The efficiency of the teaching in our school is decreased, because it is necessary many times to make divisions of more than thirty pupils. It also deprives the teachers of periods for consultation with their pupils, and demands that they should spend more than a reasonable amount of time out of school hours in correction and preparation of work. This is a loss to the pupils, since limited opportunities for self-improvement mean limited breadth in teaching. The following table shows the total enrollment, the number of teachers, the ratio of pupils to teachers existing in several schools of the state, and the number of teachers that Quincy should employ on a similar basis. Schools in cities like Brookline are omitted, because of greater resources at their disposal. This data represents the conditions in these schools, December 1, 1900.

| SCHOOL, | Enrollment. | Number of teachers. | Number of pupils per teacher. | Number of teachers they would employ on the Quincy ratio. | Number of teachers that Quincy would employ on their ratio. | Additional teachers that Quincy would require on their ratio. |
|--------------|-------------|---------------------|-------------------------------|---|---|---|

If the Quincy High School is to maintain its position among the good schools of the state, some decisive steps ought to be taken at once to increase the number of teachers to one nearer the recognized standard.

Modern education requires the development of three forms of power, if there is to be clear, complete expression of thought:—that of the body, that of the intellect, and that of the heart. The High School, while training the last two, gives the first no attention other than lessons in drawing. This omission is responsible for the failure of many bright, promising pupils. Manual training quickens the intellectual life; forms the sense of order and beauty; awakens creative activity; secures diligence, accuracy and economy; places empirical experience side by side with theoretical knowledge; and aids the development of practical power. Manual training emphasizes accuracy and honesty, because errors can not be covered up; and begets self-reliance, since each must perform his allotted task. Business, industrial success, and national prosperity are demanding

young men and women equipped with qualities of integrity, industry, judgment, and purpose. Educated workmen are demanded who have been trained to grasp situations, to think clearly, and then to act with energy and precision. The state officials, recognizing the value of manual training, enacted a law requiring that every city of 20,000 inhabitants and over should maintain a manual training department in connection with its high school system. There is no other city in the state where local conditions so forcibly demand manual training and the power of manual expression. Is it not time that Quincy should follow the lead of other cities and introduce some form of manual training?

The school has still another need which must be supplied before it can reach its highest efficiency,—a gymnasium, where systematic physical exercise can be encouraged, and secured. A good gymnasium, with a carefully developed course of exercises adapted to the individual, would prevent contracted chests and round shoulders, would correct awkward carriages, and would result in better bodies; thus securing better school work and decreased tendency to break down under the strain of school duties. The aim of the work would not be to train athletes, but to make men and women able at the end of their school days to do their chosen life work with ease and pleasure. Foot-ball, basket-ball, polo and track athletics have helped to improve the physical condition of the pupils; but athletics reach only a small percentage of the scholars and can in no way take the place or do the work of systematic physical training.

The income of the Rock Island Fund adds each year a few volumes to the reference library of the school, but does not provide enough books to meet the demands of the various departments under modern methods of instruction. The school library with its reference books, with its complete sets of the works of standard writers, and with its charts and maps is the laboratory for the departments of history and English, where pupils acquire a working knowledge of books, and gain the taste and appreciation of the best in history and literature. Would it not be well to appropriate annually a moderate sum

of money for reference books, until the school shall have secured an adequate equipment?

The school has received three valuable gifts during the year :—a framed picture, “The Harvest Moon”, presented by Miss Alice B. Hultman, of 1900 ; a piece of statuary, “The Winged Victory”, given by the class of '99 ; and a collection of mineralogical specimens presented by Mr. George W. Morton.

In closing, I wish to thank all who by their hearty support and ready co-operation have made possible the continued success of the school, and extend to parents and friends of the school a cordial invitation to visit it at any time.

Respectfully submitted,

CHARLES F. HARPER,

Head Master.

Report of Truant Officer.

To Frank E. Parlin, Superintendent.

I herewith submit my third annual report as Truant Officer.

While there has been during the last year a less number of truants than usual, the work of investigating and reporting on non-attendance has very largely increased, and I fear the strong hand of the law will have to be employed in many cases the ensuing year if parents do not comply more closely with its requirements. Often when inquiries are made by the officers, parents shield their children and thus encourage them in wrong doing.

Much trouble has been caused by parents allowing children twelve or thirteen years of age to leave school and go to work. In many cases it has been only by threats and prosecution, that I have been able to secure the return of these children to school, and it has been necessary to employ equal force with employers of children under age.

If parents would co-operate with the Truant Officer in his investigations and efforts in behalf of their children they would be doing the best possible service to their children. The visit of the Truant Officer should not be resented by parents, although the necessity for his call is to be regretted, because by co-operation with him they may be able to break up a bad habit of their child and restore him to right conduct.

The cases of habitual truancy brought to my attention during the year can easily be traced to home influence, companions and the free run of the street at night. The curfew ordinance is well, but its strict enforcement in many cases would be better.

The knowledge that every case of non-attendance, without an excuse satisfactory to the principal, would receive my immediate attention has been the means of restraining many a restless boy or girl.

During my three years of service as Truant Officer, from the expressions of the Superintendent and of principals as well as of those citizens interested in charitable work, I feel sure my work has been appreciated.

The following table of statistics which I have the honor to submit for your consideration will show the work I have performed.

Truant Statistics.

| 1900. | No. of absences reported by teachers. | No. of parents or guardians notified. | Truancies determined by investigation. | Truants returned to school. | Children returned to school from street. | Tardiness investigated. | No. of manufactories or stores visited. | No. of children found employed contrary to law. | No. of employers notified. | No. of children placed before the court. | No. of children sent to truant school. | No. placed on probation. |
